In a society of quick fixes and instant gratification, it seems as though true happiness is always just around the next bend. But the "happiness" of the world will never offer the wholeness that makes one content and satisfied. Dr. Robert Schuller believes the answer to this cycle of disappointment, frustration, and regret can be found in one of the most famous passages in scripture - Jesus' Sermon on the Mount.

Power Thoughts Ballantine Books

One of the twentieth century's most extraordinary Americans, Pearl Buck was the first person to make China accessible to the West. She recreated the lives of ordinary Chinese people in "The Good Earth," an overnight worldwide bestseller in 1932, later a blockbuster movie. Buck went on to become the first American woman to win the Nobel Prize for Literature. Long before anyone else, she foresaw China's future as a superpower, and she recognized the crucial importance for both countries of China's building a relationship with the United States. As a teenager she had witnessed the first stirrings of Chinese revolution, and as a young woman she narrowly escaped being killed in the deadly struggle between Chinese Nationalists and the newly formed Communist Party. Pearl grew up in an imperial China unchanged for thousands of years. She was the child of American missionaries, but she spoke Chinese before she learned English, and her friends were the children of Chinese farmers. She took it for granted that she was Chinese herself until she was eight years old, when the terrorist uprising known as the Boxer Rebellion forced her family to flee for their lives. It was the first of many desperate flights. Flood, famine, drought, bandits, and war formed the background of Pearl's life in China. "Asia was the real, the actual world," she said, "and my own country became the dreamworld." Pearl wrote about the realities of the only world she knew in "The Good Earth." It was one of the last things she did before being finally forced out of China to settle for the first time in the United States. She was unknown and penniless with a failed marriage behind her, a disabled child to support, no prospects, and no way of telling that "The Good Earth" would sell tens of millions of copies. It transfixed a whole generation of readers just as Jung Chang's "Wild Swans" would do more than half a century later. No Westerner had ever written anything like this before, and no Chinese had either. Buck was the forerunner of a wave of Chinese Americans from Maxine Hong Kingston to Amy Tan. Until their books began coming out in the last few decades, her novels were unique in that they spoke for ordinary Asian people-- "translating my parents to me," said Hong Kingston, "and giving me our ancestry and our habitation." As a phenomenally successful writer and civil-rights campaigner, Buck did more than anyone else in her lifetime to change Western perceptions of China. In a world with its eyes trained on China today, she has much to tell us about what lies behind its astonishing reawakening.

Happiness According to Jesus Wisdom of Robert H. SchullerTwo Complete Books

Robert H. Schuller's ministry—including the architectural wonder of the Crystal Cathedral and the polished television broadcast of Hour of Power—cast a broad shadow over American Christianity. Pastors flocked to Southern California to learn Schuller's techniques. The President of United States invited him sit prominently next to the First Lady at the State of the Union Address. Muhammad Ali asked for the pastor's autograph. It seemed as if Schuller may have started a second Reformation. And then it all went away. As Schuller's ministry wrestled with internal turmoil and bankruptcy, his emulators—including Rick Warren, Bill Hybels, and Joel Osteen—nurtured megachurches that seemed to sweep away the Crystal Cathedral as a relic of the twentieth century. How did it come to this? Certainly, all churches depend on a mix of constituents, charisma, and capital, yet the size and ambition of large churches like Schuller's Crystal Cathedral exert enormous organizational pressures to continue the flow of people committed to the congregation, to reinforce the spark of charismatic excitement generated by high-profile pastors, and to develop fresh flows of capital funding for maintenance of old projects and launching new initiatives. The constant attention to expand constituencies, boost charisma, and stimulate capital among megachurches produces an especially burdensome strain on their leaders. By orienting an approach to the collapse of the Crystal Cathedral on these three core elements—constituency, charisma, and capital—The Glass Church demonstrates how congregational fragility is greatly accentuated in larger churches, a notion we label megachurch strain, such that the threat of implosion is significantly accentuated by any failures to properly calibrate the inter-relationship among these elements.
