Business intelligence: what it is and why it matters

Enterprise business intelligence is the deployment of BI throughout an enterprise, usually through the combination of an enterprise data warehouse and an enterprise license to a BI platform or tool set that can be used by business users in various roles.

Managed SaaS Business Intelligence

**Modern Enterprise Business Intelligence and Data ...**

Business intelligence (BI) combines business analytics, data mining, data visualization, data tools and infrastructure, and best practices to help organizations to make more data-driven decisions. In practice, you know you've got modern business intelligence when you have a comprehensive view of your organization's data and use that data to drive change, eliminate inefficiencies, and quickly adapt to market or supply changes.

With DataRobot's enterprise AI platform and automated decision intelligence, all key stakeholders can now collaborate in extracting business value from data. This ranges from data scientists, business analysts, the IT team responsible for governance and compliance, to the business executives and analytics leaders who derive business impact from the deployed models.
