Thin Film Magnetoresistive Sensor Market Report by COVID ... Abstract. The review considered the state-of-the-art in the development of devices for detection of the agents of disease on the basis of the Lab on a chip (LOC) biosensors whose detecting element is a matrix of thin-film anisotropic magnetoresistive (AMR), magnetoresistive (GMR), or spin-tunnel magnetoresistive (STMR) magnetic field sensors based on the multi-chip planar technology. Biosensors based on the thin-film magnetoresistive sensors

...Development of soft magnetic thin film with the highest B_s value, 24 kG Thin films with much higher B_s are desired for write-core materials to achieve ultra-high density magnetic recording. The highest B_s materials among ferromagnetic alloys are Co_xFe_y alloys of composition $x = 30-40$ and $y = 60-70$ [10], with a B_s value of 24 kG. "Thin Film Magnetoresistive Sensor Market 2020: Latest Analysis" Chicago, United States:- The report titled Global Thin Film Magnetoresistive Sensor Market is one of the most comprehensive and important additions to Report Hive Research's archive of market research studies. It offers detailed research and analysis of key aspects of the global Thin Film Magnetoresistive Sensor market. Trending now: Covid-19 impact on Thin Film ... Giant magnetoresistance (GMR) is a quantum mechanical magnetoresistance effect observed in multilayers composed of alternating ferromagnetic and non-magnetic conductive layers. The 2007 Nobel Prize in Physics was awarded to Albert Fert and Peter Grünberg for the discovery of GMR.. The effect is observed
