CABRERA BAKER

Syria's Humanitarian Crisis Springer Nature

This volume explores the complex interrelation between risk, identity and conflict and focuses specifically on ethnicity, culture, religion and gender as modes of identity that are often associated with conflict in the contemporary world. It draws on theoretical perspectives as well as pays special attention to analysis of diverse case studies from Africa, Middle East, Europe, East and Southeast Asia and Latin America. Using various analytical tools and methodologies, it provides unique narratives of local and regional social risk factors and security complexities. The relationship between risk and security is multidimensional and perpetually changing, and lends itself to multiple interpretations. This publication provides a new ground for theoretical and policy debates to unlock innovative understanding of risk through analyses of identity as a significant factor in conflict in the world today. At the same time, it explores ways to address such conflicts in a more people-centered, empowering and sustainable way.

Critical Caribbean Perspectives on Preventing Gender-Based Violence

Elsevier Health Sciences

Taking an anthropological perspective, this comprehensive book offers a highly readable and concise overview of what constitutes gender violence, its social context, and important directions in intervention and reform. Uses stories, personal accounts, case studies and a global perspective to provide a vivid and engaging portrait of forms of violence in

gendered relationships Extensively covers many forms of gender violence including domestic violence, rape, murder, wartime sexual assault, prison and police violence, female genital cutting, dowry murders, female infanticide, "honor" killings, and sex trafficking Examines major approaches to diminishing gender violence such as criminalization, batterer retraining programs, and human rights interventions Highlights the role of social movements in defining the problem and mobilizing reforms in the US and internationally

Reproductive Health & Rights Elsevier Health Sciences

This book builds on work that examines the interactions between immigration and gender-based violence, to explore how both the justification and condemnation of violence in the name of religion further complicates our societal relationships. Violence has been described as a universal challenge that is rooted in the social formation process. As humans seek to exert power on the other, conflict occurs. Gender based violence, immigration, and religious values have often intersected where patriarchy-based power is exerted on the other. An international panel of contributors take a multidisciplinary approach to investigating three central themes. Firstly, the intersection between religion, immigration, domestic violence, and human rights. Secondly, the possibility of collaboration between various social units for the protection of immigrants' human rights. Finally, the need to integrate faith-based initiatives and religious leaders into efforts to transform attitude formation and general social behavior. This is a wide-ranging and multi-layered examination of the role of religion in gender-based violence

and immigration. As such, it will be of keen interest to academics working in religious studies, gender studies, politics, and ethics.

Global Responses, Local Practices

African Books Collective

Featuring analysis of healthcare issues and first-person stories, *Policy & Politics in Nursing and Health Care* helps you develop skills in influencing policy in today's changing health care environment. 145 expert contributors present a wide range of topics in policies and politics, providing a more complete background than can be found in any other policy textbook on the market. Discussions include the latest updates on conflict management, health economics, lobbying, the use of media, and working with communities for change. The revised reprint includes a new appendix with coverage of the new Affordable Care Act. With these insights and strategies, you'll be prepared to play a leadership role in the four spheres in which nurses are politically active: the workplace, government, professional organizations, and the community. Up-to-date coverage on the Affordable Care Act in an Appendix new to the revised reprint. Comprehensive coverage of healthcare policies and politics provides a broader understanding of nursing leadership and political activism, as well as complex business and financial issues. Expert authors make up a virtual Nursing Who's Who in healthcare policy, sharing information and personal perspectives gained in the crafting of healthcare policy. Taking Action essays include personal accounts of how nurses have participated in politics and what they have accomplished. Winner of several American Journal of Nursing "Book of the Year" awards! A new Appendix on the Affordable Care Act, its

implementation as of mid-2013, and the implications for nursing, is included in the revised reprint. 18 new chapters ensure that you have the most up-to-date information on policy and politics. The latest information and perspectives are provided by nursing leaders who influenced health care reform with the Patient Protection and Affordable Care Act of 2010.

Lessons from Efforts Worldwide Taylor & Francis

The United States has uncritically exported its law and policy on gender violence without regard to effectiveness or cultural context, and without asking what we might learn from efforts to combat gender violence in the rest of the world. This book asks that question. *Comparative Perspectives on Gender Violence: Lessons From Efforts Worldwide* documents the global scope of gender violence, from countries where the legal response is just emerging to countries with longstanding law and policy regimes. Informed by international human rights law, *Comparative Perspectives on Gender Violence* examines policy successes and failures and grassroots efforts to elicit a robust and proactive response from China to Chile. From the work of local activists to stem the tide of sexual and intimate partner violence after the Haitian earthquake of 2005, to the efforts to eradicate dowry-related violence in India, to the public education campaigns to prevent domestic violence in Scotland, *Comparative Perspectives on Gender Violence* offers a comprehensive vision of efforts around the world to eradicate gender based violence. Featuring the work of leading gender violence academics and activists around the world, *Comparative Perspectives on Gender Violence* provides a new lens

through which to consider U.S. efforts to address gender violence.

Gender, Violence and the State in Asia Routledge

This book explores the widespread problem of gender-based violence in the Anglophone Caribbean, exploring reasons for its perpetuation, and proposing viable policy and programming solutions to prevent it. Drawing on the work of a multidisciplinary team of Caribbean researchers and practitioners, the book explores the ways in which violence victimisation and perpetration have been socially and institutionally shaped, and supported by fixed gender codes. Key themes in the book include the institutional frameworks and structural inequalities that perpetuate gender-based violence, the role of the church both in perpetuating the problem and its potential to combat it, the role of law, access to justice, and governmental and non-governmental responses to gender-based violence. The book covers violence against women, but also explores women as perpetrators, men and boys as victims, and gender-based violence against young persons. It also demonstrates the ways in which gender-based violence can further marginalise already marginalised groups, such as members of the LGBTQ+ community, or persons with disabilities. Bridging the divide between academia, government and civil society, this book challenges the normalisation of gender-based violence in the Anglophone Caribbean and proposes viable, culturally relevant solutions for prevention. It will be of interest to researchers and practitioners working on issues related to gender, the Caribbean, global development, criminology and human rights.

Gender Violence, Third Edition Red Cross

Red Crescent

Global Health Watch, now in its fourth edition, is widely perceived as the definitive voice for an alternative discourse on health and healthcare. It covers a range of issues that currently impact on health, including the present political and economic architecture in a fast-changing and globalized world; a political assessment of the drive towards Universal Health Coverage; broader determinants of health, such as gender-based violence and access to water; stories of struggles, actions and change; and a scrutiny of a range of global institutions and processes. It integrates rigorous analysis, alternative proposals and stories of struggle and change to present a compelling case for a radical transformation of the way we approach actions and policies on health.

Risks, Identity and Conflict Berghahn Books

An updated edition of the groundbreaking anthology that explores the proliferation of gendered violence From Harvey Weinstein to Brett Kavanaugh, accusations of gender violence saturate today's headlines. In this fully revised edition of Gender Violence, Laura L. O'Toole, Jessica R. Schiffman, and Rosemary Sullivan bring together a new, interdisciplinary group of scholars, with up-to-date material on emerging issues like workplace harassment, transgender violence, intersectionality, and the #MeToo movement. Contributors provide a fresh, informed perspective on gender violence, in all of its various forms. With twenty-nine new contributors, and twelve original essays, the third edition now includes emerging contemporary issues such as LGBTQ violence, sex work, and toxic masculinity. A trailblazing text, Gender Violence, Third

Edition is an essential read for students, activists, and others.

Gender, Violence, and Justice

PUBLICACIONS UNIVERSITAT ROVIRA I VIRGILI

Applying Anthropology to Gender-Based Violence: Global Responses, Local Practices addresses the gaps in theory, methods, and practices that are currently used to engage the problem of gender-based violence. This book complements the work carried out in the legal, social work, and medical fields by demonstrating how a focus on local issues and local responses can better inform a collaborative global response to the problem of gender-based violence. With chapters covering Africa, Asia, Latin and North America, and Oceania, it provides ample evidence that richly textured and qualitatively informed research can illuminate work that is more quantitative in scope. The volume illustrates the various ways scholars, practitioners, frontline workers, and policy makers can work together to end forms of violence in their local communities. The chapters in this volume demonstrate that the ways top-down responses to violence have been inadequate, and that solutions are available when the local historical, political, and social context is taken into consideration. *Applying Anthropology to Gender-Based Violence* contains useful insights that, when combined with the efforts of other disciplines, offer solutions to the problem of gender-based violence.

Women in African Refugee Camps: Gender Based Violence against Female Refugees: The case of Mai Ayni Refugee Camp, Northern Ethiopia Rutgers University Press

Kathmandu on 11th July 2003.

Principles and Practice for Public Health and Healthcare Practitioners Lexington Books

Gender-based violence is a multi-faceted public health problem with numerous consequences for an individual's physical and mental health and wellbeing. This collection develops a comprehensive public health approach for working with gender-based violence, paying specific attention to international budgets, policies and practice and drawing on a wide selection of empirical studies. Divided into two parts, the text looks at how public health budgets and policies can be used to influence a range of risk factors and outcomes, and then outlines a theoretical and conceptual framework. The second section draws on empirical studies to illustrate ways of managing the risks and impacts of, and responses to, the problem. It concludes by summarising those risk factors that can be effectively addressed through appropriately budgeted public health programmes globally. Highlighting ways of bolstering protective and resilience factors and identifying early interventions, it demonstrates the importance of inter-agency interventions through coordinated effort from a wide range of sectors including social services, education, religious organisations, judiciary, police, media and business. This inter-disciplinary volume will interest students and researchers working on gender-based violence, gender budgeting and public health policy from a range of backgrounds, including public health, sociology, social work, public policy, gender studies, development studies and economics.

Applying Anthropology to Gender-Based Violence Springer

The study has found that female refugees in refugee camps are exposed to sexual violence, physical violence and socio-economic violence including attempted rape, rape, gang rape, physical injuries, discrimination and stigmatization and denial of access to services. The book also discloses that male refugees and intimate partners of female refugees are the prime gender based violence perpetrators of female refugees in Mai Ayni refugee camp. Moreover, the study reveals that idleness, economic dependency, physical insecurity, lack of awareness, collapse of social and family structure as well as poor reporting, coordination and legal enforcement mechanisms are identified as causes/risk factors for gender based violence against female refugees in refugee camps. Moreover, men's feelings of 'loss of power' in the camp, which challenge male identity as superior to female, lead male refugees to anger and make female refugees vulnerable to different forms of gender based violence. Consequently, because of gender based violence, female refugees in refugee camps have to fear short and long lasting damaging consequences on their lives in terms of health, both physical and psycho-social. *Obstetrics and Gynecology in Low-Resource Settings* Elsevier Health Sciences

Providing nuanced accounts of how the social identities of men and women, the context of displacement and the experience or manifestation of violence interact, this collection offers conceptual analyses and in-depth case studies to illustrate how gender relations are affected by displacement, encampment and return. The essays show how these factors lead to various forms of direct, indirect and structural violence. This

ranges from discussions of norms reflected in policy documents and practise, the relationship between relief structures and living conditions in camps, to forced military recruitment and forced return, and covers countries in Africa, Asia and Europe.

An Alternative World Health Report
Springer

This book offers new perspectives on gender-based violence in three regions where the subject has been taboo in everyday discourse often due to patriarchal cultural norms that limit women's autonomy. The contributions to this book provide rare insight into not only the levels and the socio-demographic determinants of domestic violence, but topics ranging from men's attitudes toward wife beating; domestic violence-related adolescent deaths, and women's health problems due to sexual and physical abuse. With a comprehensive introduction that provides a comparative international research framework for discussing gender-based violence in these three unique regions, this volume provides a key basis for understanding gender-based violence on a more global level. Part I, on Africa, covers men's attitudes towards domestic violence, the impact of poverty and fertility, the association between adolescent deaths and domestic violence, and the link between domestic abuse and HIV. Part II, on the Middle East, covers the importance of consanguinity on domestic violence in Egypt and Jordan, the effects of physical abuse on reproductive health, and the link between political unrests and women's experience and attitudes towards domestic violence. Part III, on India, shows how sexual abuse puts women at risk of reproductive tract infections and sexually transmitted

infections, as well as the role of gender norms in wife abuse and the role of youth aggressive behavior in nonconsensual sex. With such a deep and broad coverage of factors of intimate partner abuse, this book serves as a reference document for researchers, decision-makers, and organizations that are searching for ways to reduce gender-based domestic violence. This book is of interest for researchers in Criminology and Criminal Justice, as well as Sociology, Social Work, Public Health and Human Rights.

Terrors of Injustice John Wiley & Sons
 Gender-based Violence and Public Health
 International perspectives on budgets and policies
 Routledge
Sexual and Gender-Based Violence
 Routledge

This book is an accessible guide to caring for survivors of sexual and gender-based violence (SGBV). Sexual violence is broadly defined in order to include sexual assault, but also often forgotten subjects such as female genital cutting, sex trafficking, and military sexual violence. The average practitioner, gynecologist or otherwise, will undoubtedly encounter a victim of some sexual violence during their time in practice and this guide is designed to answer all questions on how to approach, treat, and understand a survivor of sexual violence. Written by a multidisciplinary team of medical, psychological, and legal experts, the book is organized into four sections. The first section begins with a scholarly analysis of trauma and how to discuss that trauma with patients. The second section covers types of violence and populations at risk, including intimate partner violence, sex trafficking, and LGBTQ considerations. The third section provides critical focus on the

examination procedure, providing strategies for speaking to survivors and conducting a sensitive medical examination. Within each of these chapters, the reader will find experts sharing their tips, best practices, and understandings of exactly how trauma affects care. The final section covers medicolegal legal issues, providing a basic introduction to general legal processes regarding sexual violence matters in the US in order to serve as a resource for any practitioner presented with legal questions by a patient. This book gives a comprehensive overview of clinical care for survivors of SGBV. The clinical focus of this book goes beyond emergency room and crisis intervention protocol described in other books and makes it an ideal guide for all general health practitioners treating this population.

Searching for Normal in the Wake of the Liberian War Springer

In this publication the preliminary results are presented of the European Epogender project "Gender violence: protocols for the protection of victims and effectiveness of protection orders. Towards and efficient implementation of Directive 2011/99/EU", carried out under the Daphne III Programme (2007-2013) of the European Union. The handbook focuses on the analysis of the national legislation of the EU Member States regarding protection measures for the victims of gender violence, as well as the issues that may arise in applying the European protection order.

Protection of the Gender-Based Violence Victims in the European Union Zed Books Ltd.

Gender-based violence is a global phenomenon which affects millions worldwide. However, despite the increasing attention which is now paid to this violence by policy makers data

seem to indicate that these efforts are not having as great an impact as may have been hoped. In all countries of the world, reports of gender-related violence remain elevated, whilst many incidents of such violence probably remain unreported due to fear of stigma or reprisals for those who are victims. One of the problems in tackling gender-based violence has been that for too long men have been ignored as part of the solution. Men are often labelled as perpetrators of violence, but they are perhaps too infrequently considered also

as potential victims, or as partners and actors in the fight against violence. Constructions of masculinities are not adequately studied to analyse how dominant forms of masculinities may contribute to cycles of violence, and may also oppress and traumatise men themselves. This volume aims to address critically the issues of men, masculinity and gender-based violence, asking how men can be fully engaged in the prevention of gender-based violence, and how this engagement can strengthen prevention initiatives.
