Painting With Fabric is Jeanine Malaney's technique of creating artworks with fabric utilizing fabric collage, raw edge appliqué and free-motion quilting. This is a How-To book using this technique which will allow you to paint a picture with fabric! It's not a typo...it is not painting on fabric, though Jeanine does utilize paints minimally for shading or highlighting; rather, this is

creating a "painting" with the medium of fabric instead of paint! Soooooo fun and less threatening than using paints. Jeanine's technique is basically fabric collage, enhanced with sewing techniques (raw-edge appliqué and free-motion quilting). She cuts fabric pieces and compose a collage by gluing and rearranging pieces on a background fabric she call my "canvas". After college, Jeanine may add shading and detail features with fabric paint. She then secures the image with clear or smoke monofilament thread. After squaring up she may add fabric borders, then she layers with backing and batting. With a quilting process you can then increase texture and highlight features creating a three-dimensional effect. You can then produce your own continuous binding to match or compliment borders. Each unique piece should be titled, signed, and framed. Fundamental to this technique is a process of finding an inspiration, establishing a design based on the elements of artistic composition, selecting appropriate fabrics, collage layering, free-motion quilting, use of paint for detail and shading, and finishing touches for a

professional look (borders, squaring, binding, labeling). All steps are explained and illustrated in detail in the book. Also included are design tips for skies and water, for mountains, rocks and cliffs, for foliage and trees, figures and buildings. Many examples from photo inspiration to a finished fabric collage "painting" are provided in this book. This technique is for the artist who wants to create original and unique fabric collages, one-of-a-kind watercolor or landscape quilts, and without the purchase of any kind of kit. You can even use the fabric that already exists in your stash and your existing sewing setup.

Imagine what it would be like to go back in time to the 15th century Venice. And imagine what it would be like to meet your

lifelong hero, Michelangelo. And imagine what it would be like if, on first meeting, you spill a tray of pasta and wine on that very same hero. Well, that's what happens to serious young artist Mark Breen. As the result of a drunken bet, Mark knocks out a painting of a toilet bowl. Much to his amazement, he sells it. In short order he's hailed as the new Andy Warhol and becomes an overnight sensation-and a very wealthy man. Soon, images of his toilet bowls are on more t-shirts, mugs, and calendars than Edvard Munch's *The Scream*. His friend and mentor, Hugh Connelly, afraid that Mark is in danger of losing his "artistic soul," advises him to go back to Italy and reacquaint himself with the "old masters." In Venice, Mark falls in love with Alexandra, a beautiful art restorer, but it's a one-sided affair. One night, hoping to win her over, he climbs up on a roof to find out who painted her favorite fresco. He falls off the roof and wakes up in 15th century Venice where he meets an innkeeper named Francesca, who looks exactly like Alexandra. And it gets curiouser and curiouser from there. During his stay-which is sometimes zany and sometimes frightening-he meet his

hero, Michelangelo, who teaches him the true meaning of art.

*The Truth About Abnormal Pap Smears and HPV* Jones & Bartlett Publishers Highlighting the voices less commonly showcased to the public - voices of young people, parents, and social and health practitioners - this book comments on gender and sexuality in the contexts of formal and informal education, peer cultures and non-conformity, social sustainability and equal rights. At a time of mounting conservatism globally - when broader issues of equity and justice around sexuality and gender in education and health have come under attack - it is critical that health workers, social service

practitioners and educators share approaches, stories, and data across these spaces to advocate for informative, inclusive approaches to sex, gender and sexuality education in an effort to speak back to the conservative voices which currently dominate policy spaces. This book was originally published as a special issue of Sex Education.
