Treasury of Scales for
Band and Orchestra:
Percussion Alfred Music
Publishing

This book introduces
music education majors to
basic instrumental
pedagogy for the

instruments and
ensembles most
commonly found in the
elementary and
secondary curricula. This
text focuses on the core
competencies required for
teacher certification in
instrumental music. The
first section of the book
focuses on essential
issues for a successful
instrumental program:
objectives, assessment

and evaluation,
motivation, administrative
tasks, and recruiting and
scheduling (including
block scheduling). The
second section devotes a
chapter to each wind
instrument plus
percussion and strings,
and includes
troubleshooting checklists
for each instrument. The
third section focuses on
rehearsal techniques from

the first day through high school.

Exercises for Ensemble Drill Alfred Publishing Company

The Treasury of Scales includes all major and minor scales in harmonized form -- 96 total. Scales are harmonized in SATB format. The harmony and tempo conditions give the conductor material to teach tone, balance, and intonation. It's easy to use because so many of the instruments are playing the exact same lines. Treasury of Scales should

be in every band folder as a permanent part of the repertoire and used daily as a warm-up exercise.

The second edition of the Impact Evaluation in

Practice handbook is a comprehensive and accessible introduction to impact evaluation for policy makers and development practitioners. First published in 2011, it has been used widely across the development and academic communities. The book incorporates real-world examples to present practical guidelines for designing and implementing impact evaluations. Readers will gain an understanding of impact evaluations and the best ways to use them

to design evidence-based policies and programs. The updated version covers the newest techniques for evaluating programs and includes state-of-the-art implementation advice, as well as an expanded set of examples and case studies that draw on recent development challenges. It also includes new material on research ethics and partnerships to conduct impact evaluation. The handbook is divided into four sections: Part One discusses what to

evaluate and why; Part Two presents the main impact evaluation methods; Part Three addresses how to manage impact evaluations; Part Four reviews impact evaluation sampling and data collection. Case studies illustrate different applications of impact evaluations. The book links to complementary instructional material available online, including an applied case as well as questions and answers. The updated second edition will be a valuable resource for the

international development community, universities, and policy makers looking to build better evidence around what works in development.
