The Ten Incarnations of Lord Vishnu
Isvarah paramah krisnah sachid-ananda-vigraha Often in this fractured world, we are filled with self-doubt and apprehension. But the brief powerful moments of kindness and compassion are what carry us through. In a constant pursuit of positivity, Dada J.P. Vaswani writes this charming narrative of the ten incarnations of Lord Vishnu, the God of Protection and the Supreme Being.

Radiating warmth, this exquisitely crafted collection of stories reveals the author's boundless love for human beings. With endless enthusiasm, Dada's narrative soothes and pleases the curious reader. He draws you in and captivates you as he introduces each magnificent avatar and reveals its core essence. His words are a breath of fresh air in the tedium of a fast-paced life. They invite you to look within and give you a fresh perspective on this unpredictable world. J. P. Vaswani is one of India's most loved and respected spiritual leaders. He is the living, moving life force at the helm of the renowned Sadhu Vaswani Mission, an international, non-profit, social welfare and service organization with its headquarters in Pune and active centres all over the world. A scientist-turned-philosopher, Vaswani is also a fluent, powerful and witty speaker, an inspired writer and is the youngest 99-year-old you will ever meet.

In the tidal wave of intellectual argument that followed the 2006 release of Richard Dawkins's God Delusion book, a fierce

debate has raged between atheism and religion over the existence of God, leaving the world's scientists and laymen largely undecided in their opinion. God's Illusion Machine presents a fascinating alternative to a debate that has largely been argued within the framework of Christian versus science concepts. Drawing upon the world's oldest body of knowledge (the Vedas), the author describes the massive illusion to which we are all subjected as we mistakenly believe ourselves to be physical creations of the material world. In God's Illusion Machine, the material world is gradually exposed as the ultimate virtual reality machine for wayward souls who prefer a self-centred, rather than a God-centred, existence. In contrast to Richard Dawkins's assertion that the religious are suffering a delusion for believing in God, the author argues that both the atheists and the religious are under the spell of God's deluding energy called Māyā, which acts in reciprocation with a soul's desire to be in illusion within the physical realm. By applying the profound spiritual insights of Vedic knowledge along with a healthy dose of common sense and good humour, God's

Illusion Machine is an enthralling exposé of the deceptive nature of the material world and the false claims of materialists regarding the nature of life and love. It is a triumph of spirituality over both atheistic materialism and religious dogmatism. God's Illusion Machine is a work of major importance realigning Western religion, philosophy, and science with eternal spiritual truths, an enlightening read for both the atheist and the religious, bringing spiritual certainty and true love to bewildered souls in troubled times. For atheists who like a good argument, for the religious who are stuck for a reply to Richard Dawkins, for fans of fantasy and sci-fi where forces of light and illusion contend in battle, and for you, the reader, whatever your disposition, this book will forever change your outlook on life and its meaning. As the rising sun disperses the darkness of night, so in the presence of Krishna (The Absolute Truth), māyā (illusion) cannot stand.

This book focuses on the fate of the Greek mythological themes, divine and heroic figures, far in the East, primarily in the

area of ancient Gandhara and Bactria (today in Uzbekistan). In alphabetic order, it covers primary iconographic schemes, which the art of these areas borrowed from the Hellenistic Mediterranean. We can compare how individual typical depictions of Greek deities changed and accommodated the taste and ideas of the local populace over the centuries. Aside from this, many of the originally Greek mythological characters, including their typical attributes, became, as this book clearly shows, the basis for images of various local Iranian, Indian and other deities.

Hindu theology views rivers as goddesses who confer blessings and spiritual purification and their release from the grip of the demon of drought is a recurring theme in the mythology. India is a country blessed with many rivers, but of these,

seven are considered to be particularly important. Known collectively as Saptaganga, Sapta Sindhu or Saptapunyanadi, the Ganges, Yamuna, Sindhu, Sarasvati, Godavari, Narmada and Kaveri rivers are invoked at the start of every ritual. They weave through sacred narratives about gods, sages and heroes and define the physical, spiritual and cultural landscape of Bharatavarsha. *Sages and Kings* Cambridge Scholars Publishing

The costs of industrial agriculture are astonishing in terms of damage to the environment, human health, animal suffering, and social equity, and the situation demands that we expand our ecological imagination to meet this crisis. In response to growing dissatisfaction with the existing food system, farmers and consumers are creating alternate models of production and consumption that are both sustainable and equitable. In *Growing Stories from India: Religion and the Fate of Agriculture*, author A. Whitney Sanford uses the story of the deity Balaram and the Yamuna River as a foundation for discussing the global food crisis and illustrating the Hindu origins of agrarian

thought. By employing narrative as a means of assessing modern agriculture, Sanford encourages us to reconsider our relationship with the earth. Merely creating new stories is not enough -- she asserts that each story must lead to changed practices. *Growing Stories from India* demonstrates that conventional agribusiness is only one of many options and engages the work of modern agrarian luminaries to explore how alternative agricultural methods can be implemented.

Istanbul has long been a place where

stories and histories collide, where perception is as potent as fact. From the Koran to Shakespeare, this city with three names--Byzantium, Constantinople, Istanbul -- resonates as an idea and a place, real and imagined. Standing as the gateway between East and West, North and South, it has been the capital city of the Roman, Byzantine, and Ottoman Empires. For much of its history it was the very center of the world, known simply as "The City," but, as Bettany Hughes reveals, Istanbul is not just a city, but a global story. In this epic new biography, Hughes takes us on a dazzling historical journey from the Neolithic to the present, through the many incarnations of one of the world's greatest cities--exploring the ways that Istanbul's influence has spun out to shape the wider world. Hughes investigates what it takes to make a city and tells the story not just of emperors, viziers, caliphs, and sultans, but of the poor and the voiceless, of the women and men whose aspirations and dreams have continuously reinvented Istanbul. Written with energy and animation, award-winning historian Bettany Hughes deftly guides readers through Istanbul's rich layers of

history. Based on meticulous research and new archaeological evidence, this captivating portrait of the momentous life of Istanbul is visceral, immediate, and authoritative -- narrative history at its finest.

A Tale of Three Cities Notion Press

'Religion is a tool in the hands of the oppressor against the oppressed solely because he frames the commandments and calls them the God's', is an apt description of the Hindu social order. The book rips open the raw nerve of Hinduism—its invidious castes, positioned as a 'God-ordained' institution, commandeered by its freebooter priestly class while clandestinely establishing its religious, social and political hegemony through interpolation of its pristine and effulgent scriptures. The author boldly analyses this imbroglio through a microscopic analysis of these and more related issues: • How priests controlled the Hindu religious, social, educational and political apparatus? • How the dominant priestly class fractured the society into mutually antagonistic subordinated hierarchical segments, and ruled it by reserving all elite jobs for itself? • How the

fiendish priesthood emasculated shudras by depriving them of the 'shastra and shastra' (education and arms) and made them permanent 'village servant classes'?

- How the pretensions of attaining siddhis through 'meditation and penances' established priests as the 'gods on earth' for their assertions of 'purity and effulgence'?
- How 'karma', 'reincarnation' and '84-lakhs births' theories were devised to justify fatalism and hierarchical gradation of varnas?
- Can India be rightfully called the 'vishvaguru' and the mother of all civilisations?
- How Buddhism effeminated Hindus and made them the doormats for the ruthless?
- Why Hindus had to abandon their own, to adopt foreign institutions of governance?
- Why Hinduism should become a universal and proselytising faith and fight demographic challenges posed by Islam and Christianity?

Caitanya Upaniṣad Otto Harrassowitz Verlag

This book deals with roots of Indian geographical thoughts with reference to its historical base, cultural context and visionary message. As a consequence of

long cultural history the resultant lifeworld in India converges like a drama and dance of space-time function with transference and transformation. In the passage of time emerged a metaphysical frame of thought, the varieties of heritagescapes, and simultaneously grown the senses to heritage ecology. Of course, attempts have been scanty but the richness always portrayed in literature and literary geography. Historical and cultural geographies in India have not caught that much attention in the academia; however on micro-level distinct attributes are interpreted in the recent literature. Going back to the ancient notions of nature theology, religioscapes and rituals have developed a complex network of belief systems in the Hindu traditions. In these traditions the motherly river Ganga serves as symbol, system and metaphor in the Indian culture. Continuity of cultural manifestations is actively maintained and continued in the Indian villages, where lives three-fourths of India's population, and serve like a 'place ballet'. India's catastrophic march on the road of development and technology is entangled with obstacles and socio-spatial gaps that

need to be re-considered in the light of cultural background and historical legacy. All these issues are examined, emphasising dualistic and complimentary perspectives in the West and the East.
