[Archive] - PPRuNe Forums BMW GO-480-B1A6 The Lycoming O-480 is a family of six-cylinder, horizontally opposed fixed-wing aircraft engines of 479.6 cubic inch (7.86 l) displacement, made by Lycoming Engines. The engine is a six-cylinder version of the four-cylinder Lycoming O-320. O-480 series engines are installed on a number of different aircraft types. Lycoming O-480 / BMW GO-480-B1A6 Along with Continental and Franklin, Lycoming was a basic provider of engines for the ubiquitous bright yellow Piper Cub, which sold for less than \$2,000 and was synonymous with small general aviation aircraft for many years. The O-480 was a high performance, air-cooled, six-cylinder, horizontally-opposed engine. Lycoming O-480-1B (GSO-480-B1B6) Horizontally-Opposed 6 Engine The geared Lycoming GO-480 engine

allows a reduced propeller speed, 2170 rpm at engine speed of 3400 rpm, with reduced noise and increased propeller efficiency as a result. Due to the higher mount of the Simuflight engine conversion, larger propeller diameters, 89 inches can be installed on the Simuflight conversions providing maximum efficiency from the propeller. Engine Conversion - Lycoming GO-435-C2B, GO-480, IGO-480 ...As mentioned, the GO-480 was installed in greater numbers, so there are more parts for that. The 435 is just basically a 6 cylinder version of the O-290, so most of the cylinders are the same. For overhauls: Central Cylinders in Omaha does them. Heart Of Texas Engines has done them.
