Pharmacology Online is a customizable hybrid online course, featuring user-friendly, ready-to-use modules and a flexible library of online assets. Organized by unit to match Pharmacology: A Nursing Process Approach, 7th Edition, this course includes interactive case studies that immerse you in true-to-life scenarios and challenge you to make critical choices in patient care and teaching. Self-study modules covering basic principles of pharmacology, drug calculation review, and key drug classes feature animations and quizzes, interactive learning activities for each unit, NCLEX® examination-style practice quizzes, electronic flash cards, and care planning activities. Plus, unique "Roadside Assistance" video clips use humor and analogy to bring difficult concepts to life. When used together, these engaging online study modules and interactive assets promote "learning by doing" and make it fun to learn nursing pharmacology. 21 self-study modules - including 6 new to this edition - cover both basic principles of pharmacology and key disorders and drug classes using illustrations, animations, integrated learning activities, and dynamic hyperlinks. Case studies with accompanying quizzes use true-to-life clinical scenarios to help you "learn by doing" in the safety of a virtual clinical setting. NCLEX examination-style practice quizzes for each unit offer valuable review and test preparation with 10 to 15 self-scoring questions and rationales. Interactive, game-like learning activities make it fun to test your knowledge of critical drug content. A collection of 16 unique "Roadside Assistance" video clips feature nationally known pharmacologist/speaker Alan P. Agins, PhD, who presents core pharmacology concepts with humor and analogy. Electronic flash cards provide a quick and easy way to memorize information about major drugs, drug classes, and pharmacologic principles. Care planning activities present brief case studies along with care plan templates that challenge you to use your pharmacology knowledge to plan patient care. Discussion questions facilitate virtual classroom discussions that are critical to learning in an online environment. Animations visually demonstrate and clarify complex concepts. An integrated drug handbook serves as a convenient reference and adds to the simulated, true-to-life clinical environment. An audio glossary presents both a definition and an audio pronunciation clip for approximately 1,400 terms and drug names. New organization strengthens the connection between the online course and the textbook by combining corresponding self-study modules, videos, and animations into folders that match up with each textbook unit. Dynamic new self-study modules go beyond basic pharmacologic principles to help you better understand key drug information related to areas such as HIV/AIDS, asthma, pain, peptic ulcer disease, antihypertensives, and antilipemic drugs.

The decade ahead will test the nation's nearly 4 million nurses in new and complex ways. Nurses live and work at the intersection of health, education, and communities. Nurses work in a wide array of settings and practice at a range of professional levels. They are often the first and most frequent line of contact with people of all backgrounds and experiences seeking care and they represent the largest of the health care professions. A nation cannot fully thrive until everyone - no matter who they are, where they live, or how much money they make - can live their healthiest possible life, and helping people live their healthiest life is and has always been the essential role of nurses. Nurses have a critical role to play in achieving the goal of health equity, but they need robust education, supportive work environments, and autonomy. Accordingly, at the request of the Robert Wood Johnson Foundation, on behalf of the National Academy of Medicine, an ad hoc committee under the auspices of the National Academies of Sciences, Engineering, and Medicine conducted a study aimed at envisioning and charting a path forward for the nursing profession to help reduce inequities in people's ability to achieve their full health potential. The ultimate goal is the achievement of health equity in the United States built on strengthened nursing capacity and expertise. By leveraging these attributes, nursing will help to create and contribute comprehensively to equitable public health and health care systems that are designed to work for everyone. The Future of Nursing 2020-2030: Charting a Path to Achieve Health Equity explores how nurses can work to reduce health disparities and promote equity, while keeping costs at bay, utilizing technology, and maintaining patient and family-focused care into 2030. This work builds on the foundation set out by The Future of Nursing: Leading Change, Advancing Health (2011) report.

Easy-to-use, interactive features let you make highlights, share notes, run instant topic searches, and so much more. Best of all, with Pageburst, you get flexible online, offline, and mobile access to all your digital books. The clear, concise, and cutting-edge medical-surgical nursing content in Medical-Surgical Nursing: Concepts & Practice, 2nd Edition provides the solid foundation you need to pass the NCLEX Examination and succeed as a new nurse. It builds on the fundamentals of nursing and covers roles, settings, health care trends, all body systems and their disorders, emergency and disaster management, and mental health nursing. Written by noted authors Susan deWit and Candice Kumagai, Medical-Surgical Nursing reflects current national LPN/LVN standards with its emphasis on safety as well as complementary and alternative therapies. UNIQUE! LPN Threads share learning features with Elsevier's other LPN textbooks, providing a consistency across the Elsevier LPN curriculum. Key Terms include phonetic pronunciations and text page references. Key Points are located at the end of chapters and summarize chapter highlights. Overview of Anatomy and Physiology at the beginning of each body system chapter provides basic information for understanding the body system and its disorders. Nursing Process provides a consistent framework for disorders chapters. Evidence-Based Practice is highlighted with special icons indicating current research. Assignment Considerations boxes address situations in which the charge nurse delegates to the LPN/LVN or the LPN/LVN assigns tasks to unlicensed assistive personnel. Focused Assessment boxes include information on history taking and psychosocial assessment, physical assessment, and guidance on how to collect data/information for specific disorders. Elder Care Points boxes address the unique medical-surgical care issues that affect older adults. Legal and Ethical Considerations boxes focus on specific disorder-related issues. Safety Alert boxes highlight specific dangers to patients related to medications and clinical care. Clinical Cues provide guidance and advice related to the application of nursing care. Think Critically About boxes encourage you to synthesize information and apply concepts beyond the scope of the chapter. Concept Maps in the disorders chapters help you visualize difficult material and illustrate how a disorder's multiple symptoms,

treatments, and side effects relate to each other. Health Promotion boxes address wellness and disease prevention, including diet, infection control, and more. Complementary and Alternative Therapies boxes offer information on how nontraditional treatments for medical-surgical conditions may be used to complement traditional treatment. Cultural Considerations promote understanding and sensitivity to various ethnic groups. Nutrition Considerations address the need for holistic care and reflect the increased focus on nutrition in the NCLEX Examination. Patient Teaching boxes provide step-by-step instructions and guidelines for post-hospital care. Home Care Considerations boxes focus on post-discharge adaptations of medical-surgical nursing care to the home environment. Mental Health Nursing unit includes information on disorders of anxiety and mood, eating disorders, cognitive disorders, thought and personality disorders, and substance abuse. Disaster Management content includes material focusing on preparation and mitigation to avoid losses and reduce the risk of injury associated with both natural and bioterrorist disasters. Nursing Care Plans with Critical Thinking Questions show how a care plan is developed and how to evaluate care of a patient. Review questions for the NCLEX-PN Examination at the end of each chapter include alternate-item format questions and help prepare you for class tests and the NCLEX exam. Critical Thinking Activities at the end of chapters include clinical situations and relevant questions, allowing you to hone your critical thinking skills. UNIQUE! Best Practices are highlighted to show the latest evidence-based research related to interventions. Online resources listed at the end of each chapter promote comprehensive patient care based on current national standards and evidence-based practices. UNIQUE! Icons in page margins point to related animations, video clips, additional content, and related resources on the Evolve site.
