As the American election
administration landscape
changes as a result of
major court cases,
national and state
legislation, changes in
professionalism, and the
evolution of equipment

and security, so must the
work of on-the-ground
practitioners change. This
Open Access title
presents a series of case
studies designed to
highlight practical
responses to these
changes from the
national, state, and local
levels. This book is
designed to be a
companion piece to The
Future of Election
Administration, which
surveys these critical
dimensions of elections
from the perspectives of
the most forward-thinking
practitioner, policy,
advocacy, and research
experts and leaders in
these areas today.
Drawing upon principles
of professionalism and the
practical work that is
required to administer
elections as part of the
complex systems, this
book lifts up the voices
and experiences of
practitioners from around
the country to describe,
analyze, and anticipate
the key areas of election
administration systems on
which students,
researchers, advocates,
policy makers, and
practitioners should focus.
Together, these books
add to the emerging body
of literature that is part of

the election sciences
community with an
emphasis on the practical
aspects of administration.

The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is

possible, and define the nature of the relationship between you and your clients, colleagues and the courts.

International Commerce

The 21st Century Truck Partnership (21CTP), a cooperative research and development partnership formed by four federal agencies with 15 industrial partners, was launched in the year 2000 with high hopes that it would dramatically advance the technologies used in trucks and buses, yielding a cleaner, safer, more efficient generation of vehicles. Review of the 21st Century Truck Partnership critically examines and comments on the overall adequacy and balance of the 21CTP. The book reviews how well the program has accomplished its goals, evaluates progress in the program, and makes recommendations to improve the likelihood of the Partnership meeting its goals. Key recommendations of the book include that the 21CTP should be continued, but the future program should be revised and better balanced. A clearer goal setting strategy should be developed, and the goals should be clearly stated in measurable engineering

terms and reviewed periodically so as to be based on the available funds.
