 "Audin plays with codes, numbers and dates to create a fascinating and unsettling story."—Le Temps This debut novel by mathematician and Oulipo member Michèle Audin retraces the lives of French mathematicians over several generations through World Wars I and II. The narrative oscillates stylistically from chapter to chapter—at times a novel, fable, historical research, or a diary—locking and unlocking codes, culminating in a captivating, original reading experience. Michèle Audin is the author of several works of mathematical theory and history and also published a work on her anticolonialist father's torture, disappearance, and execution by the French during the Battle of Algiers.

 Snoopy and Charlie Brown, Calvin and Hobbes, Tintin and Snowy? comics are home to many memorable child and animal figures. Many cultural productions, especially children?s literature and cartoons, stress the similarities between children and animals, similarities that have their limits and often place the child, as human, above the animal. Still, these fictional situations offer opportunities for thinking of child-animal relationships in diverse ways through, for instance, considering the possibilities of privileged contact between children and animals or of animals that are more knowledgeable and powerful than children and even adults.0Despite the prevalence and success of child-animal tandems in comics and culture, we know very little about these relationships. What makes them so popular? How do they work? How much do they vary across time and cultures? What

do they tell us about the place of animals and children in comics and in the real world?0'Strong Bonds: Child-animal Relationships in Comics' takes a first, important step in this direction. Bringing together scholars with a diverse range of comics expertise, the volume?s chapters combine contextualized readings of comics with relevant theories for interrogating childhood and animalhood, their overlaps and divergences. The strong bonds between children and animals mapped out here point towards alternative modes of conceptualizing family and identity and, ultimately, alternative means of reading, interpreting and imagining.0With chapters on early comics (the Italian children?s magazine 'Corriere dei Piccoli' during WWI, Harold Gray?s 'Little Orphan Annie') international and regional classics ('Tintin', the Flemish 'Jommeke') and contemporary graphic novels (Bryan Talbot?s 'A Tale of One Bad Rat', Brecht Even?s 'Panther'), this critical anthology sheds light on a vast array of child-animal relationships in comics from Europe and North America.000.

The book includes five famous tales by Charles Perrault illustrated by Walter Crane (40 colour illustrations): Little Red Riding Hood; The Master Cat, or Puss in Boots; Blue Beard; The Sleeping Beauty in the Woods; and Cinderella, or The Little Glass Slipper. Walter Crane was a prominent book illustrator of the 19th century. In cooperation with Edmund Evans, he designed picture books printed in colour, which became the most popular children's books at the time thanks to their high level of craftsmanship and low price. Crane's style shows the influence of the art of the Renaissance and Japanese prints (ukiyo-e). He designed his books according to the belief that "children, like the ancient Egyptians, appear to see most things in profile and like definite statements in design. They prefer well-defined forms and bright, frank colour. They don't want to bother about three dimensions. They can accept symbolic representations. They themselves employ drawing ... as a kind of picture-writing and eagerly follow a pictured

story." Crane's work set the standards of taste in the Victorian children's book industry and earned him a reputation as 'the father of the illustrated children's book'.
