PIPING MATERIAL SPECIFICATION (PROJECT STANDARDS AND SPECIFICATIONS) This Project Standard and Specification covers the basis for fabrication, installation, flushing, pressure testing, chemical cleaning, hot oil flushing and system color coding of process, drilling and utility piping for offshore oil and/or gas production facilities. This Project Standard and Specification does not cover the following:

PROJECT STANDARDS AND SPECIFICATIONS piping fabrication CONSTRUCTION STANDARD FOR PLANT PIPING SYSTEM (PROJECT STANDARDS AND SPECIFICATIONS) Page 9 of 19 Rev: 01 April 2011

Dimensional Tolerances for Fabricated Pipework Item Normal Service Conditions Operation temp. > 460°C PN ≥150 (rating 900) A ±3 mm max. from indicated dimension for face to face, center to face, location of attachments

FOR PLANT PIPING SYSTEM (PROJECT STANDARDS AND SPECIFICATIONS) This Project Standard and Specification covers minimum requirement(s) for general aspects to be considered in design of piping for petroleum and petrochemical plants to be designed in accordance with ANSI B31.3 which includes but not limited to the following:

- Loading and unloading terminals.
- Crude oil & gas gathering central facilities.

PROJECT STANDARDS AND SPECIFICATIONS piping design The applicable pipe specification allows the use of Socket Weld construction for the services described in item 2 above. Installation shall be only for Carbon Steel piping systems up to 500°F (260°C) and Stainless Steel piping systems up to 120°F (49°C). Sizes up to and including 3 in. NPS.

Engineering standard - Piping Material Specification ... Piping Material Specifications Line Class Index . . . prepared from the technical requirements in the existing standards of major industrial users, contractors, or standards organizations. By harmonizing these technical requirements into a single . . . particular matters or application of the Practice to particular project or engineering . . .

Piping Material Specifications Line Class Index The Piping Specification (abbreviated: Pipe Spec) is a document prepared during the design phase of any project. It provides the appropriate selection, specification and material grade of pipe and piping components for a given service.
