From the creator of the  
popular website Ask a  
Manager and New  
York's work-advice  
columnist comes a  
witty, practical guide to  
200 difficult  
professional  
conversations—featuri  
ng all-new advice!  
There's a reason Alison  
Green has been called  
"the Dear Abby of the

work world." Ten years  
as a workplace-advice  
columnist have taught  
her that people avoid  
awkward conversations  
in the office because  
they simply don't know  
what to say.

Thankfully, Green  
does—and in this  
incredibly helpful book,  
she tackles the tough  
discussions you may  
need to have during  
your career. You'll  
learn what to say when

- coworkers push their  
work on you—then  
take credit for it
- you  
accidentally trash-talk  
someone in an email  
then hit "reply all"
- you're being  
micromanaged—or not  
being managed at all
- you catch a colleague  
in a lie
- your boss  
seems unhappy with  
your work
- your  
cubemate's loud  
speakerphone is  
making you homicidal

[Alison Green’s] advice boils down to the idea that you should be professional (even when others are not) and that communicating in a straightforward manner with candor and kindness will get you far, no matter where you work.”—Booklist (starred review) “The author’s friendly, warm, no-nonsense writing is a pleasure to read, and her advice can be widely applied to relationships in all areas of readers’ lives. Ideal for anyone new to the job market or new to management, or anyone hoping to improve their work experience.”—Library

Journal (starred review) “I am a huge fan of Alison Green’s Ask a Manager column. This book is even better. It teaches us how to deal with many of the most vexing big and little problems in our workplaces—and to do so with grace, confidence, and a sense of humor.”—Robert Sutton, Stanford professor and author of The No Asshole Rule and The Asshole Survival Guide “Ask a Manager is the ultimate playbook for navigating the traditional workforce in a diplomatic but firm way.”—Erin Lowry, author of Broke Millennial: Stop Scraping By and Get Your Financial Life Together [A Guide for Early Career Engineers](#)

 each focus on one  
 country or group of  
 countries, and pay

particular attention to  
 national histories,  
 debates and policy  
 responses on nuclear  
 power development  
 covering such topics as  
 safety of nuclear  
 energy, radiation risk,  
 nuclear waste  
 management,  
 development of  
 nuclear energy, anti-  
 nuclear protest  
 movements, nuclear  
 power representations,  
 and media  
 representations of the  
 effect. The countries  
 featured include well  
 established 'nuclear  
 nations', emergent  
 nuclear nations and  
 non-nuclear nations to  
 offer a range of  
 contrasting  
 perspectives. This  
 volume will add  
 significantly to the  
 ongoing international  
 debate on the  
 Fukushima disaster  
 and will interest

academics, policy-makers, energy pundits, public interest organizations, citizens and students engaged variously with the Fukushima disaster itself, disaster management, political science, environmental/energy policy and risk, public health, sociology, public participation, civil society activism, new media, sustainability, and technology governance.

Citizen Participation in a Post-industrial Society : the Case of Power Plant Siting in Japan Vault Inc.  
Each year billions of dollars are being spent in the area of nuclear power generation to design, construct, manufacture, operate, and maintain various types of systems around the globe. Many times these systems fail due to safety, reliability, human factors, and human error related problems. The main objective of this book is to combine nuclear power plant safety, reliability, human factors, and human error into a single volume for those individuals that work closely during the nuclear power plant design phase, as well

as other phases, thus eliminating the need to consult many different and diverse sources in obtaining the desired information.

Petrogav International provides courses for participants that intend to work on offshore drilling and production platforms. Training courses are taught by professionals from the

oil and gas industry with current knowledge and years of field experience. The participants will get all the necessary competencies to work on the offshore drilling platforms and on the offshore production platforms. It is intended also for non-drilling and non-production personnel who work in drilling, exploration and production industry. This includes marine and logistics personnel, accounting, administrative and support staff, environmental professionals, etc. This course provides a non-technical overview of the phases, operations and terminology used on offshore oil and gas platforms. It is intended also for non-production personnel

who work in the offshore drilling, exploration and production industry. This includes marine and logistics personnel, accounting, administrative and support staff, environmental professionals, etc. No prior experience or knowledge of drilling operations is required. This course will provide participants a better understanding of the issues faced in all aspects of production operations, with a particular focus on the unique aspects of offshore operations.

NEW EDITION, REVISED AND UPDATED The

Power of Appreciative Inquiry describes the internationally embraced approach to organizational change that dramatically improves performance by engaging people to study, discuss, and build upon what's working - strengths - rather than trying to fix what's not. Diana Whitney and Amanda Trosten-Bloom, pioneers in the development and practice of Appreciative Inquiry (AI), provide a menu of eight results-oriented applications, along with case examples from a wide range of organizations to illustrate Appreciative Inquiry in action. A how-to book, this is the most authoritative and accessible guide to the newest ideas and practices in the field of

Appreciative Inquiry since its inception in 1985. The second edition includes new examples, tools, and tips for using AI to create an enduring capacity for positive change, along with a totally new chapter on award-winning community applications of Appreciative Inquiry.

**Electric Station Operator** Routledge  
Generation of Electrical Energy is written primarily for the undergraduate students of electrical engineering while also covering the syllabus of AMIE and act as a refresher for the professionals in the field. The subject itself is now rejuvenated with important new developments. With this in view, the book covers conventional

topics like load curves, steam generation, hydro-generation parallel operation as well as new topics like new sources of energy generation, hydrothermal coordination, static reserve reliability evaluation among others.

Gas Industry.  
*Human Reliability, Error, and Human Factors in Power Generation S. Chand Publishing*  
This volume provides an overview of the political economy of coal in diverse country contexts. Coal is the largest source of greenhouse gas emissions globally, accounting for about 40 percent of energy-related CO<sub>2</sub> emissions. Continued construction of coal-fired power plants could make the climate targets of the Paris Agreement infeasible to achieve. In spite of sharply declining costs for renewable energy sources, many countries still heavily rely on coal to meet their energy demand. The predominance of coal can only be

adequately understood in light of the political factors that determine energy policy formulation. To this end, this edited volume assembles a wide variety of case studies exploring the political economy of coal for across the globe. These includes industrial and developing nations, coal importers and exporters as well as countries that are either substantial coal users, are just beginning to ramp up their capacities, or have already initiated a coal phase-out. Importantly, all case studies are structured along a unifying framework that focuses on the central actors driving energy policy formulation, their main objectives as well as the context that

determines to what extent they can influence policy making. This large set of comparable studies will permit drawing conclusions regarding key similarities as well as differences driving coal use in different countries. This book will be of great interest to students and scholars of energy, climate change, resource management, and sustainable development. It will also appeal to practitioners and policymakers involved in sustainable development. **NUREG/CR.** Petrogav International

This volume explores the management of conflicts arising from the siting of unwanted projects in the AsiaPacific, a region inadequately explored by the relevant literature. The work includes studies on a variety of locations, including Hong Kong, Japan, Mainland China, Taiwan, Vietnam, Singapore, and others. Contributions are drawn from several leading scholars intimately familiar with

the locations under study, and employ theoretical, comparative, and policybased approaches to analysis of environmental conflict, risk management, and public participation. The editors also provide introductory and concluding sections in which the siting issues under discussion are summarized and contextualized. The result is a collection that serves as an invaluable aid and source of information for policymakers, environmentalists, and scholars of the AsiaPacific and elsewhere.
