Byzantine & Moslem Empires Emereo
Publishing

This book introduces the Age of
Justinian, the last Roman century and
the first flowering of Byzantine culture.
Dominated by the policies and
personality of emperor Justinian I

(527-565), this period of grand
achievements and far-reaching failures
witnessed the transformation of the
Mediterranean world. In this volume,
twenty specialists explore the most
important aspects of the age including
the mechanics and theory of empire,
warfare, urbanism, and economy. It also
discusses the impact of the great
plague, the codification of Roman law,
and the many religious upheavals taking

place at the time. Consideration is given to imperial relations with the papacy, northern barbarians, the Persians, and other eastern peoples, shedding new light on a dramatic and highly significant historical period.

Winner of the 2010 Orange Award for New Writers Two days after I turned fourteen the son of our neighbour set his stepmother alight. Or so Lindiwe Bishop believes, though eighteen months later the charges against Ian McKenzie are dropped and he returns home, full of charm and swagger. Intrigued, Lindiwe strikes up a covert friendship with the mysterious white boy next door. As a bond grows between them, they cannot foresee how severely it will be tested in the years ahead - by secrets and by a world that wants nothing more than to divide them. Vividly evoking Zimbabwe's slide from independence into chaos, THE BOY NEXT DOOR tells an engrossing tale about what it means to witness, change, love and remain whole when all around

you is falling apart.

This handy reference guide makes it easier to access and understand histories written in Greek between 600 and 1480 CE. Covering classicizing histories that continued ancient Greek traditions of historiography, sweeping, fast-paced 'chronicle' type histories, and dozens of idiosyncratic historical texts, it distills the results of complex, multi-lingual, specialist scholarship into clear explanations of the basic information needed to approach each medieval Greek history. It provides a sound basis for further research on each text by describing what we know about the time of composition, content covered by the history, authorship, extant manuscripts,

previous editions and translations, and basic bibliography. Even-handed explanations of scholarly debates give readers the information they need to assess controversies independently. A comprehensive introduction orients students and non-specialists to the traditions and methods of Byzantine historical writing. It will prove an invaluable timesaver for Byzantinists and an essential entry point for classicists, western medievalists, and students.

Warfare, State and Society in the Byzantine World is the first comprehensive study of the warfare and the Byzantine World from the sixth to the twelfth century. The book examines Byzantine attitudes to warfare, the effects of war on society and culture, and the relations between the soldiers, their leaders and society. The communications, logistics, resources and manpower capabilities of the Byzantine Empire are explored to set warfare in its geographical as well as historical

context. In addition to the strategic and tactical evolution of the army, this book analyses the army in campaign and in battle, and its attitudes to violence in the context of the Byzantine Orthodox Church.

Scott confronts conventional historians and looks at the evidence, archaeological and textual, for the proposition that three centuries, roughly between 615 and 915, never existed and are "phantom" years. The author shows in detail how no archaeology exists for

these three centuries, and that the material remains of the seventh century closely resemble those of the tenth, and lie directly beneath them. This is the first book on this topic in the English language, though Heribert Illig's books on the same topic, 'Das erfundene Mittelalter' and 'Wer hat an der Uhr Gedreht?' have been best sellers in German-speaking Europe.

The Complete Idiot's Guide to the Roman Empire Edinburgh University Press

This volume proposes a multidisciplinary approach to the history of Ancient Greek. Each of its ten papers offers a methodological example of how the study of Greek can be greatly enhanced by a truly multidisciplinary perspective in which the analysis of language interacts with epigraphy, textual philology and comparative linguistics, yet without neglecting the role that linguistic features play in the texts in which they are used, and hence in the culture which produced both. The first four papers

tackle epic language, addressing eccentric pronouns and formulas, the role and semantics of the middle perfect, and the development of hexameter poetry in the colonial West. The next two papers are devoted to lyric poetry and its linguistic influence in Greek literature and tackle fragments by Corinna and Epicharmus respectively. The remaining four contributions look into a variety of topics spanning from early Ionic prose to the diachronic development of the Greek lexicon and its reception in Byzantine lexicography. They all provide examples of how Greek literary language evolved across the centuries, how it was perceived by ancient scholars, and what contribution modern linguistic approaches can provide to our understanding of both these issues.

Byzantium, that dark sphere on the periphery of medieval Europe, is commonly regarded as the immutable residue of Rome's decline. In this highly original and provocative work, Alexander Kazhdan and Ann Wharton Epstein revise this traditional image by documenting the dynamic social changes that occurred during the eleventh and twelfth centuries.

The Crusader States and their Neighbours explores the military history of the Medieval Near East, piecing together the fault-lines of conflict which entangled this much-contested region. This was an area where ethnic, religious, dynastic, and commercial interests collided and the causes of war could be numerous. Conflicts persisted for decades and were fought out between many groups including Kurds, Turks, Armenians, Arabs, and the crusaders

themselves. Nicholas Morton recreates this world, exploring how each faction sought to advance its own interests by any means possible, adapting its warcraft to better respond to the threats posed by their rivals. Strategies and tactics employed by the pastoral societies of the Central Asian Steppe were pitted against the armies of the agricultural societies of Western Christendom, Byzantium, and the Islamic World, galvanising commanders to adapt their practices in response to their foes. Today, we are generally encouraged to think of this era as a time of religious

conflict, and yet this vastly oversimplifies a complex region where violence could take place for many reasons and peoples of different faiths could easily find themselves fighting side-by-side.
