CUNNINGHAM SMITH

So You Want to Be a Nurse? Sigma Theta Tau

This collection of true narratives reflects the dynamism and diversity of nurses, who provide the first vital line of patient care. Here, nurses remember their first "sticks," first births, and first deaths, and reflect on what gets them through long, demanding shifts, and keeps them in the profession. The stories reveal many voices from nurses at different stages of their careers: One nurse-in-training longs to be trusted with more "important" procedures, while another questions her ability to care for nursing home residents. An efficient young emergency room nurse finds his life and career irrevocably changed by a car accident. A nurse practitioner wonders whether she has violated professional boundaries in her care for a homeless man with AIDS, and a home care case manager is the sole attendee at a funeral for one of her patients. What connects these stories is the passion and strength of the writers, who struggle against burnout and bureaucracy to serve their patients with skill, empathy, and strength.

NurseThink Notes Elsevier Health Sciences

A practical, entry-level text, *Communication for Nurses* offers direct, effective techniques delivered in a concise, user-friendly format that enables readers to develop a professional communication st

So You Want to Teach Clinical? Springer Publishing Company

It is no secret that compassionate care is at the heart of nursing. However, there is an outdated mindset idealized by many healthcare organizations that nursing includes self-sacrifice. In truth, nurses are in dire need of the ability for self-care to survive and thrive in today's healthcare environment. Accepting the unrealistic expectation of self-sacrifice serves no role in the nursing profession and devalues the very hub of the healthcare system-nurses. *A Nurse's Medicine Basket: Tools for Compassionate Self-Care* is intended to bring awareness and understanding to current and ongoing issues nurses experience as they practice the art and science of nursing. Within the book, voices of nurses from across the nation and various healthcare systems share their stories about self-care, which have greatly impacted their nursing practice -for better or worse. Ten timely nursing topics are discussed, emphasizing the value of self-care to support nurses in navigating the current healthcare environment. - *The Golden Rule of Nursing: To Thine Own Self Be True- It's Not Always about the Paycheck- You Don't Know Everything...And You Never Will- Develop Your Voice-You're Gonna Need It- Build Up Your Team: Be The Type Of Nurse You Want To Work With- Ask For Help- Who is the Patient?- Compassionate Self-Care- Compassion for Management- Nursing Leadership*The current climate of nursing has changed considerably since nursing's professional debut in 1860. The disconnect and imbalance of what is expected from nursing professionals and the reality of what nurses actually do has become a hot topic amongst nurses. *A Nurse's Medicine Basket: Tools for Compassionate Self-Care* provides thought-provoking context for advocating for and empowering the role of nurses as defined by true nursing practice. A must-read book for nurses, healthcare

leaders, workplace managers, student nurses and nursing educators. Authored by a nurse with more than 30 years' experience across a variety of healthcare settings, *A Nurse's Medicine Basket: Tools for Compassionate Self-Care* demonstrates the correlation between self-care and higher job satisfaction, improved patient care outcomes, and stronger, more authentic working relationship with peers, managers and patients.

Practical Preparation for Professional Practice McGraw-Hill Education (UK)

Designated a Doody's Core Title and Essential Purchase! "Without question, this book should be on every nurse educator's bookshelf, or at least available through the library or nursing program office. Certainly, all graduate students studying to be nurse educators should have a copy." --Nursing Education Perspectives "This [third edition] is an invaluable resource for theoretical and practical application of evaluation and testing of clinical nursing students. Graduate students and veteran nurses preparing for their roles as nurse educators will want to add this book to their library." Score: 93, 4 stars --Doody's "This 3rd edition. . . has again given us philosophical, theoretical and social/ethical frameworks for understanding assessment and measurement, as well as fundamental knowledge to develop evaluation tools for individual students and academic programs." -Nancy F. Langston, PhD, RN, FAAN Dean and Professor Virginia Commonwealth University School of Nursing All teachers need to assess learning. But often, teachers are not well prepared to carry out the tasks related to evaluation and testing. This third edition of *Evaluation and Testing in Nursing Education* serves as an authoritative resource for teachers in nursing education programs and health care agencies. Graduate students preparing for their roles as nurse educators will also want to add this book to their collection. As an inspiring, award-winning title, this book presents a comprehensive list of all the tools required to measure students' classroom and clinical performance. The newly revised edition sets forth expanded coverage on essential concepts of evaluation, measurement, and testing in nursing education; quality standards of effective measurement instruments; how to write all types of test items and establish clinical performance parameters and benchmarks; and how to evaluate critical thinking in written assignments and clinical performance. Special features: The steps involved in test construction, with guidelines on how to develop test length, test difficulty, item formats, and scoring procedures Guidelines for assembling and administering a test, including design rules and suggestions for reproducing the test Strategies for writing multiple-choice and multiple-response items How to develop test items that prepare students for licensure and certification examinations Like its popular predecessors, this text offers a seamless blending of theoretical and practical insight on evaluation and testing in nursing education, thus serving as an invaluable resource for both educators and students.

Qualitative Research in Nursing Jones & Bartlett Learning

"Qualitative Research in Nursing is a user-friendly text that systematically provides a sound foundation for understanding a wide range of qualitative research methodologies, including triangulation. It approaches nursing education, administration, and practice and gives step-by-step details to instruct students on how to implement each approach. Features include emphasis on

ethical considerations and methodological triangulation, instrument development and software usage; critiquing guidelines and questions to ask when evaluating aspects of published research; and tables of published research that offer resources for further reading"--Provided by publisher.

Principles of Teaching and Learning for Nursing Practice Sigma

Population-Based Public Health Clinical Manual: The Henry Street Model for Nurses has proven to be one of the most important public health texts for students and practitioners alike. Focused on developing a competent public health nursing practice in diverse settings, the core text builds on the Henry Street Consortium's framework of 12 competences for population-based, entry-level public health nursing. This full-color, newly designed third edition has completely revised and updated coverage, including:

- 17 Sustainable Development Goals (SDGs) that provide a framework for public health nursing practice
- A new competency on utilizing principles and science of environmental health to promote safe and sustainable environments for individuals, families, systems, and communities
- Examples demonstrating the global growth in public health nursing
- Theory applications showing how PHNs use frameworks to further public health initiatives

Caring for Patients, Caring for Student Nurses Pearson

The result of Creative Health Care Management's 25 years experience in health care, this book provides health care leaders with basic concepts for transforming their care delivery system into one that is patient and family centered and built on the power of relationships. Relationship-Based Care provides a practical framework for addressing current challenges and is intended to benefit health care organizations in which commitment to care and service to patients is strong and focused. It will also prove useful in organizations searching for solutions to complex struggles with patient, staff and physician dissatisfaction; difficulty recruiting and retaining and developing talented staff members; conflicted work relationships and related quality issues. Now in its 16th printing, Relationship-Based Care has sold over 65,000 copies world-wide. It is the winner of the American Journal of Nursing Book of the Year Award.

Learning Online Elsevier Health Sciences

Worried about your placement? Will you fit in? Will you have the right skills? What do you need to learn for practice assessments? This book will help you with all these concerns. It will tell you what to expect from the placement, what you can learn, how to link theory and practice, and how to make the most of your learning opportunities. A logical, step-by-step approach to preparing for a medical placement Helps make the most of learning opportunities Explains how to develop medical competencies, mapping specific cancer and palliative care exercises and activities to the NMC competencies Narratives from other students describe what the placement will really be like Honest discussion of the challenges of a medical placement to help avoid problems Advice on possible approaches to situations that may arise Focus on the essential evidence base of cancer and palliative care nursing, linking theory to practice Series features: A unique guide to getting the most from clinical placements What to expect before a placement What you can expect to learn on placement How to consolidate your experience and learning Clear links and examples with NMC proficiencies Guidance on what to use as evidence for portfolios Short case studies to link theory with practice Key points reminder boxes Worried about your next placement? Will you 'fit in'? Will you have the right skills? What do you need to learn to meet practice assessments? This series will

help you with all these concerns. It will tell you what to expect from each placement, what you can learn, how to link theory and practice, and how to make the most of your learning opportunities. This is the only series specifically for student nurses undertaking specific practice placements, and will give you all the information you need in a user-friendly format. Each book in the series covers a specific area of practice for a typical placement on a pre-registration nursing course. Each title provides: A unique guide to getting the most from clinical placements How to prepare for your placement What you can expect to learn during a placement Clear links to, and examples of, achieving NMC competencies Guidance on what to use as evidence for your portfolio Case studies that link theory with practice How to consolidate your experience and learn from the placement Tips, activities, further reading suggestions and useful websites. Titles in the Placement Learning series: Surgical nursing Medical nursing Cancer and palliative care nursing Mental health nursing Community care nursing Older people nursing

Relationship-Based Care Learning Matters

Teaching nursing students in a clinical setting with patients differs greatly from teaching in a classroom. It can be a daunting task if one is not prepared and mentored. This book provides a concise and accessible guide for nursing instructors leading students in the healthcare agency for the first time, as well as experienced educators who are interested in exploring new teaching strategies. It covers many aspects of the clinical instructor role including: meeting the nurse manager organizing and documenting your clinical day creating clinical student assignments objectively evaluating student's individual performance acknowledging diversity and inclusiveness tracking progress and handling student errors In addition, the book discusses some of the more complex issues surrounding the role of the clinical instructor such as accountability for nursing care, documentation and medication administration carried out by students. The book features numerous forms and charts to assist in organizing and managing the teaching experience, as well as situational scenarios to help prepare instructors for unique situations that arise during the clinical experience. Written by authors with extensive experience in clinical care and teaching, this book will be an invaluable guide for all clinical nursing instructors, both novice and experienced. Examples of tools in the book and online downloadable forms to support an organized clinical experience for a new instructor accompany this publication.

Tools for Compassionate Self-Care Underland Press

At a time when more and more of what people learn both in formal courses and in everyday life is mediated by technology, Learning Online provides a much-needed guide to different forms and applications of online learning. This book describes how online learning is being used in both K-12 and higher education settings as well as in learning outside of school. Particular online learning technologies, such as MOOCs (massive open online courses), multi-player games, learning analytics, and adaptive online practice environments, are described in terms of design principles, implementation, and contexts of use. Learning Online synthesizes research findings on the effectiveness of different types of online learning, but a major message of the book is that student outcomes arise from the joint influence of implementation, context, and learner characteristics interacting with technology--not from technology alone. The book describes available research about how best to implement different forms of online learning for specific kinds of students, subject areas,

and contexts. Building on available evidence regarding practices that make online and blended learning more effective in different contexts, Learning Online draws implications for institutional and state policies that would promote judicious uses of online learning and effective implementation models. This in-depth research work concludes with a call for an online learning implementation research agenda, combining education institutions and research partners in a collaborative effort to generate and share evidence on effective practices.

Placement Learning in Older People Nursing, A guide for students in practice, 1 McGraw-Hill Education (UK)

The Student's Guide to BECOMING A NURSE The Student's Guide to Becoming a Nurse is an essential guide for all student nurses who want to become competent practitioners. It explores the knowledge, skills and attitudes that all pre-registration nursing students must acquire by the end of their programme of study, enabling them to become confident, successful nurses. Thoroughly re-written and updated to include the latest 2010 NMC standards for pre-registration nursing education, this invaluable textbook is divided into four key sections: Professional values Communication and interpersonal skills Nursing practice and decision making Leadership, management and team working With case studies, top tips, activities and questions throughout, The Student's Guide to Becoming a Nurse is ideal for all pre-registration nurses and those about to qualify. Student Reviews "It's been designed for students and that's why I like it... it is student friendly, useful, easy to read." Tamara Thomas, 2nd year nursing student, Swansea University "I cannot fault the content - it is straight to the point, it provides some interesting resources for a student nurse that is essential for them to know... a joy to read." Faye Elliott, 2nd year nursing student, Keele University "I think the content and material is excellent... I will definitely be making recommendations to my friends." Leanne Curran, 2nd year nursing student, University of Ulster "This book is truly amazing and

provided all of the information needed for my final exam to become a qualified nurse. I passed with flying colours, thanks." Amazon review

Communication for Nurses Independently Published

First published in 1997, The nursing and health care fields are developing rapidly. This new series of monographs offers reports of projects completed in 1997 in the fields of nursing and health care. The aim of the series is to report studies that have relevance to contemporary nursing and health care practice. It will include reports of research into aspects of clinical nursing care, management and education. The series will be of interest to all nurses and health care workers, researchers, managers and educators in the field.

Promoting and maintaining good mental, physical and behavioural health of individuals, communities and populations is a key role of the registered nurse. Understanding how to incorporate health promotion into clinical practice will be an important part of a nurse's undergraduate studies and something they will take with them into professional life. This book will help students to understand the underlying theory behind health promotion and the different considerations for working with individuals, families and diverse communities. It will also demonstrate the practical skills needed in order to promote health and well-being effectively upon entering the practice environment. Key features: Mapped to the new NMC standards of proficiency for registered nurses (2018) Case studies, activities and other learning features help students translate the theory to practice Focus on practical skills to help guide daily practice

Before, During and After Springer

cs.nurse.nursedu

EBOOK: Transition to Nursing: Preparation for Practice Frederick Fell Publishers

For courses in clinical nursing. Helping each student think like a nurse using a clear, consistent presentation of nursing skills. With its clear, approachable, writing style, Skills in Clinical Nursing sets the foundation for nursing excellence. It presents the 161 most important skills performed by nurses, including all common variations, organized from the simple to the more complex. The 9th edition has been revised and updated to reflect current practice, responding to extensive feedback from clinical nurses, market surveys, and the authors' own teaching and practice experience. Each

chapter contains concise introductory material, placing skills in the context of anatomy, physiology, and pathophysiology, and clearly explaining their purpose and rationale. Each skill is then presented in exceptional step-by-step detail, with over 800 illustrations. Students will learn to think like nurses as they see how the material they are reading is applied in nursing practice. Pearson eText is a simple-to-use, mobile-optimized, personalized reading experience. It lets students highlight, take notes, and review key vocabulary all in one place, even when offline. Seamlessly integrated videos and other rich media engage students and give them access to the help they need, when they need it. Educators can easily customize the table of contents, schedule readings, and share their own

notes with students so they see the connection between their eText and what they learn in class - motivating them to keep reading, and keep learning. And, reading analytics offer insight into how students use the eText, helping educators tailor their instruction. NOTE: This ISBN is for the Pearson eText access card. For students purchasing this product from an online retailer, Pearson eText is a fully digital delivery of Pearson content and should only be purchased when required by your instructor. In addition to your purchase, you will need a course invite link, provided by your instructor, to register for and use Pearson eText.
