Converting California Lerner Classroom

This book is a compelling and balanced history of the California missions and their impact on the Indians they tried to convert. Focusing primarily on the religious conflict between the two groups, it sheds new light on the tensions, accomplishments, and limitations of the California mission experience. James A. Sandos, an eminent authority on the American West, traces the history of the Franciscan missions from the creation of the first one in 1769 until they were turned over to the public in 1836. Addressing such topics as the singular theology of the missions, the role of music in bonding Indians to Franciscan enterprises, the diseases caused by contact with the missions, and the Indian resistance to missionary activity, Sandos not only describes what happened in the California missions but offers a persuasive explanation for why it happened.

San Francisco Bay Area Missions Gallopade International

The story of the missions is a compelling human drama that is a vital piece not only of California history, but also of American history. Indeed, many keys to California's past lie in the stories of the 20 missions that stretch along the state's west coast from San Diego to San Francisco. This vital series is compatible with the mission-based curriculum used in fourth-grade California classrooms. It resonates equally with all social studies programs that explore the defunct notion of colonialism and its controversial role in the history of the United States, and with curricula that seek to explore the

interaction of different cultures and the rights and voices of indigenous peoples.

The California Missions Capstone

On the afternoon of September 14, 1786, two French ships appeared off the coast of Monterey, the first foreign vessels to visit Spain's California colonies. Aboard was a party of eminent scientists, navigators, cartographers, illustrators, and physicians. For the next ten days the commander of this expedition, Jean François de La Pérouse, took detailed notes on the life and character of the area: its abundant wildlife, the labors of soldiers and monks, and the customs of Indians recently drawn into the mission. These observations provide a startling portrait of California two centuries ago.

Life in a California Mission University of Arizona Press

The missions and presidios of California are among the state's oldest structures and are the most visited historical monuments. These notable buildings are an integral part of California's history. The state's recorded history essentially began with the Spanish missions along the ambitious chain of 21 missions on El Camino Real (The Royal Highway) and the men who founded them. *California Missions and Presidios* is a gorgeous book that presents the history of these intriguing sanctuaries of peace and beauty. The eye-popping photography of Alastair Worden and Randy Leffingwell captures their unique character, while Leffingwell's accessible text brings to life the overall history of California's conquest by the Spanish; the construction and operation of the missions, presidios, ranchos, and adobes; and the background of the mission architecture and style. Seemingly unchanged, these missions and presidios have survived the centuries remarkably well—still welcoming visitors as a refuge of serenity and splendor while providing a glimpse into the lives of the spirited pioneers who built these structures and lived and worked there.
