"In a survey of Balkan history since the early nineteenth century, Misha Glenny provides the essential background to

recent events in this war-torn area. No other book covers the entire region and offers such profound insights into the roots of Balkan violence or explains so vividly the origins of modern Serbia, Croatia, Bosnia, Greece, Bulgaria, Romania and Albania. Many readers will welcome the author's insights into the final century of Ottoman rule, a complex and colorful period essential for understanding today's conflicts." "Glenny's account of each national group in the Balkans and its struggle for statehood is lucid and fair-minded, and he brings the culture of different nationalisms to life. The narrative is permeated with sharply observed set pieces and portraits of kings, guerrillas, bandits, generals and politicians. He interweaves a narrative of key events with the story of international affairs - the relations between states in the Balkans and between them and the great powers." -BOOK JACKET.Title Summary field provided by Blackwell North America, Inc.

Complete Physics for Cambridge Secondary 1 Student Book OUP Oxford
 Processes involving randomly moving particles, which react either upon encounter or via distance-dependent reaction rates, are ubiquitous in nature. A few stray examples are recombination of ions or holes and electrons, excitation energy migration and quenching, trapping of particles by other species, coagulation, binding of ligands and proteins to specific sites, chemotaxis, catalytically-induced self-propulsion, polymerization, growth of dendrites or aggregates, or nuclei of a new phase. Several decades ago, it was recognized that the kinetic behavior in some systems with reactions and random transport is strongly affected by many factors, which were not taken into account in previous studies. These are, to name but a few, fluctuations in the spatial distributions of the reactants and fluctuations of the reactivity, some

essentially many-particle phenomena, effects of anomalous diffusion, molecular crowding, as well as the internal geometry of the reaction bath. Within recent years, along with a growing interest in chemical processes occurring in biological systems or cellular environments, numerous advances have been made and considerable knowledge has been acquired. These seminal contributions are, however, scattered among many journals and no attempt has been made so far to present a unified picture. This book presents a general overview of different contemporary facets of chemical kinetics in a variety of different environments. It includes 23 seminal works and reviews on different aspects of reaction processes in chemical, physical and biophysical systems, both theoretical and experimental.

As spring arrives in the Albanian mountain town of B, some strange things are emerging in the thaw. Bank robbers strike the National Bank. Old terrors are dredged up from the shipwreck of history. And ultra-explosive state secrets are threatening to flood the entire nation. Mark, an artist, finds the peaceful rhythms of his life turned upside down by ancient love and modern barbarism and by the particular brutality of a country surprised and divided by its new freedom.

Professor Skendi, a native of Albania, traces the progress and setbacks of Albania's long struggle for national unity during this least-known period of its intricate history. He discusses the heritage of its people and examines in detail the developments that led to Albanian independence: national resistance to the decisions of the Congress of Berlin, later opposition to Turkey, and the struggle between the Albanians and the Young Turks. Consideration is given to such internal problems as geographic configuration, religious and political division, and to such external problems as Italo-Austrian rivalry, political interference from neighboring states, and the involvement of great powers. Originally published in 1967. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly

heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

Why did the taxi crash on the autobahn in Vienna? Who exactly were Besfort Y and Rovena, the mysterious couple who died after being flung from the backseat? How was Besfort connected to the war in the Balkans? And why was his affair with Rovena clouded in jealousy and mistrust? Who wanted them dead? This is the story of the last forty weeks of their lives - a fever dream where love and obsession collide.

"This academic and personal journey into Albania's post-communist society examines the links between internal and international migration in one of Europe's poorest countries. The author follows rural migrants to urban destination both within Albania and in neighboring Greece. Their lives and experiences are captured in 150 interviews, alongside group discussions and the ethnographic observations. This rich empirical material is analysed with reference to an extensive body of literature. The author's own experience as migrant and reflections as a researcher studying her own communities of origin add valuable insights. The result is a demonstration of the complexity of the links between internal and international migration, especially from a development perspective."--back cover.

Shortlisted for the Independent Foreign Fiction Prize 2013. In September 1943, Nazi troops advance on the ancient gates of Gjirokastrë, Albania. The very next day, the Germans vanish without a trace. As the townsfolk wonder if they might have dreamt the events of the previous night, rumours circulate of a childhood friendship between a local dignitary and the invading Nazi Colonel, a reunion in the town square and a fateful dinner party that would transform twentieth-century Europe. A captivating novel of resistance in a dictatorship, and steeped in Albanian folklore, *The Fall of the Stone City* shows Kadare at the height of his powers.

People research everything online - shopping, school, jobs, travel - and other people. Your online persona is your new front door. It is likely the first thing that new friends and colleagues learn about you. In the years since this book was first published, the Internet profile and

reputation have grown more important in the vital human activities of work, school and relationships. This updated edition explores the various ways that people may use your Internet identity, including the ways bad guys can bully, stalk or steal from you aided by the information they find about you online. The authors look into the Edward Snowden revelations and the government's voracious appetite for personal data. A new chapter on the right to be forgotten explores the origins and current effects of this new legal concept, and shows how the new right could affect us all. Timely information helping to protect your children on the Internet and guarding your business's online reputation has also been added. The state of Internet anonymity has been exposed to scrutiny lately, and the authors explore how anonymous you can really choose to be when conducting activity on the web. The growth of social networks is also addressed as a way to project your best image and to protect yourself from embarrassing statements. Building on the first book, this new edition has everything you need to know to protect yourself, your family, and your reputation online.

The European Union (EU) is a unique partnership in which member states have pooled sovereignty in certain policy areas and harmonized laws on a wide range of economic and political issues. The EU is the latest stage in a process of European integration begun after World War II, initially by six Western European countries, to promote peace, security, and economic development. The EU currently consists of 28 member states, including most of the formerly communist countries of Central and Eastern Europe. The EU is largely viewed as a cornerstone of European stability and prosperity. For much of the last decade, however, many EU countries have faced considerable economic difficulties. Despite an improved

economic situation in the EU since 2017, economic pressures and societal changes have contributed to the rise of populist and antiestablishment political parties, at least some of which harbor anti-EU or "euroskeptic" sentiments. Such trends have complicated the EU's ability to deal with multiple internal and external challenges. Among the most prominent challenges are the pending departure of the United Kingdom (UK) from the EU ("Brexit"); democracy and rule-of-law concerns in Poland, Hungary, and other EU members; migration and related societal integration concerns; a resurgent Russia; and a heightened terrorism threat. Amid these difficult issues, some are questioning the future shape and character of the EU are being. Supporters of the EU worry that some aspects of EU integration could be stopped or reversed. Others contend that the multiple crises could produce some beneficial reforms that ultimately would transform the EU into a more effective, cohesive entity. Recently, considerable attention has focused on developing a "multispeed EU," in which some EU members could pursue greater integration in specified areas and others could opt out. Successive U.S. Administrations and many Members of Congress long have supported the European integration project, viewing it as crucial to European peace and security and as a way to foster strong U.S. allies and trading partners. Despite some tensions over the years, the United States and the EU share a dynamic political partnership on various foreign policy issues and an extensive trade and investment relationship. How the EU evolves in the years ahead may have strategic and economic repercussions for the United States. At the same time, some EU leaders are concerned about President Trump's apparent skepticism of the EU and his reported assessment of the bloc as an economic competitor. Those of this view also worry that elements of the Trump Administration's "America First" foreign policy—such as the U.S. decision to withdraw from the 2015 multilateral

nuclear deal with Iran—pit the United States against the EU. A number of European officials and analysts question whether traditional U.S. support for close U.S.-EU relations may be shifting and whether the United States will remain a reliable international partner. Some observers suggest that managing relations with the United States under the Trump Administration has emerged as another, somewhat unexpected, challenge for the EU. At the same time, many in the EU hope to preserve close U.S.-EU ties and EU policymakers continue to seek to cooperate with the Trump Administration where possible on issues of common interest and concern. This report provides a brief history of the EU and the major challenges confronting the bloc. It also discusses the potential implications for the EU and for U.S.-EU relations.

"THE CODE OF LEKE DUKAGJINI is a great cultural treasure, comparable to the chapters of The Old Testament." "It provides deep insights into the ancient society of the Albanians, their somber dignity & their magnificent sense of honor."--David Binder, The New York Times. "This legal system was established & passed on to future generations as a common law by Leke Dukagjini, a co-fighter of the legendary Skenderbeg." "The 'Besa' or the 'word of honor' as stated in THE CODE OF LEKE DUKAGJINI which means peace & protection to those whom it is given, has become today an important fighting tool in the political struggle of Kosovo's Albanians against Serb oppression."--Victor Meier, The Frankfurter Allgemeine Zeitung. "The legal Code of the Albanians known by them for a thousand years, is one of the most original in the history of mankind. Among the basic pillars of this code are the equality of men before the code & the non-abuse of justice." "The entire essence of the legal code of the Albanians is an unparalleled rigorous respect for this basic principle: non-violation of the dignity of a man- his honor, home, & life."--Ismail Kadare, Albanian writer.
