MIKAYLA RAMOS

Kindergarten Math With Confidence Instructor Guide (Math with Confidence) Stenhouse Publishers

This week of practice pages build kindergartners' mathematical fluency. Each problem is tied to a specific mathematical concept. Daily practice through these quick activities will help your young mathematicians. Great formative assessment tool!

Developing Roots Kindergarten Student Activity Pack Springer Science & Business Media

The achievement of students of color continues to be disproportionately low at all levels of education. More than ever, Geneva Gay's foundational book on culturally responsive teaching is essential reading in addressing the needs of today's diverse student population. Combining insights from multicultural education theory and research with real-life classroom stories, Gay demonstrates that all students will perform better on multiple measures of achievement when teaching is filtered through their own cultural experiences. This bestselling text has been extensively revised to include expanded coverage of student ethnic groups: African and Latino Americans as well as Asian and Native Americans as well as new material on culturally diverse communication, addressing common myths about language diversity and the effects of "English Plus" instruction.

Kindergarten Math With Confidence Instructor Guide National Geographic Books

"Earlybird Kindergarten Mathematics Common Core Edition helps kindergarten students build a strong foundation in mathematics through fun-filled lessons and activities. ...updated to align with the Common Core State Standards"--Cover, p. [4].

Daily Math Practice for Kindergarten (Week 23) Teacher Created Materials

The prep work has been done for you! No need to spend the money on color copies or the time to prepare lesson materials. The student activity pack is a ready-to-use resource that supports the exploration and practice phases of the lessons. The student

cards, made of sturdy card stock and printed in color, are beautifully and simply designed with perforations, allowing for student management. After use in the classroom, students will want to continue working with playful activities at home. Cards are organized and labeled by lesson and allow for the perfect level of challenge with endless opportunities for students to support their math work.

Mindset Mathematics: Visualizing and Investigating Big Ideas, Grade K Redleaf Press

A unique homeschool math resource that your child will love! "Story Math" means what it says: teaching math with stories. Homeschooling math doesn't have to be drudgery...and shouldn't be! There are enough math-phobics running around in the world, don't you think? This book uses friendly animal characters to introduce all the basics of math: counting, number recognition, beginning geometry, addition and subtraction, and more. The book even introduces word problems that go with the characters in the stories. The book encourages pattern recognition, incorporates hands-on activities, and provides cut-outs to use as manipulatives for most of the activities. If you're looking for an inexpensive homeschool math curriculum to start with your young child (4-6 years), this book is it. If you are an unschooling parent who wants to strew fun math activities for your young child, this book will help. Everyone loves stories. What better way to start your young child learning the foundations of math than by making it fun and engaging? Written by a former school teacher (including Kindergarten) and homeschooling mom. (Don't miss my other homeschool math product for older children - "Mesmerizing Multiplication, Divine Division!" Just do a search on Amazon.) WANT TO TRY A SAMPLE? Everything for Early Learning for kindergarten provides activities to help children learn these essential concepts: -numbers - addition -subtraction -letters -sounds -reading and writing readiness This math and language arts workbook supports current state standards. Everything for Early Learning provides children with the tools they need to think critically, solve problems, and succeed in school. This workbook for kindergarten guides children through a variety of colorful, engaging activities. Each activity supports early learning standards for math, language arts, and basic skills. An exceptional addition to at-home kindergarten curriculum, Everything for Early Learning covers these foundational skills and concepts: -numbers and counting -addition and subtraction -letters and sounds -reading readiness -writing readiness The Everything for Early Learning series offers creative math and language arts activities that promote a fun approach to learning. With Everything for Early Learning, children start their educational journey equipped with skills for success!

Earlybird Kindergarten Mathematics: Teacher's guide B Routledge A colorful, engaging, easy-to-use workbook that reinforces the lessons in the Instructor Guide. Quick and easy workbook pages will help children review and practice what they've learned.

They'll also develop children's fine-motor skills and help them get used to pencil-and-paper work, which will prepare them for greater independence in first grade. This simple, beautiful, age-appropriate workbook is colorfully illustrated by Itamar Katz. This Student Workbook accompanies Kindergarten Math With Confidence: Instructor Guide.

180 Days of Math for Prekindergarten ebook Peace Hill Press

Filled with unusual games and fun activities that have proven superior in facilitating children's construction of mathematical

knowledge. (And in easing teaching anxiety about providing a solid math curriculum!) -- from cover.

Comprehensive Curriculum of Basic Skills, Grade K Peace Hill Press

Patterns are found in math, reading, science, music, art, dance, and poetry—and in the world all around us. They are also found in this delightful book written by educator Trudy Harris. Children will love the humor and predictability of this story, and teachers and parents alike will appreciate the pattern hunt that will send kids back into the book looking for more patterns again and again.

Kindergarten Story Math Teacher Created Materials

Engaging Young Children in Mathematics: Standards for Early Childhood Mathematics Education brings together the combined wisdom of a diverse group of experts involved with early childhood mathematics. The book originates from the landmark 2000 Conference on Standards for Pre-kindergarten and Kindergarten Mathematics Education, attended by representatives from almost every state developing standards for young children's mathematics; federal government officials; mathematicians; mathematics educators; researchers from mathematics education, early childhood education, and psychology; curriculum developers; teachers; policymakers; and professionals from organizations such as the National Conference of Teachers of Mathematics and the National Association for the Education of Young Children. The main goal of the Conference was to work collectively to help those responsible for framing and implementing early childhood mathematics standards. Although it has its roots in the Conference, the expanded scope of the standards and recommendations covered in this book includes the full range of kindergarten to grade 2. The volume is organized into two main parts and an online appendix

(<http://www.gse.buffalo.edu/org/conference/>). Part One, Major Themes and Recommendations, offers a framework for thinking about pre-kindergarten - grade 2 mathematics education and specific recommendations. Part Two, Elaboration of Major Themes and Recommendations, provides substantive detail regarding young students' understandings of mathematical ideas. Each Part includes five parallel subsections: "Standards in Early Childhood Education"; "Math Standards and Guidelines"; "Curriculum, Learning, Teaching, and Assessment"; "Professional Development"; and "Toward the Future: Implementation and

Policy." As a whole the book: * presents comprehensive summaries of research that provide specific guidelines for standards, curriculum, and teaching; * takes the recent reports and recommendations for early childhood mathematics education to the next level; * integrates practical details and research throughout; and * provides a succinct, but thorough review of research on the topics, sequences, and learning trajectories that children can and should learn at each of their first years of life, with specific developmental guidelines that suggest appropriate content for each topic for each year from 2-year-olds to 7-year-olds. This is an indispensable volume for mathematics educators, researchers, curriculum developers, teachers and policymakers, including those who create standards, scope and sequences, and curricula for young children and professional teacher development materials, and students in mathematics education, early childhood trainers, teacher educators, and faculty in mathematics education.

Mathematics Jump Math

Comprehensive coverage of all essential kindergarten math topics in one easy-to-use bundle! Math educator Kate Snow gives parents the tools they need to teach math with confidence. This scripted, open-and-go program leads parents' step-by-step through teaching all the concepts a kindergartner needs to master: counting to 100, writing numbers, beginning addition and subtraction, shapes and patterns, coins, time, and measurement. Short, lively lessons will hold a child's attention by incorporating movement, games, and everyday household objects. Simple, colorful worksheets prepare kindergartners for pencil-and-paperwork that they'll encounter in first grade. Snow demystifies math by including recommendations for wonderful math picture books to enjoy together, plus specific ways to help children apply math to real life throughout the week. Beyond just telling parents what to do, Kindergarten Math With Confidence also helps them understand why the lessons are designed the way they are, giving them the knowledge and confidence to help their children learn. Using Kindergarten Math With Confidence will allow parents to build a strong math foundation for their children.

Cdn AP AK K.2 [jump Math] Carson-Dellosa Publishing

Introduce pre-kindergarten math skills with fun and effective daily practice activities. This prekindergarten workbook focuses on daily math practice to build mathematical fluency and confidence

in young learners. This math workbook makes at-home learning, whole class instruction, or small group support, quick and easy. It includes standards-based activities, easy-to-follow instructions, and an answer key to quickly assess student understanding. Parents appreciate the teacher-approved activity books that keep their child engaged and learning. Great for homeschooling, to reinforce learning at school, or prevent learning loss over summer. Teachers rely on the daily practice workbooks to save them valuable time. The ready to implement activities are perfect for daily morning review or homework. The activities can also be used for intervention skill building to address learning gaps.

Teacher Created Materials

Kindergarten Math: Getting started teaching your student math for the first time can seem overwhelming for some or a great adventure for others. Whatever your perspective, this curriculum/workbook has all that you need to get your student off to a great start! Attractive artwork, easy to understand instructions, and adequate spacing make this curriculum tailored to your student's beginning abilities. The curriculum is interactive with lots of coloring opportunities to delight your student and refresh their attention as they learn the meatier aspects of math. Your student will complete two full pages of learning activities per day that integrates several learning skills in each session. By working sequentially through the entire curriculum your student will be able to master all of the required math skills for this grade level mandated by state education departments. The curriculum begins with a variety of activities such as writing, reading, counting, and coloring skills that are developed while your student learns to recognize and write the numbers 1-20 as well as their names. Phonics based short sentences with number words are inserted periodically for your student to practice reading and for you to gain perspective of his or her growing accomplishments. Next, your student moves on to exercises that include: How many?, matching objects to numbers, counting groups of objects, and identifying objects in groups. After mastering number recognition your student will continue on to learning about number order. Number order will help your student with sequencing as well as with what comes before, after, and in between. This leads to being able to discern which number is most or least in a group of numbers as well as if numbers are the

same or different. Learning about shapes is also an important part of a student's math experience. Your student will learn to identify shapes by how they are constructed. He or she will learn how to count shapes, sort shapes, and write the words for shapes. And there are plenty of opportunities to color and draw shapes throughout the workbook. Putting numbers and shapes together naturally prepares your student for the next unit of learning involving the telling of time. Your student will learn to recognize and tell time on both standard and digital clocks. The study of time includes minutes, quarter hours, half hours, hours, and learning to identify time before and after a pre-selected time. Finally, your student will learn to recognize and know the value of our American monetary coins. Your student will increase their counting and sorting skills by working with this currency. When your student closes the last page of this curriculum he or she will be well prepared for the next grade. This curriculum is in a workbook format that your student will consume with pleasure. The many pictures and activities will delight the learning process as well as ease its mastery. Flash cards for daily practice are included for you to cut out and use as needed. This spiral bound workbook lays flat for ease of use by young students.

Helping Children Learn Mathematics National Geographic Books

Ready to use teaching materials support the instructional components of the program. The teacher activity pack is an inviting and engaging interface, allowing for whole group or small group management of lessons. Color cards on durable card stock are re-useable. The cards effectively complement the lessons and are a ready-made resource at hand that can be used to differentiate instruction based on student feedback in the teaching moment.

Growing Mathematical Ideas in Kindergarten Carson-Dellosa Publishing

This week of practice pages build kindergartners' mathematical fluency. Each problem is tied to a specific mathematical concept. Daily practice through these quick activities will help your young mathematicians. Great formative assessment tool!
Spectrum Math Workbook, Grade K National Academies Press
Comprehensive Curriculum of Basic Skills for kindergarten covers basic concepts such as colors, shapes, letters, numbers, counting, time, and money. Complete with practice in writing, reading, and math, this series helps develop the skills your child needs for grade-level success. --With over 10 million copies in print, the Comprehensive Curriculum of Basic Skills series provides an entire curriculum filled with fun, educational activities and instruction that improve academic performance. --Available for grades prekindergarten to 6, Comprehensive Curriculum of Basic Skills features vivid, full-color illustrations and grade-appropriate activities for phonics, reading, language arts, writing, and math. This series edition has been updated with relevant, high-interest reading passages and artwork to engage your child in the learning process. An excellent resource for supporting classroom learning or enhancing your home school curriculum, it features review lessons to measure your child's progress, teaching suggestions to extend learning, and answer keys to monitor accuracy. --Comprehensive Curriculum of Basic Skills is the all-in-one resource for strengthening essential skills.
