*Light, Space, Surface: Art
from Southern California*
CRC Press
Examining the work of

contemporary Black
artists who are
dismantling the white
gaze and demanding that
we see--and see
Blackness in particular--
anew. In *A Black Gaze*,
Tina Campt examines
Black contemporary
artists who are shifting
the very nature of our

interactions with the
visual through their
creation and curation of a
distinctively Black gaze.
Their work--from Deana
Lawson's disarmingly
intimate portraits to
Arthur Jafa's videos of the
everyday beauty and grit
of the Black experience,
from Kahlil Joseph's films

and Dawoud Bey's photographs to the embodied and multimedia artistic practice of Okwui Okpokwasili, Simone Leigh, and Luke Willis Thompson--requires viewers to do more than simply look; it solicits visceral responses to the visualization of Black precarity. *Campt* shows that this new way of seeing shifts viewers from the passive optics of looking at to the active struggle of looking with, through, and alongside the suffering--and joy--of Black life in the present.

The artists whose work *Campt* explores challenge the fundamental disparity that defines the dominant viewing practice: the notion that Blackness is the elsewhere (or nowhere) of whiteness. These artists create images that flow, that resuscitate and revalue the historical and contemporary archive of Black life in radical ways. Writing with rigor and passion, *Campt* describes the creativity, ingenuity, cunning, and courage that is the modus operandi of a Black gaze.

Black Visual Satire Light for Visual Artists Understanding & Using Light in Art & Design
This book is an artist's guide to copyright, written for makers. Both practical and critical, it will guide you through the concepts underlying copyright and how they apply in your practice. How do you get copyright? For what work? And for how long? How does copyright move across mediums, and how can you go about integrating the work of others? Copy This

Book details the concepts of authorship and original creation that underlie our legal system, equipping the reader with the conceptual keys to participate in the debate on intellectual property today. "This sharp and useful book shines a light on the rights of all artists to protect--and share--their work. Eric Schrijver has produced an essential guide for navigating the new Commons and the old laws of copyright control." --Ellen Lupton
How to Render Gingko Press

This introduction to light for students and visual artists explores the way light can be used to create realistic and fantastical effects in a wide range of media. Divided into three parts, the clearly written text explains: the fundamental properties of natural and artificial light; how to create realistic images by observing people and the environment; the creative use of light in composition and design. Updated with revised photos and artwork, as well as 15 practical exercises and

new online video material, this second edition is an indispensable resource for animators, digital illustrators, painters, photographers, and artists working in any medium. *James Turrell: Into the Light* Delmonico Books
Physics in the Arts, Third Edition gives science enthusiasts and liberal arts students an engaging, accessible exploration of physical phenomena, particularly with regard to sound and light. This book offers an alternative route to science literacy for those

interested in the arts, music and photography. Suitable for a typical course on sound and light for non-science majors, Gilbert and Haerberli's trusted text covers the nature of sound and sound perception as well as important concepts and topics such as light and light waves, reflection and refraction, lenses, the eye and the ear, photography, color and color vision, and additive and subtractive color mixing. Additional sections cover color generating mechanisms,

periodic oscillations, simple harmonic motion, damped oscillations and resonance, vibration of strings, Fourier analysis, musical scales and musical instruments. Offers an alternative route to science literacy for those interested in the visual arts, music and photography Includes a new and unique quantitative encoding approach to color vision, additive and subtractive color mixing, a section on a simplified approach to quantitative digital photography, how the

ear-brain system works as a Fourier analyzer, and updated and expanded exercises and solutions Provides updated online instructor resources, including labs, chapter image banks, practice problems and solutions *A Commonsense View of the Visual Arts* Duke University Press Whether it glows lustroously from neon, emanates purely from LEDs or radiates with intensity from lasers, this elemental medium, light, fascinates artists and viewers alike. Lust for

Light selects works by artists who have used light as a primary or catalyzing agent in the featured pieces. Taking a dynamic approach in its curation, the book features the use of illumination in more traditional gallery forms as well as in three dimensional and large-scale installation pieces. Many of the featured artists are skilled fabricators who have been honing their light-inspired works for years, while others have made stunning pieces through

collaborations and daring forays, cross-pollinating their artistic visions with new technologies in the process. Featured artists include Yayoi Kusama, Ivan Navarro, Jennifer Steinkamp, Laddie John Dill, Joanie Lemercier, Massimo Uberti, Barry Underwood, Miguel Chevalier, James Clar, Liz West and more.

A Guide for the Realist Painter Laurence King Publishing

Light is as important as colour in creating the right effect, whether on a palette or on a computer.

Whether you're an animator, painter, photographer or illustrator, you need to know how to harness light in your work to create the right effect. Light for Visual Artists is the first and only book that explores the way light can be used to create realistic and fantastical effects in a wide range of media. Illustrator Richard Yot, known for his work in film as a lighting artist and stylised 3D illustrations, takes you through the fundamental properties of natural and artificial light,

shadows, the interaction of light on different types of surfaces, reflections, as well as transparency, translucency and the effects of light on colour. Richard also explores how to observe the effects of light to create realistic images, and the creative use of light in composition and design for creating moods or setting a scene. This second edition has been updated with revised photos and artwork, as well as 15 practical exercises and new online video material. Packed with diagrams and

illustrations, as well as computer game and film stills, *Light for Visual Artists* is an invaluable resource for animators, digital illustrators, painters, photographers and artists working in any medium.

Shine Springer Nature *Lighting for Animation* is designed with one goal in mind - to make you a better artist. Over the course of the book, Jasmine Katatikarn and Michael Tanzillo (Senior Lighting TDs, Blue Sky Studios) will train your eye to analyze your work

more critically, and teach you approaches and techniques to improve your craft. Focusing on the main philosophies and core concepts utilized by industry professionals, this book builds the foundation for a successful career as a lighting artist in visual effects and computer animation. Inside you'll find in-depth instruction on:

- Creating mood and storytelling through lighting
- Using light to create visual shaping
- Directing the viewer's eye with light and color

Gathering and utilizing reference images • Successfully lighting and rendering workflows • Render layers and how they can be used most effectively • Specific lighting scenarios, including character lighting, environment lighting, and lighting an animated sequence • Material properties and their work with lighting • Compositing techniques essential for a lighter • A guide on how to start your career and achieve success as a lighting artist This book is not designed

to teach software packages—there are websites, instructional manuals, online demos, and traditional courses available to teach you how to operate specific computer programs. That type of training will teach you how to create an image; this book will teach you the technical skills you need to make that image beautiful. Key Features Stunning examples from a variety of films serve to inspire and inform your creative choices. Unique approach focuses on using lighting

as a storytelling tool, rather than just telling you which buttons to press. Comprehensive companion website contains lighting exercises, assets, challenges, and further resources to help you expand your skillset. Painting the Light Routledge Art interprets the visible world. Physics charts its unseen workings. The two realms seem completely opposed. But consider that both strive to reveal truths for which there are no words—with physicists

using the language of mathematics and artists using visual images. In *Art & Physics*, Leonard Shlain tracks their breakthroughs side by side throughout history to reveal an astonishing correlation of visions. From the classical Greek sculptors to Andy Warhol and Jasper Johns, and from Aristotle to Einstein, artists have foreshadowed the discoveries of scientists, such as when Monet and Cezanne intuited the coming upheaval in physics that Einstein would initiate. In this

lively and colorful narrative, Leonard Shlain explores how artistic breakthroughs could have prefigured the visionary insights of physicists on so many occasions throughout history. Provocative and original, *Art & Physics* is a seamless integration of the romance of art and the drama of science--and an exhilarating history of ideas.

The Uncanny Power of Dehumanization

Harvard University Press
Shares tips and

techniques on creating a realistic picture of aliens and creatures, places, and machines.

Physics and the Visual Arts William Morrow
Paperbacks

Anyone who can hold a pencil can learn to draw. In this book, Bert Dodson shares his complete drawing system—fifty-five "keys" that you can use to render any subject with confidence, even if you're a beginner. These keys, along with dozens of practice exercises, will help you draw like an artist in no time. You'll

learn how to: • Restore, focus, map, and intensify
 • Free your hand action, then learn to control it • Convey the illusions of light, depth, and texture • Stimulate your imagination through "creative play"
Processing for Visual Artists HarperCollins
 Explains how the human brain interprets the visual world around us, as well as the subject of visually communicating the form of an object in easy to understand lessons through the use of drawings, photography,

and more.
The Visual Economy of Light in African Diasporic Aesthetic Practice Walter Foster Pub
 A leading scholar explores what it means to dehumanize others—and how and why we do it. "I wouldn't have accepted that they were human beings. You would see an infant who's just learning to smile, and it smiles at you, but you still kill it." So a Hutu man explained to an incredulous researcher, when asked to recall how he felt slaughtering Tutsis in

Rwanda in 1994. Such statements are shocking, yet we recognize them; we hear their echoes in accounts of genocides, massacres, and pogroms throughout history. How do some people come to believe that their enemies are monsters, and therefore easy to kill? In *Making Monsters* David Livingstone Smith offers a poignant meditation on the philosophical and psychological roots of dehumanization. Drawing on harrowing accounts of lynchings, Smith establishes what

dehumanization is and what it isn't. When we dehumanize our enemy, we hold two incongruous beliefs at the same time: we believe our enemy is at once subhuman and fully human. To call someone a monster, then, is not merely a resort to metaphor—dehumanization really does happen in our minds. Turning to an abundance of historical examples, Smith explores the relationship between dehumanization and racism, the psychology of hierarchy, what it means to regard others as

human beings, and why dehumanizing others transforms them into something so terrifying that they must be destroyed. Meticulous but highly readable, *Making Monsters* suggests that the process of dehumanization is deeply seated in our psychology. It is precisely because we are all human that we are vulnerable to the manipulations of those trading in the politics of demonization and violence.

Illuminated Works

Bloomsbury Publishing

Drawing on unique multi-arts, multi-city scholarly research, *Understanding Audiences for the Contemporary Arts* makes a timely and urgent contribution to debates about the place of arts and culture in contemporary society. The authors critically interrogate the challenges of access, diversity, privilege and responsibility in contemporary art. Asking who benefits from, pays for and consumes the arts, the book highlights fresh, forward-thinking

audience and organisational attitudes that show the potential of live arts engagement to contribute to engaged citizenship.

Complemented by comparative global analysis, the cutting-edge insights in this book are relevant for interdisciplinary researchers across audience studies and beyond. Enhanced by a new framework for the understanding audience engagement, the book is relevant to scholars, policymakers and

reflective practitioners across the spectrum of arts and cultural industries management. Chapter 7 of this book is freely available as a downloadable Open Access PDF under a CC BY-NC-ND 4.0 license [here](#).

[Understanding the Visual](#)

[Arts](#) G.P. Putnam's Sons Books for Young Readers

How the perception of shadows, studied by vision scientists and visual artists, reveals the inner workings of the visual system. In *The Visual World of Shadows*,

Roberto Casati and Patrick Cavanagh examine how the perception of shadows, as studied by vision scientists and visual artists, reveals the inner workings of the visual system. Shadows are at once a massive problem for vision—which must distinguish them from objects or material features of objects—and a resource, signaling the presence, location, shape, and size of objects. Casati and Cavanagh draw up an inventory of information retrievable from shadows, showing their amazing

variety. They present an overview of the visual system, distinguishing between measurement and inference. They discuss the shadow mission, the work done by the visual brain to parse, and perhaps discard, the information from shadows; shadow ownership, the association of a shadow with the object that casts it; shadow labeling, the visual system's ability to tell shadows from nonshadows; and the shadow concept, our knowledge about shadows

as a category. Casati and Cavanagh then apply the theoretical apparatus they have developed for shadows to other phenomena: illumination, reflection, and transparency. Finally, they examine the art of the shadow, paying tribute to artists' exploration of shadow, analyzing a series of artworks (reproduced in color) from a rich and fascinating art historical corpus.

Understanding and Using Light in Art & Design
American Foundation for

the Blind
Life Drawing for Artists teaches a contemporary approach to figure drawing that includes both the familiar poses—standing, sitting, lying down—but also how to capture figures in movement and in more dynamic and engaging positions. Author Chris Legaspi is a dedicated, life-long artist and admired instructor who is known for his dynamic figurative drawings and paintings, and as a successful illustrator in the entertainment

industry. Whether you are an aspiring illustrator, art student, or a professional artist looking to develop your abilities, *Life Drawing for Artists* shows how to build your skills by combining fundamental building blocks, such as gesture lines, shape and design, structure, value control, and edge or line control. You'll focus on different skills while working on both quick timed drawings and longer detailed drawings. The book covers important topics, such as drawing different views,

understanding perspective, foreshortening strategies, and how to deal with various lighting conditions. The examples and tutorials explore virtually every pose scenario, as well as many active and dynamic movements. Breathe drama into your figures as you master the fundamentals with this fresh approach to life drawing. The *For Artists* series expertly guides and instructs artists at all skill levels who want to develop their classical

drawing and painting skills and create realistic and representational art. **Art & Physics** Rockport Publishers
"Published in conjunction with the touring exhibition, *Light, Space, Surface*. Itinerary: Addison Gallery of American Art, Phillips Academy October 2, 2021-January 30, 2022
Frist Art Museum June 3, 2022-September 6, 2022"--
To Be An Artist Yale University Press
In her first picture book since the bestselling and award-winning *Firebird*,

Misty Copeland tells the story of a young Misty discovering her love for dance through the ballet of Coppelia. On her first day of class Misty is absolutely captivated by the narrative of the story and entranced by the dance. Nervous, yet excited, Misty decides to audition for one of the lead roles. As she prepares for the audition and, eventually, the performance, Misty learns to lean on her newfound friends for inspiration and rely on her own can-do spirit to dance her very

best. Featuring themes of teamwork, friendship, dedication, and hard work, children everywhere will be inspired to reach for their dreams in Misty's exciting new picture book series, Bunheads.

A Visual Guide to Classical Art Theory for Drawing and Painting Students
Andrews McMeel Publishing

Light is as important as colour in creating the right effect, whether on a palette or on a computer. Whether you're an animator, painter, photographer or

illustrator, you need to know how to harness light in your work to create the right effect. Light for Visual Artists is the first and only book that explores the way light can be used to create realistic and fantastical effects in a wide range of media.

Allie Victoria Tennant and the Visual Arts in Dallas
Andrews McMeel Publishing

This book provides original grounds for integrating the bodily, somatic senses into our understanding of how we make and engage with

visual art. Rosalyn Driscoll, a visual artist who spent years making tactile, haptic sculpture, shows how touch can deepen what we know through seeing, and even serve as a genuine alternative to sight. Driscoll explores the basic elements of the somatic senses, investigating the differences between touch and sight, the reciprocal nature of touch, and the centrality of motion and emotion. Awareness of the somatic senses offers rich aesthetic and perceptual possibilities for

art making and appreciation, which will be of use for students of fine art, museum studies, art history and sensory studies.

Who Says That's Art?

Penguin

From the critically acclaimed author of *Monticello* and *The Widow's War* comes a vividly rendered historical novel of love, loss, and reinvention, set on Martha's Vineyard at the end of the nineteenth century. *Martha's Vineyard*, 1898. In her first life, Ida Russell had

been a painter. Five years ago, she had confidently walked the halls of Boston's renowned Museum School, enrolling in art courses that were once deemed "unthinkable" for women to take, and showing a budding talent for watercolors. But no more. Ida Russell is now Ida Pease, resident of a seaside farm on Vineyard Haven, and wife to Ezra, a once-charming man who has become an inattentive and altogether unreliable husband. Ezra runs a salvage company

in town with his business partner, Mose Barstow, but he much prefers their nightly card games at the local pub to his work in their Boston office, not to mention filling haystacks and tending sheep on the farm at home—duties that have fallen to Ida and their part-time farmhand, Lem. Ida, meanwhile, has left her love for painting behind. It comes as no surprise to Ida when Ezra is hours late for a

Thanksgiving dinner, only to leave abruptly for another supposedly urgent business trip to Boston. But then something unthinkable happens: a storm strikes and the ship carrying Ezra and Mose sinks. In the wake of this shocking tragedy, Ida must settle the affairs of Ezra's estate, a task that brings her to a familiar face from her past—Henry Barstow, Mose's brother and executor. As she joins

Henry in sifting through the remnants of her husband's life and work, Ida must learn to separate truth from lies and what matters from what doesn't. Captured in rich, painterly prose—piercing as a coastal gale and shimmering as sunlight on the waves—*Painting the Light* is an arresting portrait of a woman, and a considered meditation on grief, persistence, and reinvention.
