This review book offers high school students in New York State advance preparation for the Regents Exam in Algebra 2/Trigonometry. Fourteen chapters review all exam topics and include practice exercises in each chapter. The book

concludes with a sample Regents-style exam presenting problems similar to those that will appear on actual exams. Answers are provided for all questions. Topics covered in this book are: algebraic operations, functions and relations, types of functions, composition and inverses of functions, transformation of functions, imaginary and complex numbers, exponential and

logarithmic functions, trigonometric functions, trigonometric graphs, trigonometric identities and equations, applications of trigonometry, probability and statistics, regression, and sequences and series.
