Few scholars have been as influential in finance, both as an academic field and an industry, as Eugene Fama. Since writing his groundbreaking 1970 essay

on efficient capital markets, Fama has written over 100 papers and books that have been cited hundreds of thousands of times. Yet there is no one collection where one can easily find his best work in all fields. "The Fama Portfolio" will be an outstanding and unprecedented resource in a field that still concentrates mainly on questions stemming from Fama's work: Is the finance industry too large or too small? Why do people continue to pay active managers so much? What accounts for the monstrous amount of trading? Do high-speed traders help or hurt? The ideas, facts, and empirical methods in Fama's work continue to guide these investigations. "The Fama Portfolio" will be a historic and long-lasting collection of some of the finest work ever produced in finance."

This is the ninth in the 300 series of circuit design books, again contains a wide range of circuits, tips and design ideas. The book has been divided into sections, making it easy to find related subjects in a single category. The book not only details DIY electronic circuits for home construction but also inspiring ideas for projects you may want to design from the ground up. Because software in general and microcontroller programming techniques in particular have become key aspects of modern electronics, a number of items in this book deal with these subjects only. Like its predecessors in the 300 series, "308 Circuits" covers the following disciplines and interest fields of modern electronics:

test and measurement, radio and television, power supplies and battery chargers, general interest, computers and microprocessors, circuit ideas and audio and hi-fi.

JüKlopp's coaching career began in the German second tier at the unfashionable club of FSV Mainz 05, whom he steered to the Bundesliga for the first time in forty-one years. In 2008, he joined Borussia Dortmund, where he achieved back-to-back league titles and took the club to the UEFA Champions League final. He left Germany for one of the England's most challenging jobs: to manage Liverpool, a once-mighty club that had not managed sustained success since the 1980s. It was not a task for the fainthearted. Anfield, Liverpool's home, is a temple to flamboyant attacking soccer powered by passion. In Klopp, Liverpool finally found a manager who embodied the essence of the club. Klopp is dynamic, expressive, restless, driven—he feels every move and play, every tactical shift, every contact on the field. His eyes betray a wild ecstasy and agony as his team thrives or falls. His game plan demands relentless commitment—the famous gegenpress—and he is one of the great personal motivators in all sport. Raphael Honigstein, author of *Das Reboot* and Bundesliga correspondent for the Guardian, has interviewed Klopp and followed his career since his early years, and better than anyone knows how to "bring the noise" to his subject.

Neo-Hasidism applies the Hasidic masters' spiritual insights—of God's presence everywhere, of seeking the magnificent within the everyday, in doing all things with love and joy,

uplifting all of life to become a vehicle of God's service—to contemporary Judaism, as practiced by men and women who do not live within the strictly bounded world of the Hasidic community. This first-ever anthology of Neo-Hasidic philosophy brings together the writings of its progenitors: five great twentieth-century European and American Jewish thinkers—Hillel Zeitlin, Martin Buber, Abraham Joshua Heschel, Shlomo Carlebach, and Zalman Schachter-Shalomi—plus a young Arthur Green. The thinkers reflect on the inner life of the individual and their dreams of creating a Neo-Hasidic spiritual community. The editors' introductions and notes analyze each thinker's contributions to Neo-Hasidic thought and influence on the movement. Zeitlin and Buber initiated a renewal of Hasidism for the modern world; Heschel's work is quietly infused with Neo-Hasidic thought; Carlebach and Schachter-Shalomi re-created Neo-Hasidism for American Jews in the 1960s; and Green is the first American-born Jewish thinker fully identified with the movement. Previously unpublished materials by Carlebach and Schachter-Shalomi include an interview with Schachter-Shalomi about his decision to leave Chabad-Lubavitch and embark on his own Neo-Hasidic path.

In *Rules for Reformers*, Douglas Wilson poaches the political craft of radical progressives and applies it to Christian efforts in the current culture war. The result is a spicy blend of combat manual and cultural manifesto. *Rules for Reformers* is a little bit proclamation of grace, a little bit *Art of War*, and a little bit analysis of past embarrassments and current cowardice, all mixed together with a bunch of advanced knife-fighting techniques. As motivating as it is provocative, *Rules for Reformers* is just plain good to read. Thanks to Saul Alinsky's *Rules for Radicals: A Practical Primer for Realistic Radicals*--a book well-beloved by Barack Obama, Hillary Clinton, and many others--for much of

the shrewd advice, and for none of the worldview.
