RightStart Mathematics is a comprehensive math program for children that is easy to teach and provides the foundation for everyday life, for advanced math, and for science in our technological world. The research-based elementary and intermediate RightStart Mathematics program is easy to use: the lessons tell you what to teach, and how and why, day by day and year by year. This unique program uses visualization of quantities, de-emphasizes counting, and provides visual strategies (mental pictures) for memorizing the facts.

Understanding is emphasized. Math needs to be taught so 95 percent is understood and only 5 percent memorized. When children don't understand, they memorize until the burden becomes too great and then they give up. When children understand, they need less time in review and practice.

Kumon's research has discovered that children learn more easily when they tackle one skill at a time. That's why Kumon Focus on Workbooks shine a spotlight on one challenging maths topic per book and help children improve these essential skills and gain confidence in their abilities. Each workbook utilises the Kumon Method - a step-by-step, incremental approach that helps children learn at their own pace and without anxiety. By rigorously practising each skill, the child will be proficient in the mathematics that is crucial for future learning.
