The Essentials Routledge

..".Invaluable as a quick reference for the dozens of terms, case names, and criminal concepts buzzing back and forth in (New York) court." Leonard E. Sienko, Jr. (blog post August 3, 2008).
 ..".A handy (work) when you can't distinguish Jenna's Law (sentencing of violent felons) from Buster's Law (animal cruelty), when a drug case witness starts muttering about hamburger helper (dilutants added to narcotics to increase volume and profits) or a prosecutor demands a blood sucker order (an involuntary blood test, often requested in DWI cases)." John Caher, New York Law Journal "If you go into criminal court and you don't know what '30.30 (a dismissal for speedy-trial violation found at CPL 30.30) or a '710.30' notice is (notice regarding evidence subject to suppression found at CPL 710.30), you are one hurting buckaroo," according to Muldoon. While not a replacement for Black's, Slanguage is an excellent complement to your toolbox. Hundreds of terms have been included and this new 5th edition updates and expands on the previous edition which was published by LexisNexis. Criminal law attorneys handling cases in New York will be at a severe disadvantage without the aid of Murray and Muldoon's work.

 Unlike other textbooks on the subject, Criminal Justice Policy and Planning: Planned Change, Fifth Edition, presents a comprehensive and structured account of the process of administering planned change in the criminal justice system. Welsh and Harris detail a simple yet sophisticated seven-stage model, which offers students and practitioners a full account of program and policy development from beginning to end. The authors thoughtfully discuss the steps: analyzing a problem; setting goals and objectives; designing the program or policy; action planning; implementing and monitoring; evaluating outcomes; and reassessing and reviewing. Within these steps, students focus on performing essential procedures, such as conducting a systems analysis, specifying an impact model, identifying target populations, making cost projections, collecting monitoring data, and performing evaluations. In reviewing these

steps and procedures, students can develop a full appreciation for the challenges inherent in the process and understand the tools that they require to meet those challenges. To provide for a greater understanding of the material, the text uses a wide array of real-life case studies and examples of programs and policies. Examples include policies such as Restorative Justice, Justice Reinvestment, Stop-and-Frisk, and the Brady Act, and programs such as drug courts, community-based violence prevention, and halfway houses. By examining the successes and failures of various innovations, the authors demonstrate both the ability of rational planning to make successful improvements and the tendency of unplanned change to result in undesirable outcomes. The result is a powerful argument for the use of logic, deliberation, and collaboration in criminal justice innovations.
