Technology can be a
powerful tool for

transforming learning. It
can help affirm and
advance relationships
between educators and
students, reinvent
approaches to learning
and collaboration, shrink
long-standing equity and
accessibility gaps, and

adapt learning experiences to meet the needs of all learners. Technology-Supported Teaching and Research Methods for Educators provides innovative insights into the utilization and maintenance of technology-supported teaching and research methods for educators. The content within this publication represents the work of e-learning, digital technologies, and current issues and trends in the field of teaching and learning in the context of contemporary

technologies. It is a vital reference source for school educators, professionals, school administrators, academicians, researchers, and graduate-level students seeking coverage on topics centered on the integration of effective technologies that will support educators and students. Selected topics of global relevance Sense Publishers
This volume brings together both theoretical and case study based

contributions to the implementation of the Sustainable Development Goals (SDGs) in Institutions of Higher Education (IHE), presenting an impactful combination of authors from both developing and developed countries. While most current publications addressing the SDGs and education focus on sustainable development in general and specific topics such as climate change or energy, this book attempts to accelerate the localisation of the

SDGs by presenting opportunities and innovations offered in various universities and campuses regarding SDGs localisation. The book seeks to provide an important contribution to the global dialogue on IHE and the SDGs, and will be of interest to academics and researchers engaged in the SDGs and education, as well as government agencies and other interested stakeholders. The book focuses on curriculum and learning matters, research and development as well

as community engagement. Case studies detail the integration of SDGs in academic and professional development, new approaches to implementing sustainability science instruction, improvements in teaching practices to enhance teacher competence, and responsible management education. Additional focus is placed on the alignment of the SDGs in higher education with the other goals, emphasizing technological innovation for improved human

health and environmental management, and climate change policies and action plans. Interdisciplinary solutions for pressing environmental problems are also provided, making sure that no one is left behind in realising these global development goals. An Australian Research Study Springer Nature Winner of the 1st-place American Journal of Nursing Book of the Year award in nursing research/evidence-based practice for 2021! Burns & Grove's The Practice of Nursing Research:

Appraisal, Synthesis, and Generation of Evidence, 9th Edition is the trusted resource for those wanting to master the research methods that are foundational to evidence-based practice. This highly respected textbook covers how to appraise and apply existing research evidence, as well as how to participate in research and quality improvement projects. This new 9th edition has been extensively updated to reflect today's focus on online research in the

digital era and includes clear, step-by-step guidelines for all major quantitative and qualitative research approaches — including supporting examples from the latest high-quality literature. There's also new content on translational research, coverage of the most current research tools and techniques, and an increased use of illustrations, tables, and other visuals to help engage visually oriented readers of all levels. Coverage of quantitative,

qualitative, and other research methodologies provides a solid foundation to conduct, appraise, and apply research evidence to the realities of today's clinical practice. Balanced coverage of qualitative and quantitative methods addresses the qualitative research methodologies that are often the starting point of research projects, particularly in magnet hospitals and DNP programs. Clear, comprehensive coverage is organized into five units that include: an

introduction to nursing research; coverage of the research process; application for evidence-based health care; how to analyze data, determine outcomes, and disseminate research; and how to propose and seek funding for research. Strong emphasis on evidence-based practice addresses this key graduate-level QSEN competency and reinforces how to generate research evidence and appraise and synthesize existing research for application to

clinical practice. Rich examples from nursing literature bring research principles to life. Emphasis on the most currently used research methodologies focuses on the methods used in both quantitative research and qualitative research, as well as outcomes research and mixed-methods research. Coverage of digital data collection examines the use of online research tools. Quick-reference summaries include a table of research methods inside the front cover and

a list of types of research syntheses (with definitions) inside the back cover. Helpful user resources are included with each new text purchase on the companion Evolve website and feature 400 interactive review questions along with a library of 10 full-text research articles. [IFIP TC 13 International Conference, Rome, Italy, September 12-16, 2005, Proceedings](#) Academic Conferences and publishing limited This book profiles various

cases that are emerging in addressing global challenges in the context of SDGs for society in the era of climate change and covers case studies of projects being undertaken to tackle biodiversity, food security, climate change, energy and water security. The book is written by 37 authors, and will appeal to various stakeholders including academics working within the identified thematic areas, policy planners, development agencies, governments and United Nations agencies. The

adoption of the Sustainable Development Goals (SDGs) in 2015 ushered a new era in the global development agenda as the world transitioned from the Millennium Development Goals (MDGs). The new era of SDGs that are all-inclusive, unlike the MDGs with the focus now being on ensuring human success that is predicated on environmental protection. The year 2020 marked five years post the adoption of the SDGs with increased calls for stock-taking of progress

made amid strong calls for a decade of action to accelerate the delivery of the SDGs by 2030. These calls have been louder now given the impact of the COVID-19 pandemic, which reset the global economy and increased intensity of extreme weather events across the world. Since climate change has emerged as one of the biggest threats to the achievement of the SDGs, there has been growing concerns on its impact on biodiversity loss and the extinction of some species. There are

also concerns regarding increased food insecurity at the household level in some parts of the world, particularly in Asia and Africa. With the demand for climate change action on the increase, there have also been growing calls for the big carbon emitters to drastically cut their emissions and invest in clean energy to save the planet by following development pathways making emissions stay under the 1.5°C increase in temperature.

Methods in Business Management BRILL
Complete proceedings of the 14th European Conference on Research Methodology for Business and Management Studies Valletta, Malta Published by Academic Conferences and Publishing International
Responsible Design, Implementation and Use of Information and Communication Technology Academic Conferences Limited
Doing Development Research is a comprehensive

introduction to research in development studies, that provides thorough training for anyone carrying out research in developing countries. It brings together experts with extensive experience of overseas research, presenting an interdisciplinary guide to the core methodologies. Informed by years of research experience, *Doing Development Research* draws together many strands of action research and participatory methods, demonstrating their diverse applications

and showing how they interrelate. The text provides:

- an account of the theoretical approaches that underlie development work
- an explanation of the practical issues involved in planning development research
- a systematic overview of information and data collecting methods in three sub-sections:
- methods of social research and associated forms of analysis
- using existing knowledge and records
- disseminating findings/research

Using

clear and uncomplicated language – illustrated with appropriate learning features throughout - the text guides the researcher through the choice of appropriate methods, the implementation of the research, and the communication of the findings to a range of audiences. This is the essential A-Z of development research.

Philosophies in Software Systems Engineering and Information Systems

This popular textbook provides a concise, but comprehensive, overview of health research as an integrated, problem-solving process. It bridges the gap between health research methods and evidence-based clinical practice, making it an essential tool for students embarking on research. Practitioners also benefit from guidance on interpreting the ever-expanding published research in clinical and

scientific journals, to ensure their practice is up to date and evidence-based and to help patients understand information obtained online. "This textbook would be of interest and value both to undergraduate and post-graduate students also." Reviewed by Dr. Richard Ellis on behalf of the New Zealand Journal of Physiotherapy, January 2015 ".excellent at giving an introduction and overview into research methods." Reviewed by Tobias Bremer on behalf

of InTouch, July 2015 Uses simple language and demystifies research jargon Covers both quantitative and qualitative research methodology, taking a very practical approach Gives examples directly related to the health sciences Each chapter contains a self-assessment test so that the reader can be sure they know all the important points Provides an extensive glossary for better understanding of the language of research Online interactive self-

assessment tests: Multiple choice questions True or false questions Short answer questions Log on to evolve.elsevier.com/Polgar/research and register to access the above assets. [ECRM2016](#) Kogan Page Publishers The complexity of 21st century lifestyle makes collaborative research and learning essential for all of the population, both in well-resourced and socio-economically challenged regions. Cross-Disciplinary Approaches to Action Research and Action

Learning is an advanced reference source including the latest scholarly research on the examination of the development of a community practice of research in order to improve problem solving in various fields. Featuring extensive coverage on a broad range of topics such as social justice, organizational development, and global economy, this publication is ideally designed for academics, researchers, scholars, and managers seeking current research

on the promotion of collaborative research and learning.

Research Methods for History IGI Global

Historians have become increasingly sensitive to social and cultural theory since the 1980s, yet the actual methods by which research is carried out in History have been largely taken for granted.

Research Methods for History encourages those researching the past to think creatively about the wide range of methods currently in use, to understand how these

methods are used and what historical insights they can provide. This updated new edition has been expanded to cover not only sources and methods that are well-established in History, such as archival research, but also those that have developed recently, such as the impact of digital history research. The themes of the different chapters have been selected to reflect new trends in the subject, including landscape studies, material culture and ethics. Every chapter

presents new insights and perspectives and will open researchers minds to the expanding possibilities of historical research.

Practical Research

Springer Science & Business Media

Drama Research Methods: Provocations of Practice focuses on innovative drama/theatre research practices in ever-widening contexts for a broad range of purposes within and outside of the arts and the challenges this poses for researchers, writers and research participants.

Techniques, Methods and Applications Springer

Practical and straightforward, this book is a multidisciplinary introduction to the process of planning, conducting and analysing qualitative research, from selecting appropriate methods to publishing your findings. Built around the authors' Qualitative Research Cycle - consisting of the design, data collection and analytic cycles - this pragmatic guide clearly demonstrates the steps you need to take to

ensure your research is rigorous and robust. Drawing on decades of experience teaching workshops, the book is packed with techniques and tools to help you turn theory and method into research practice. This second edition: Showcases the importance of linking research design to data analysis, helping you avoid potential pitfalls and get the most out of your data Highlights the relevance and wide application of qualitative methods with an array of

international examples of real field research and interdisciplinary case studies Gives clear guidance on writing qualitative research, including how to respond to critiques of qualitative methods Has a renewed focus on evaluating quality in qualitative research, ensuring your work is valid, reflexive and ethical Offering tried and tested research tools like interview guides that you can apply to your own projects and supported by online resources including checklists and reflective

questions, this book is the perfect companion for anyone looking to complete a successful project using qualitative research methods.

14th IFIP TC 13 International Conference, Cape Town, South Africa, September 2-6, 2013, Proceedings, Part IV IGI Global

This best-selling text continues in its seventh edition to provide the most current and comprehensive coverage of business research. Its student-friendly design contains numerous

examples illustrating real-world research in management, marketing, finance, accounting, and other business areas.

Business Research Methods, 7e, is the ideal text for undergraduate and first year MBA courses in marketing, management, or quantitative studies.

19th IFIP WG 6.11 Conference on e-Business, e-Services, and e-Society, I3E 2020, Skukuza, South Africa, April 6-8, 2020, Proceedings, Part II Springer
Organizations need

research, and managers have to be able to commission, judge and use others' research as well as conduct research themselves to inform business decisions. Business Research Methods helps you understand the challenges of carrying out worthwhile research into significant issues and develop a wide range of research-related professional skills. Guiding you through the process of selecting, carrying out and reporting on a successful research

project, it breaks down the research process, from exploring the literature and crafting a research proposal to practical research management and addressing the transferable skills of project management and communication. Business Research Methods places research firmly in the real world, exploring why research is done and how to ensure that projects are meaningful for organizations. Examples and case studies, including examples of

students' projects, give learners with little or no work experience a meaningful context in which to relate their own projects. Online supporting resources for lecturers include an instructor's manual with additional activities and supporting handouts, lecture slides and figures and tables from the text. Resources for students include web links, templates, quizzes, activities, examples of practice and sample questionnaire results for students.

This book constitutes the refereed proceedings of the 12 International Conference on Product-Focused Software Process Improvement, PROFES 2011, held in Torre Canne, Italy, in June 2011. The 24 revised full papers presented together with the abstracts of 2 keynote addresses were carefully reviewed and selected from 54 submissions. The papers are organized in topical sections on agile

and lean practices, cross-model quality improvement, global and competitive software development, managing diversity, product and process measurements, product-focused software process improvement, requirement process improvement, and software process improvement.

**Sustainable
Development Goals for
Society Vol. 1** Juta and
Company Ltd

The use of mixed methods designs for conducting research has become a

major trend in social science research.

Renowned methodological experts Janice Morse and Linda Niehaus present a guide to intermediate and experienced researchers on the possibilities inherent in mixed method research. They offer the basic principles of conducting this kind of study, then examine a wide variety of design options available to the researcher, including their strengths and weaknesses and when to use them. Providing examples from a variety of disciplines,

examining potential threats to validity, and showing the relationship between method and theory, the book will be a valuable addition to the methodologist's library and a useful text in courses in research design.

ECRM 2015 Springer
Nature
Research Methodologies, Innovations and Philosophies in Software Systems Engineering and Information SystemsIGI Global
Encyclopedia of Organizational

Knowledge, Administration, and Technology Springer

Nature
Written by 43 authors from Africa, Europe and Latin America, this book presents 19 topics addressing poverty in the context of Sustainable Development Goals (SDGs), leadership in implementing SDGs, and SDGs in service delivery and local government. As the world has gone past five years of implementing the 2030 Agenda for Sustainable Development and the

intertwined 17 SDGs, new opportunities in research continue to open up. Hence, documenting some of the initiatives put in place around the world regarding the implementation of the SDGs is one of the aims of this publication. With 10 years remaining, the book further enhances the desire to scale up SDGs implementation. The selection of case studies from the selected regions also provides a balance in terms of how the SDGs are being rolled out for economic growth,

environmental stewardship and social protection. The ambition remains even with the challenge brought by the COVID-19 pandemic that preoccupied the whole of 2020; spilling over to 2021. There is no doubt that resources have been diverted, but the world must stay on the course to 2030 and beyond. Therefore, the book is relevant for several stakeholders including the academics, development partners, government officials and other individuals that are

involved in making sure no one is left behind in the lead to 2030. Appraisal, Synthesis, and Generation of Evidence IGI Global For undergraduate or graduate courses that include planning, conducting, and evaluating research. A do-it-yourself, understand-it-yourself manual designed to help students understand the fundamental structure of research and the methodical process that leads to valid, reliable results. Written in

uncommonly engaging and elegant prose, this text guides the reader, step-by-step, from the selection of a problem, through the process of conducting authentic research, to the preparation of a completed report, with practical suggestions based on a solid theoretical framework and sound pedagogy. Suitable as the core text in any introductory research course or even for self-instruction, this text will show students two things: 1) that quality research

demands planning and design; and, 2) how their own research projects can be executed effectively and professionally.

Integrating Sustainability Thinking in Science and Engineering Curricula IGI Global

Approaches to conducting advertising, mass-media audiences, and mass-media efficiency research in organizational and development contexts are detailed in this reference. Among the topics covered are qualitative and quantitative approaches to research methodology,

the steps involved in the research process, data collection, and the procedures used in applying a research design and interpreting research data. Designed to accommodate a variety of learning styles, this book imparts the framework in which to acquire and develop research, problem solving, and communication skills, and basic individual, moral, and ethical values.

Utilisation of South African Research on Higher Education

Elsevier Health Sciences

This book explores ways in which creative research practice can be explicitly and mindfully geared to make a difference to the quality of social and ecological existence. It offers a range of examples of how different research methods can be employed (and re-tuned) with this intention. The book suggests that what Romm names "active" research involves using the research space responsibly to open up new avenues for thinking and acting on the part of those involved in the

inquiry and wider stakeholders. The book includes a discussion of a range of epistemological, ontological, methodological and axiological positions (or paradigms) that can be embraced by inquirers implicitly or explicitly. It details the contours of an epistemology where knowing is recognized to

be grounded in social relations, as a matter of ethics. While focusing on discussing the “transformative paradigm” and attendant view of research ethics, it considers to what extent the borders between paradigms can be treated as being permeable in creative and active

inquiries. Apart from considering options for enhancing responsible research practice during the process of inquiry (and reconsidering mixed-research designs) the book also considers options for responsible theorizing that is inspirational for pursuing goals of social and ecological justice.
