Racism and discrimination have choked economic opportunity for African Americans at nearly every turn. At several historic moments, the trajectory of racial inequality could have been altered dramatically. Perhaps no moment was more opportune than the early days of Reconstruction, when the U.S. government temporarily implemented a major redistribution of land from former slaveholders to the

newly emancipated enslaved. But neither Reconstruction nor the New Deal nor the civil rights struggle led to an economically just and fair nation. Today, systematic inequality persists in the form of housing discrimination, unequal education, police brutality, mass incarceration, employment discrimination, and massive wealth and opportunity gaps. Economic data indicates that for every dollar the average white household holds in wealth the average black household possesses a mere ten cents. In *From Here to Equality*, William Darity Jr. and A. Kirsten Mullen confront these injustices head-on and make the most comprehensive case to date for economic reparations for U.S. descendants of slavery. After opening the book with a stark assessment of the

intergenerational effects of white supremacy on black economic well-being, Darity and Mullen look to both the past and the present to measure the inequalities borne of slavery. Using innovative methods that link monetary values to historical wrongs, they next assess the literal and figurative costs of justice denied in the 155 years since the end of the Civil War. Finally, Darity and Mullen offer a detailed roadmap for an effective reparations program, including a substantial payment to each documented U.S. black descendant of slavery. Taken individually, any one of the three eras of injustice outlined by Darity and Mullen--slavery, Jim Crow, and modern-day discrimination--makes a powerful case for black reparations. Taken collectively, they are impossible

to ignore.

Accounting Cambridge University Press A comprehensive history of fraud in America, from the early nineteenth century to the subprime mortgage crisis In America, fraud has always been a key feature of business, and the national worship of entrepreneurial freedom complicates the task of distinguishing salesmanship from deceit. In this sweeping narrative, Edward Balleisen traces the history of fraud in America—and the evolving efforts to combat it—from the age of P. T. Barnum through the eras of Charles Ponzi and

Bernie Madoff. This unprecedented account describes the slow, piecemeal construction of modern institutions to protect consumers and investors—from the Gilded Age through the New Deal and the Great Society. It concludes with the more recent era of deregulation, which has brought with it a spate of costly frauds, including corporate accounting scandals and the mortgage-marketing debacle. By tracing how Americans have struggled to foster a vibrant economy without encouraging a corrosive level of cheating, *Fraud* reminds us that American capitalism rests on an uneasy foundation of social trust.

Standard economic models assume that many small investors own firms. This is so in most large U.S. firms, but wealthy individuals or families generally hold controlling blocks in smaller U.S. firms and in all firms in most other countries. Given this, the lack of theoretical and empirical work on tightly held firms is surprising. What corporate governance problems arise in tightly held firms? How do these differ from corporate governance problems in widely held firms? How do control blocks arise and how are they maintained? How does concentrated ownership affect economic growth? How should we regulate tightly held firms? Drawing together leading scholars from law, economics, and

finance, this volume examines the economic and legal issues of concentrated ownership and their impact on a shifting global economy.
