This dictionary's focus is on current and evolving terminology specific to the broad field of Education; although terms from closely related fields used in the context of Education are also included. Encompassing the history of Education as well its future trends will aid in the understanding and use of terms as they apply to contemporary educational research; practice; and theory. The dictionary aims to provide a starting-point for inquiry and does not claim to be exhaustive or comprehensive to some of the key terms and concepts in Education. It not only caters to the needs of students on education courses but is also be useful for others who have an interest in Education.

Education in South Asia and the Indian Ocean Islands Routledge

With increasing global challenges, the Belt and Road initiative seems to offer one possible platform to think about different possibilities and pathways to promote international collaboration and development covering Asia, Europe, Africa, and other countries. Information and Communication Technology (ICT) in education, as a key focus, provides valuable perspectives for governments, inter-governmental and non-governmental agencies wanting to innovate and advance both ICT and education independently and collaboratively. This book highlights the burgeoning of ICT in education in eleven countries, with particular emphasis placed on the context of the Belt and Road Initiative. ICT has increasingly important roles in education including improve teaching and learning qualities, as well as equity in education. The prominent contributors describe the state-of-the-art of ICT in education in eleven countries based on six major themes (policy perspectives, infrastructure, educational resources, ICT integration into practices, students' ICT competence, and teachers' professional development). We hope the in-depth discussions included in this book would provoke more academic and policy insights globally.

Changing Educational Assessment Springer

This book is a collection of best selected research papers presented at 7th International Conference on Computing in Engineering and Technology (ICCET 2022), organized by Dr. Babasaheb Ambedkar Technological University, Lonere, India, during February 12 - 13, 2022. Focusing on frontier topics

and next-generation technologies, it presents original and innovative research from academics, scientists, students, and engineers alike. The theme of the conference is Applied Information Processing System.

Applied Computational Technologies BRILL

Since the late 1970s, Sri Lanka has undergone a socio-economic transformation, from protectionism towards economic liberalisation and increasing integration into the world economy. Through a systematic comparison of these periods of economic change (1956-1977, and 1977 to the present), Angela W. Little and Siri T. Hettige examine the impact of this transformation on education, youth employment and equality of opportunity in Sri Lanka. The book charts Sri Lanka's shift from a predominantly agricultural economy to one dominated by services and manufacturing, a reduction in unemployment, rising educational and occupational levels, expectations and achievements, and a reduction in poverty. In turn, it reveals a growing role for the private sector and foreign interests in post-secondary education and a modest growth in private education at the primary and secondary levels, as well as widening social disparities in access to qualifications, training and skills. The Sri Lankan experience of, and engagement with, globalisation has been tempered by a long-running ethnic conflict that hindered economic and social development and diverted considerable public funds into defence and war. Now that the war is 'won', the challenge is how to invest in human resource development and the fulfilment of the expectations of youth from all ethnic and social groups. This challenge requires serious policy analysis, the generation of more state revenues, the reallocation of existing public resources, and a political commitment to the winning of a sustainable peace and stability. This book makes an important contribution to the broader international literature on the implications of globalisation for education policy and practice, and to the interaction of exogenous and endogenous forces for educational change. It deals with the tension between the high social demand for education and the growing demand for specialised skills in a changing economy. As such, it has a wide interdisciplinary appeal across education policy and politics, Asian education, South Asian society, youth policy, sociology of education, political economy of social change, and globalisation.

Examination Reform and Educational Change in Sri Lanka, 1972-1982 Springer Nature

Assessment is a key area of interest and debate in education. Its increased use by governments as a powerful means of influencing educational practice are now features of the educational scene worldwide. This volume was the first major international review of such developments and it explores the impact of assessment on all areas of education, from teaching skills to policy-making. The contributors take a global perspective to spotlight the common problems facing teachers and students, policy-makers and politicians through the world as they seek to reconcile issues of equity and national development, educational imperatives and finite state resources. The contributions discuss the changing role of assessment and public examinations, and consider such specific issues as the development of a market economy in educational provision, the difficulties of measuring standards in international studies, and accreditation of absolute rather than relative competencies.

Equivalence of Foreign Degrees Springer

Assessment of student learning outcomes (ASLO) is one of the key activities in teaching and learning. It serves as the source of information in determining the quality of education at the classroom and national levels. Results from any assessment have an influence on decision making, on policy development related to improving individual student achievement, and to ensure the equity and quality of an education system. ASLO provides teachers and school heads with information for making decisions regarding a students' progress. The information allows teachers and school heads to understand a students' performance better. This report reviews ASLO in three South Asian countries---Bangladesh, Nepal, and Sri Lanka---with a focus on public examinations, national assessment, school-based assessment, and classroom assessment practiced in these countries.

Seeding Buddhism with Multiculturalism Lulu.com

The Indian Ocean Tsunami, which devastated 70 percent of Sri Lanka's coastline and killed an estimated 35,000 people, was remarkable both for the magnitude of the disaster and for the unprecedented scale of the relief and recovery operations mounted by national and international agencies. The reconstruction process was soon hampered by political patronage, by the competing efforts of hundreds of foreign humanitarian organizations, and by the ongoing civil war. The book is framed within this larger political and social context, offering descriptions and comparisons between two regions (southwest vs. eastern coast) and four ethnic communities (Sinhalese, Tamils, Muslims, and Burghers) to illustrate how disaster relief unfolded in a culturally pluralistic political landscape. Approaching the issue from four disciplinary perspectives - anthropology, demography, political science, and disaster studies - chapters by experts in the field analyse regional and ethnic patterns of post-tsunami reconstruction according to different sectors of Sri Lankan society. Demonstrating the key importance of comprehending the local cultural contexts of disaster recovery processes, the book is a timely and useful contribution to the existing literature.

Examination Reforms in Sri Lanka Springer Nature

Decentralization and Education: Asian Experiences and Conceptual Contributions examines the specific ways in which decentralization policies have affected the structure and delivery of education in eleven Asian nations. Written by top scholars in the field, the case studies provide detailed and rich empirical evidence documenting the tensions as well as synchronisms between the ideas that form the basis of decentralization policy and the contexts into which they are introduced. The high quality of this collection of essays and the careful attention to local contexts for implementation will make this book a must read for academics, policy planners, practitioners, and students of Asia.

ICT in Education and Implications for the Belt and Road Initiative Mathematics and its Teaching in the Asia-Pacific Region

With reference to university degrees of India.

Educational Decentralization Routledge

This volume contains papers presented at the Annual Meeting of the British Association for Applied Linguistics held at the University of Salford, in September 1993. They illustrate the breadth and

diversity of research in the field.

Handbook of Literacy in Akshara Orthography Asian Development Bank

This volume provides an international perspective on educational dependency in considering both theories and actual developments throughout the world. Some less developed countries, in expanding their education systems, have emulated Western academic-style systems and have increased their dependence on Western models in various respects including examination validation. Others have deliberately avoided this path and have experimented with systems more 'relevant' to development, often in a radical way. At a theoretical level, Marxist and neo-Marxist development theorists argue that education systems dependent on the West are evidence of economic dependency and confirmation of Marxist development theories; while others argue that the evidence suggests an interdependent world and that dependency theories do not apply in education.

ssc exam strategy Master Guide for all students Routledge

This book provides the global mathematics education community with information on the recent and current status of the teaching of mathematics in a group of island nations in the Asia-Pacific region. Sri Lanka, Indonesia, Japan, the Philippines, Australia, Papua New Guinea, New Zealand, and twelve nations in the South Pacific Ocean. It is the third volume in a series conceived by Dr Bruce Vogeli of Columbia University Teachers College and published by WSP, aimed at producing contemporary accounts of mathematics teaching in a world-wide group of nations. Previous volumes have covered Central and South American nations and a selection of Muslim nations respectively.

Examination Reform Multilingual Matters

Immigrants often face considerable challenges when it comes to preserving their cultural and religious teachings. D. Mitra Barua argues that the Sri Lankan Buddhist community in Toronto has maintained its coherence and integrity not despite but because of the need for cultural adaptations. Drawing on survey data, over fifty in-depth interviews with temple monks, educators, parents, and children, and fieldwork conducted in Toronto and Colombo, Sri Lanka, *Seeding Buddhism with Multiculturalism* examines how a religious tradition is transmitted from one generation to the next in a new cultural setting, and what happens during that process of transmission. Barua demonstrates that Buddhists have passed on Buddhist beliefs, attitudes, and practices to their Canadian-born youth, who in turn have constructed their own distinct Buddhist identity, influenced by the individualistic, egalitarian, and secular cultural ambience in Toronto. Through creative fieldwork and translocal analysis - taking into account migrants' geographical, cultural, and familial ties to multiple locales - this book further explains that pre-migration experiences often shape and determine the success or failure of intergenerational transmission. An ethnographic religious study with an uncommon depth of perspective, *Seeding Buddhism with Multiculturalism* shows that first- and second-generation Sri Lankan Buddhists in Toronto are successfully practising Theravāda Buddhism within a Canadian context.

Science Education in Context Bloomsbury Publishing

This edited volume brings together diverse thinkers and practitioners from the field of teaching and teacher education as it pertains to educational development in South Asia. In this volume, authors draw from their research, practice, and field experiences, showcasing how teaching and teacher education are currently being carried out, understood, theorized, debated, and implemented for the

education of children and teachers alike in South Asia. The volume also includes practitioner voices, which are often marginalized in academic discourse. This book acts as a key reference text for academics and practitioners interested in the intersection of education and development in the region, and in particular what it takes to pull off ambitious teaching and teacher education in South Asia.

Prabhat Prakashan

Concerns the treatment of the Tamil minority in Sri Lanka.

Ethnic Conflict and Reconciliation in Sri Lanka Routledge

This book presents an international perspective of the influence of educational context on science education. The focus is on the interactions between curriculum development and implementation, particularly in non-Western and non-English-speaking contexts (i.e., outside the UK, USA, Australia, NZ, etc.).

Dictionary of Education World Scientific

This volume examines the unique characteristics of akshara orthography and how they may affect literacy development and problems along with the implications for assessment and instruction. Even though akshara orthography is used by more than a billion people, there is an urgent need for a systematic attempt to bring the features, research findings, and future directions of akshara together in a coherent volume. We hope that this volume will bridge that gap. Akshara is used in several Indic languages, each calling it by a slightly different name, for example 'aksharamu', in Telugu, 'akshara' in Kannada, and 'akshar' in Hindi. It is the Bhrami-derived orthography used across much of the Indian subcontinent. There is a growing body of research on the psycholinguistic underpinnings of learning to read akshara, and the emerging perspective is that akshara, even though classified as alphasyllabaries, abugida, and semi-syllabic writing systems, is neither alphabetic nor syllabic. Rather, akshara orthography is unique and deserves to be a separate classification and needs further investigation relating to literacy acquisition in akshara. The chapters in this volume, written by leading authors in the field, will inform the reader of the current research on akshara in a coherent and systematic way.
