In this explosive new thriller, #1 New York Times bestselling author Lisa Jackson delves into the deep bond between two sisters and their shared dream that becomes a harrowing nightmare of madness, hatred and jealousy... Cassie Kramer and her younger sister, Allie, learned the hazards of fame long ago. Together, they'd survived the horror of a crazed fan who nearly killed their mother, former Hollywood actress Jenna Hughes. Still, Cassie moved to L.A., urging Allie to follow. As a team, they'd take the town by storm. But Allie, finally free of small-town Oregon, and just that little bit more beautiful, also proved to be more talented—and driven. Where Cassie got bit parts, Allie rose to stardom. But now her body double has been shot on the set of her latest movie—and Allie is missing. Police discover that the last call to Allie's phone came from Cassie, though she has no recollection of making it. Instead of looking like a concerned relative, Cassie is starting to look like a suspect—the jealous sister who finally grew sick of playing a supporting role. As the tabloids go into a frenzy, Cassie ends up on a Portland psych ward. Is she just imagining the sinister figure who comes to her bedside, whispering about Allie—a visitor of whom there is no record? Is someone trying to help—or drive her mad? Convinced she's the only one who can find Allie, Cassie checks herself out of the hospital. But a sudden slew of macabre murders— each victim masked with a likeness of a member of Cassie's family—makes Cassie fear for her safety and her sanity. The only way to end the nightmare is to find out what really happened to Allie. And with each discovery, Cassie realizes that no one can be trusted to keep her safe—least of all herself...

The face of the pedestrian safety crisis looks a lot like Ignacio Duarte-Rodriguez. The 77-year old grandfather was struck in a hit-and-run crash while trying to cross a high-speed, six-lane road without crosswalks near his son's home in Phoenix, Arizona. He was one of the more than 6,000 people killed while walking in America in 2018. In the last ten years, there has been a 50 percent increase in pedestrian deaths. The tragedy of traffic violence has barely registered with the media and wider culture. Disproportionately the victims are like Duarte-Rodriguez—immigrants, the poor, and people of color. They have largely been blamed and forgotten. In *Right of Way*, journalist Angie Schmitt shows us that deaths like Duarte-Rodriguez's are not unavoidable "accidents." They don't happen because of jaywalking or distracted walking. They are predictable, occurring in stark geographic patterns that tell a story about systemic inequality. These deaths are the forgotten faces of an increasingly urgent public-health crisis that we have the tools, but not the will, to solve. Schmitt examines the possible causes of the increase in pedestrian deaths as well as programs and movements that are beginning to respond to the epidemic. Her investigation unveils why pedestrians are dying—and she demands action. *Right of*

Way is a call to reframe the problem, acknowledge the role of racism and classism in the public response to these deaths, and energize advocacy around road safety. Ultimately, Schmitt argues that we need improvements in infrastructure and changes to policy to save lives. *Right of Way* unveils a crisis that is rooted in both inequality and the undeterred reign of the automobile in our cities. It challenges us to imagine and demand safer and more equitable cities, where no one is expendable.

Electric and Hybrid Vehicles: Power Sources, Models, Sustainability, Infrastructure and the Market reviews the performance, cost, safety, and sustainability of battery systems for hybrid electric vehicles (HEVs) and electric vehicles (EVs), including nickel-metal hydride batteries and Li-ion batteries. Throughout this book, especially in the first chapters, alternative vehicles with different power trains are compared in terms of lifetime cost, fuel consumption, and environmental impact. The emissions of greenhouse gases are particularly dealt with. The improvement of the battery, or fuel cell, performance and governmental incentives will play a fundamental role in determining how far and how substantial alternative vehicles will penetrate into the market. An adequate recharging infrastructure is of paramount importance for the diffusion of vehicles powered by batteries and fuel cells, as it may contribute to overcome the so-called range anxiety." Thus, proposed battery charging techniques are summarized and hydrogen refueling stations are described. The final chapter reviews the state of the art of the current models of hybrid and electric vehicles along with the powertrain solutions adopted by the major automakers.
