supplemental reference for courses in applied mathematics. Its core chapters are devoted to linear algebra, calculus, and ordinary differential equations. Additional topics include partial differential equations and approximation methods. Each chapter features a selection of solved problems. 1992 edition. Advanced Mathematics for Engineers and Scientists Since 2008 this mathematics lecture is offered for the master courses computer science, mechatronics and electrical engineering. After a repetition of basic linear algebra, computer algebra and calculus, we will treat numerical calculus, statistics and function approximation, which are the most important mathematics basic topics for engineers. Advanced Mathematics for Engineers - Startseite Advanced Engineering Mathematics (required), Erwin Kreyszig, Wiley, 1998.
