New Managers: 5 Ways To Stop Negative Office Gossip - Forbes In a 2015 study published in Social Neuroscience, scientists looked at brain imaging of men and women as they heard positive and negative gossip about themselves, their best friends and celebrities. Why Do People Gossip? Here's What Science Says | Time Gossip

- Many women regard exchanging details about the personal lives as a basic ingredient of intimacy. Such gossip is an essential part of friendship for most women. Men do not

generally share this view. Men are more likely to talk about the details of politics, news, and sports. Telling people your secrets is evidence of you just don't understand: Women and Men in Conversation

- 1) Men interrupt women more than vice versa.
- 2) Women are more communicative than men.
- 3) Men do not give verbal recognition of the contributions in the conversation made by women.
- 4) Men curse more than women.
- 5) Women gossip more than men.
- 6) Women talk more with one another than men do.
- 7) Men speak more comfortably in public than women.
