The first guide to truly holistic health and fitness for those in their 40s From Tom Brady to Serena Williams, Tiger Woods and Roger Federer athletes are increasingly peaking later in their careers. Let Dr Marc Bubbs be

your personal trainer in this accessible guide— aimed exclusively at those in their 40s. Create a customized program that works for YOU—from diet, to sleep, type of training and mindset, this book has all the tools you need. Peak 40 is for anyone wanting to rediscover the best version of themselves coming into their 40s. Author Dr Marc Bubbs is a performance nutritionist with a portfolio of professional

and Olympic athletes - but he is also the dad of three girls, all under 7! Dr. Bubbs is here with you, in the eye of the mid-life storm, and he has created the ultimate book to help you through it. For fans of Joe Wicks and Michael Mosley, Dr. Bubbs offers simple, evidence-based and time-efficient strategies to help you reignite your energy and passion. His realistic, grown-up and non-judgemental

approach is to explain the effect some food groups and lack of exercise and sleep have on our body. The information presented is easy to digest and he offers advice that can be tailored to your body and personality type. In his expert opinion, small changes such as 'not eating after 8pm for five out of seven days' can have a big impact on weight loss and positive mood. Rather than eliminating

certain food groups like fats and carbohydrates, he looks at 'turning the dial' on them depending on individual needs. If life has become too sedentary, he provides ways to increase suppleness so that you can start to reintroduce movement into your life without causing pain. Guiding us through the myriad of confusion lifestyle messages, Dr. Bubbs teaches us: How to increase

<p>flexibility How to train with achy joints, knees, back, shoulders... Whether a plant-based diet is right How to maintain bone health Whether to lift weights Who should do HIIT (and who shouldn't) The importance of glucose control in your diet Advice on dealing with anxiety and low mood How to set realistic expectations "[Bubbs] dives into the nutrition and science—where it's been and where it's heading."—Za</p>	<p>ck Bitter, world record-holding ultra-marathoner, as heard on "The Joe Rogan Experience" "Dr. Bubbs's advice on nutrition, health, and recovery for peak performance has been a game changer!"—Kevin Pangos, point guard, Barcelona FC Basketball <i>An Illustrated History</i> Springer Science &amp; Business Media Earthquakes affecting urban areas can lead to</p>	<p>catastrophic situations and hazard mitigation requires preparatory measures at all levels. Structural assessment is the diagnosis of the seismic health of buildings. Assessment is the prelude to decisions about rehabilitation or even demolition. The scale of the problem in dense urban settings brings about a need for macro seismic appraisal procedures because large numbers of</p>

existing buildings do not conform to the increased requirements of new earthquake codes and specifications or have other deficiencies. It is the vulnerable buildings - liable to cause damage and loss of life - that need immediate attention and urgent appraisal in order to decide if structural rehabilitation and upgrading are feasible. Current economic, efficient and occupant-

friendly rehabilitation techniques vary widely and include the application either of precast concrete panels or layers, strips and patches of fiber reinforced polymers (FRP) in strategic locations. The papers in this book, many by renowned authorities in earthquake engineering, chart new and vital directions of research and application in the assessment

and rehabilitation of buildings in seismic regions. While several papers discuss the probabilistic prediction and quantification of structural damage, others present approaches related with the in-situ and occupant friendly upgrading of buildings and propose both economical and practical techniques to address the problem. *Historic Gainesville & Hall County* BSI British Standards Institution
