Noble and contemporary themes such as autonomy models and fundamental rights are thoroughly approached, with a multilayered analysis encompassing both Western and Chinese views, and an extensive comparative law *acquis* is also brought forward. Furthermore, relevant issues on international law, criminal law, and historical and comparative evolutions and interactions of different legal systems are laid down in this panoramic, yet comprehensive book. One cannot but underline the presence, in the many approaches and comments, of a certain aura of a modern Kantian cosmopolitanism revisitation throughout the work, especially when dealing with the cardinal principle of «One Country, Two Systems», which enabled a peaceful and integral reunification *ex vi* international law – the Joint Declarations – that ended an external and distant control.
