This book contains a simple but powerful definition of services based upon a separation between back-stage and front-stage activities. Services deal with front interactions, production and manufacturing with back-stage operations. Teboul uses this distinction to systematically explore the important issues of the field.

Ian L. McHarg's landmark book *Design with Nature* changed the face of landscape architecture and planning by promoting the idea that the design of human settlements should be based on ecological principles. McHarg was one of the earliest and most influential proponents of the notion that an understanding of the processes that form landscapes should underlie design decisions. In *To Heal the Earth*, McHarg has joined with Frederick Steiner, a noted scholar of landscape architecture and planning, to bring forth a valuable cache of his writings produced between the 1950s and the 1990s. McHarg and Steiner have each provided original material that links the writings together, and places them within the historical context of planning design work and within the larger field of ecological planning as practiced today. The book moves from the theoretical-beginning with the 1962 essay "Man and Environment" which sets forth the themes of religion, science, and creativity that emerge and reappear throughout McHarg's work--to the practical, including discussions of methods and techniques for ecological planning as well as case studies. Other sections address the link between ecology and design, and the issue of ecological planning at a regional scale, covering topics such as education and training necessary to develop the field of ecological planning, how to organize and arrange biophysical information to reveal landscape patterns, the importance of incorporating social factors into ecological planning, and more. *To Heal the Earth* provides a larger framework and a new perspective on McHarg's work that brings to light the growth and development of his key ideas over a forty year period. It is an important contribution to the literature, and will be essential reading for students and scholars of ecological planning, as well as for professional planners and landscape architects.

It's business as usual at the residence of Titus and his motley crew. Champagne baths, reckless scientific experimentations, casual littering. It's all fun and games, until their house decides it has had enough and goes looking for a better life... leaving the gang without a place to call their own!

Will Titus and his friends find a new home, or convince their old one to come back? Thom shows an ever-growing mastery of visual storytelling in this brilliant follow-up to his 2017 debut *VII*. Once again eschewing words altogether, the Montréal-based author channels the chaotic yet precise slapstick of Chuck Jones' Looney Tunes while infusing it with a subtle sense of existential dread. *Casa Rodeo* is about finding one's place in the world, both literally and figuratively.

Linking theory to practice, this book provides a better fundamental understanding of Portland cement and hydraulic binders which is necessary to make better concrete. It has been clearly demonstrated that concrete durability is closely linked to its water/binder ratio and proper curing during the first week after casting. In this rigorously presented work, Pierre-Claude Aitcin explains the complexity of the hydration reaction and how to make, use and cure durable and sustainable concrete. This book also details the problems with Portland cement composition at present and outlines the concept of an ideal hydraulic binder which is technically and ecologically efficient, as well as being long-lasting and robust. Binders for Durable and Sustainable Concrete is a practical and innovative reference text which will be particularly relevant to engineers and chemists working in the Portland cement, concrete and admixture industries. This book will also be of interest to academics and graduate-level students in Civil Engineering departments who specialize in Portland cement and concrete technology.

A dark, poetic mystery about the women of the remote village of Kulumani and the lionesses that hunt them Told through two haunting, interwoven diaries, Mia Couto's *Confession of the Lioness* reveals the mysterious world of Kulumani, an isolated village in Mozambique whose traditions and beliefs are threatened when ghostlike lionesses begin hunting the women who live there. Mariamar, a woman whose sister was killed in a lioness attack, finds her life thrown into chaos when the outsider Archangel Bullseye, the marksman hired to kill the lionesses, arrives at the request of the village elders. Mariamar's father imprisons her in her home, where she relives painful memories of past abuse and hopes to be rescued by Archangel. Meanwhile, Archangel tracks the lionesses in the wilderness, but when he begins to suspect there is more to them than meets the eye, he starts to lose control of his hands. The hunt grows more dangerous, until it's no safer inside Kulumani than outside it. As the men of Kulumani feel increasingly threatened by the outsider, the forces of modernity upon their traditional culture, and the danger of their animal predators closing in, it becomes clear the lionesses might not be real lionesses at all but spirits conjured by the ancient witchcraft of the women themselves. Both a riveting mystery and a poignant examination of women's oppression, *Confession of the Lioness* explores the confrontation between the modern world and ancient traditions to produce an atmospheric, gripping novel.

The internet of things (IoT) has emerged as a trending technology that is continually being implemented into various practices within the field of engineering and science due to its versatility and various benefits. Despite the levels of innovation that IoT provides, researchers continue to search for networks that maintain levels of sustainability and require fewer resources. A network that measures up to these expectations is Narrowband IoT (NB-IoT), which is a low power wide area version of IoT networks and is suitable for larger projects. Engineers and other industry professionals are in need of in-depth knowledge on this growing technology and its various applications. Principles and Applications of Narrowband Internet of Things (NB-IoT) is an essential reference source that provides an in-depth understanding on the recent advancements of NB-IoT as well as the crucial roles of emerging low power IoT networks in various regions of the world. Featuring research on topics such as security monitoring, sustainability, and cloud infrastructure, this book is ideally designed for

developers, engineers, practitioners, researchers, students, managers, and policymakers seeking coverage on the large-scale deployment and modern applications of NBloT.

Ludwig Mies van der Rohe was one of the leading figures of twentieth-century architecture. For architects and many others who are committed to the modernist tradition, he is a pivotal figure.

With in-depth, scholarly essays and opulent photographs and plans, this book traces the multifaceted development of his work, including his first Berlin buildings, his villa projects, his work at the Bauhaus in the 1930s, and his American projects of the postwar years. Jean-Louis Cohen was the director of the Institut français d'architecture until 2003 and is currently a professor at New York University. He has an established reputation as a leading international historian of architecture. His broad and encompassing perspective makes this book a reliable and comprehensive introduction to the work of Mies van der Rohe. Ludwig Mies van der Rohe gehörte zu den führenden Persönlichkeiten in der Architektur des 20. Jahrhunderts und ist für Architekten und viele andere, die sich der Tradition der Moderne verpflichtet haben, eine Schlüsselfigur. Mit wissenschaftlich fundierten Texten und opulentem Plan- und Fotomaterial zeichnet das Buch die facettenreiche Entwicklung seines Werkes nach: Die ersten Berliner Bauten, seine Villenprojekte und Tätigkeit am Bauhaus in den dreißiger Jahren sowie die amerikanischen Projekte der Nachkriegszeit. Jean-Louis Cohen, bis 2003 Direktor des Institut français d'architecture und zur Zeit Professor an der New York University, hat einen etablierten Ruf als international führender Architekturhistoriker. Seine umfassende Perspektive macht das Buch zu einer verlässlichen Einführung in das Werk Mies van der Rohes.

Post-war Europe and Asia have seen the rapid development of German and Japan from a war torn countries into two of the most powerful nations in the world. Their achievement is nothing short of miraculous. However, as the two most populated countries; China and India, transform themselves into Asia powerhouses, cement and concrete will be their brick and mortar to sustain their double digit growth in economy. This book summarizes the history and development of cement and concrete. From prehistoric period to today, from ancient Egypt and Rome period to China, over tens of thousands of years of human civilization in the form of the gelled material (cement, concrete). The book is divided into seven chapters, including more than 300 references. Chapter 1 introduces the prehistoric gelled material development; Chapter 2 is about the birth of Portland cement and the technological application; Chapter 3 introduces the important role that concrete played in the human society developing process; Chapter 4 subdivides the performance and the wide application of different function of cement and concrete; Chapter 5 focuses on northern Europe, especially the history of Norwegian cement; Chapter 6 elaborates the development of concrete in China and its impact in the world's ancient civilizations history; Chapter 7 describes the development prospect of cement and concrete.

Aquaponics is the integration of aquaculture and soilless culture in a closed production system. This manual details aquaponics for small-scale production--predominantly for home use. It is divided into nine chapters and seven annexes, with each chapter dedicated to an individual module of aquaponics. The target audience for this manual is agriculture extension agents, regional fisheries officers, non-governmental organizations, community organizers, government ministers, companies and singles worldwide. The intention is to bring a general understanding of aquaponics to people who previously may have only known about one aspect.
