Tim Hoskings was such a nice boy, but eventually nice boys turn into bitter men. Priorities change and decisions get made - like the decision to become an arsehole. To finally stop putting everyone else first and get what you want from life. At this point in time any rational person would turn to the fine art of negotiation, but the mid-life crisis isn't a rational state of mind. It is a head-first plummet towards everything you haven't been in the past. A jetpack strapped to your back accelerating you downwards, fuelled by the fear of regretting all the things you never did before that day when you are lying on your back rotting in a box and thinking to yourself, "F*ck." * The letter U has a pending court case to battle discrimination against vowels. "Sex, drugs and very little of educational value."

The Citroën DS was selected by motoring experts and the public as the most beautiful classic car of the twentieth century. French designer Flaminio Bertoni's 'Goddess' is considered a work of art, a sculpture on wheels. Some even called it the Sydney Opera House of motoring. Released in October 1955 in Paris, France, the first DS19 to arrive in Australia stunned onlookers at the Sydney Royal Easter Show in 1956. Its most notable innovation was the suspension, allowing the car to go 'up and down'. But there were many more outstanding features that made it such a seductive car. Many DS models came to this country from 1956 to 1975. As Citroën celebrates a hundred years since its launch, it is fitting to record the untold stories of the importers, distributors, owners, mechanics, racing drivers, restorers, artists and many more behind the story of the DS in Australia. With over 750 photographs, 120 original illustrations and exhaustive research, the authors have given voice to a definitive history of the Citroën DS in this country, capturing the essence of this stunning design and engineering marvel.

The shocking, three-decade story of A. Q. Khan and Pakistan's nuclear program, and the complicity of the United States in the spread of nuclear weaponry. On December 15, 1975, A. Q. Khan—a young Pakistani scientist working in Holland—stole top-secret blueprints for a revolutionary new process to arm a nuclear bomb. His original intention, and that of his government, was purely patriotic—to provide Pakistan a counter to India's recently unveiled nuclear device. However, as Adrian Levy and Catherine Scott-Clark chillingly relate in their masterful investigation of Khan's career over the past thirty years, over time that limited ambition mushroomed into the world's largest clandestine network engaged in selling nuclear secrets—a mercenary and illicit program managed by the Pakistani military and made possible, in large part, by aid money from the United States, Saudi Arabia, and Libya, and by indiscriminate assistance from China. Based on hundreds of interviews in the United States, Pakistan, India, Israel, Europe, and Southeast Asia, *Deception* is a masterwork of reportage and dramatic storytelling by two of the world's most resourceful investigative journalists. Urgently important, it should stimulate debate and command a reexamination of our national priorities.

A complete reorganization now puts relevant repair and maintenance information directly after each automotive system overview, making it much easier to find hands-on fix-it instructions. Author Deanna Sclar has updated systems and repair information throughout, eliminating discussions of carburetors and adding coverage of hybrid and alternative fuel vehicles. For anyone who wants to save money on car repairs and maintenance, this book is the place to start. Deanna Sclar (Long Beach, CA), an acclaimed auto repair expert and consumer advocate, has contributed to the Los Angeles Times and has been interviewed on the Today show, NBC Nightly News, and other television programs.
