Systems Analysis &  
Design Fundamentals:  
A Business Process

Redesign Approach uniquely integrates traditional and modern systems analysis with design methods and techniques. By using a business process redesign approach, author Ned Kock enables readers to understand, in a very applied and practical way, how information technologies can be used to significantly improve organizational quality and productivity.

*Bibliographic Guide to Conference Publications*

Bloomsbury Publishing  
Behavioural sciences help refine our understanding of human decision-making. Their insights are immensely relevant for policy-making since public intervention works much better when it

targets real people rather than imaginary beings assumed to be perfectly rational. Increasingly, governments around the world are keen to rely on those insights for reshaping public interventions in a wide range of policy areas such as energy, health, financial services and data protection. When policy-making meets behavioural sciences, effective and low-cost regulations can emerge in the form of default rules, smart disclosure and simplification requirements. While behaviourally-informed intervention has a huge potential for policymaking, it also attracts legitimacy and practicability concerns. *Nudge and the Law* takes a European perspective on those

issues and explores the legal implications of the emergent phenomenon of behavioural regulation by focusing on the challenges and opportunities it may offer to EU policy-making and beyond.

A Guide for Policy Advisers in Central and Eastern Europe M.E.

Sharpe

Public administration ensures the development and delivery of the essential public services required for sustaining modern civilization. Covering areas from public safety and social welfare to transportation and education, the services provided through the public sector are inextricably part of our daily lives. However, mandatory budgetary

cuts in recent years have caused public administrators to radically re-think how they govern in the modern age. In this Very Short Introduction Stella Theodoulou and Ravi Roy offer practical insight into the major challenges confronting the public sector in the globalized era. Tackling some of the most hotly debated issues of our time, including the privatization of public services and government surveillance, they take the reader on a global journey through history to examine the origins, development, and continued evolution of public administration.

ABOUT THE SERIES:  
The Very Short Introductions series from Oxford University Press contains hundreds of titles in

almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable.

SAGE

Managing the behaviour of young children can be a real challenge, this book provides you with 100 tried and tested ideas for the long, medium and short term. It

shows how to select and adopt the right approach, how to analyze, reflect on and modify practice to ensure consistency and fairness and that positive behaviour develops. Each of the 100 ideas focuses on a single strategy, and looks at: - structures and systems; - using fun, child-orientated resources; - rewarding good behaviour, and managing sanctions; - the advantages of various approaches; - case studies from practice; - adaptations of strategies for different settings and ages. The book suggests lively strategies that keep behaviour management fresh and effective. Advice is given to support children with Special Educational Needs and

examples of behaviour management in different settings are shared. An easily accessible guide for all practitioners working with children aged 3 to 8.

*JSL Vol 25-N5* Oxford University Press  
Cross & Tapper continues to provide exceptionally clear and detailed coverage of the modern law of evidence, with an element of international comparison. The foremost authority in the area, it is a true classic of legal literature.

Public Administration: A Very Short Introduction SAGE

An award-winning book, *Doing Research* is a must read. Designed for students across a variety of social science

disciplines, it is the first research methods text devoted to conflict analysis and resolution. It begins with a discussion of the philosophical foundations for doing research, providing guidelines on how to develop research questions and how these questions can be addressed with various methodologies. The book presents a wide-ranging treatment of both quantitative and qualitative approaches to the design and analysis of problems of conflict.

*High-Performing Self-Managed Work Teams*  
International Monetary Fund

`This book is a must for scholars and practitioners interested in managing work teams in organizations.... Yeatts

and Hyten have written an excellent reference work. The book synthesizes a wealth of prior research into a testable model of Self-Managed Work Team performance' - Management Learning`The work is wide-ranging in its scope but retains a clear focus and coherence throughout.' International Journal of Public-Private PartnershipsSince the mid-1970s, pressure from international competition has forced business in the United States to look for better ways to achieve and maintain a competitive position. One popular tool is the self-managed work-team (SMWT). This book provides a thorough examination of SMWT both at the level of theory and at

the practical level of when to use work teams to find solutions and how to develop successful teams.By examining the most widely accepted theories of work-team performance, illustrated by 10 case studies from the areas of manufacturing, public service and health care, the authors define: how high-performing self-managed work teams differ from work groups and short-term teams; the problems which compel an organization to create such teams; the factors which explain successful self-managed work teams; and how to develop high performing cost-effective teams.

The Journal of School Leadership is

broadening the conversation about schools and leadership and is currently accepting manuscripts. We welcome manuscripts based on cutting-edge research from a wide variety of theoretical perspectives and methodological orientations. The editorial team is particularly interested in working with international authors, authors from traditionally marginalized populations, and in work that is relevant to practitioners around the world. Growing numbers of educators and professors look to the six bimonthly issues to: deal with problems directly related to contemporary school leadership practice

teach courses on school leadership and policy use as a quality reference in writing articles about school leadership and improvement.

### **Systems Analysis & Design Fundamentals**

Cambridge University Press

This collection of essays focuses on the critical issue of corruption that lies at the heart of the crisis of constitutionalism in Africa. Most anti-corruption measures over the years have been inadequate, serving merely as symbolic gestures to give the impression something is being done. The African Union's declaration of 2018 as the 'African anti-corruption year', belated though it be, is an open recognition by

African governments of the impact corruption will have on the continent unless urgent steps are taken. The key objective of this volume is to draw attention to the problem of corruption, the complexity of the situation, with all its multi-faceted social, political, economic and legal dimensions, and the need for remedial action.

This collection of essays explores the evolution of anti-discrimination law in European civil law jurisdictions.

Historically, scholarship in this area has focused on the common law, which has also taken the lead

in developing the theory and practice of anti-discrimination law. This volume breaks new ground by offering a sustained, critical, legal and socio-legal, comparative look at how anti-discrimination is faring in European civil law environments. While it is true that anti-discrimination law is seen as a foreign transplant in some regions, it does not fare poorly across the board. As shown by the case studies herein, the success of anti-discrimination law is found to vary according to its national context, the actors involved, and the evolution of the particular concept or ground of discrimination in question.

Electronic Inspection  
Copy available for instructors here This comprehensive text brings together in one volume both consideration of the core methods available for undertaking qualitative data collection and analysis, and discussion of common challenges faced by all researchers in conducting qualitative research. Qualitative Organizational Research: Core Methods and Common Challenges contains 27 chapters, each written by an expert in the area. The first part of the volume considers common challenges in the design and execution of qualitative research, examining key contemporary

debates in each area as well as providing practical advice for those undertaking organizational research. The second part of the volume looks at contemporary uses of core qualitative methods in organizational research, outlining each method and illustrating practical application through empirical examples. Written by internationally renowned experts in qualitative research methods, this text is an accessible and essential resource for students and researchers in the areas of organization studies, business and management research, and organizational psychology. Key features: • Coverage of all the key topics in

qualitative research •  
Chapters written by  
experts drawing on  
their personal  
experiences of using  
methods • Introductory  
chapters outlining the  
context for qualitative  
research and the  
philosophies which  
underpin it Gillian
