This beautifully-designed book by award-winning design firm, Donovan/Green, captures Tom's timeless and new lessons in leadership for NOW. Called the "Greatest Business Book of All Time" (Bloomsbury UK), Tom and Robert Waterman's *In Search of Excellence* launched a maverick approach to management thinking in 1982. Tom's seventeen books since have been cornerstones of management lessons from business schools to boardrooms. With *Excellence Now: Extreme Humanism*, Tom sets an even higher bar given the state of our world today. Why "Extreme Humanism"? Tom will show how excellence in leadership is achieved by an obsessive focus on the growth of those you are leading. Reflecting on how to lead in current conditions, Tom says, "What you are doing right now will be the hallmark of your entire career." Fans who await Tom's next bold insights based on decades of research and on-the-ground, (e.g. Twitter - @tom_peters) steely observations, will once again find themselves immersed in a rich world of people-first wisdom. *Excellence Now: Extreme Humanism* will long serve as a business bible for both individuals and organizations-large and small. *Excellence Now* powerfully delivers the management and leadership direction for how to move forward in a world turned upside down.

Following the long tradition of the Schuler Company, the *Metal Forming Handbook* presents the scientific fundamentals of metal forming technology in a way which is both compact and easily understood. Thus, this book makes the theory and practice of this field accessible to teaching and practical implementation. The first Schuler "Metal Forming Handbook" was published in 1930. The last edition of 1966, already revised four times, was

translated into a number of languages, and met with resounding approval around the globe. Over the last 30 years, the field of forming technology has been radically changed by a number of innovations. New forming techniques and extended product design possibilities have been developed and introduced. This *Metal Forming Handbook* has been fundamentally revised to take account of these technological changes. It is both a text book and a reference work whose initial chapters are concerned to provide a survey of the fundamental processes of forming technology and press design. The book then goes on to provide an in-depth study of the major fields of sheet metal forming, cutting, hydroforming and solid forming. A large number of relevant calculations offers state of the art solutions in the field of metal forming technology. In presenting technical explanations, particular emphasis was placed on easily understandable graphic visualization. All illustrations and diagrams were compiled using a standardized system of functionally oriented color codes with a view to aiding the reader's understanding.

This book gathers papers from the 23rd International Forum on Advanced Microsystems for Automotive Applications (AMAA 2020) held online from Berlin, Germany, on May 26-27, 2020. Focusing on intelligent system solutions for auto mobility and beyond, it discusses in detail innovations and technologies enabling electrification, automation and diversification, as well as strategies for a better integration of vehicles into the networks of traffic, data and power. Further, the book addresses other relevant topics, including the role of human factors and safety issues in automated driving, solutions for shared mobility, as well as automated bus transport in rural areas. Implications of current circumstances, such as those generated by climate change, on the future development of auto mobility, are also analysed, providing researchers, practitioners and policy makers with an authoritative snapshot of the state-of-the-art, and a source of inspiration for future developments and collaborations.

Caterhams are a new take on the classic Lotus Sevens and are

found on racetracks and twisty roads around the world. Caterham Sevens is the story of a former Lotus dealer, Graham Nearn, who saw the potential of a hand-built sports car which its creator, Lotus founder Colin Chapman, was about to discard. Nearn bought manufacturing rights from Colin Chapman, and by developing ever more powerful versions for more than 30 years, turned Caterham into one of the world's most prolific and affordable sports-racing cars. Widely recognized as the standard work on the history of Caterham and its cars from the original Lotus Seven of 1957 and its Caterham derivative of 1973 to the latest Cosworth-powered Caterham CSR of 2005. This edition is updated with 64 pages of additional material. 2nd ed.

Auto Repair For Dummies, 2nd Edition (9781119543619) was previously published as Auto Repair For Dummies, 2nd Edition (9780764599026). While this version features a new Dummies cover and design, the content is the same as the prior release and should not be considered a new or updated product. The top-selling auto repair guide--400,000 copies sold--now extensively reorganized and updated Forty-eight percent of U.S. households perform at least some automobile maintenance on their own, with women now accounting for one third of this \$34 billion automotive do-it-yourself market. For new or would-be do-it-yourself

mechanics, this illustrated how-to guide has long been a must and now it's even better. A complete reorganization now puts relevant repair and maintenance information directly after each automotive system overview, making it much easier to find hands-on fix-it instructions. Author Deanna Sclar has updated systems and repair information throughout, eliminating discussions of carburetors and adding coverage of hybrid and alternative fuel vehicles. She's also revised schedules for tune-ups and oil changes, included driving tips that can save on maintenance and repair costs, and added new advice on troubleshooting problems and determining when to call in a professional mechanic. For anyone who wants to save money on car repairs and maintenance, this book is the place to start. Deanna Sclar (Long Beach, CA), an acclaimed auto repair expert and consumer advocate, has contributed to the Los Angeles Times and has been interviewed on the Today show, NBC Nightly News, and other television programs.
