History, Theory, Crisis Routledge

The concept of religious freedom is the favoured modern human rights concept, with which the modern world hopes to tackle the phenomenon of religious pluralism, as our modern existence in an electronically shrinking globe comes to be increasingly characterised by this phenomenon. To begin with, the concept of religious freedom, as embodied in Article 18 of the Universal Declaration of Human Rights, seems self-evident in nature. It is the claim of this book, however, that although emblematic on the one hand, the concept is also problematic on the other, and the implications of the concept of religious freedom are far from self-evident, despite the ready acceptance the term receives as embodying a worthwhile goal. This book therefore problematizes the concept along legal, constitutional, ethical and theological lines, and especially from the perspective of religious studies, so that religious freedom in the world could be enlarged in a way which promotes human flourishing.

Medieval and Renaissance Spirituality Grand Central Publishing

Spirituality in an Age of Terrorism and Beyond John Hunt Publishing

In the long trek of human history, the adage that there will never be peace among the nations until there is peace among the religions has never been truer. The growing trend toward spiritually inspired violence throughout the emerging global village of the twenty-first century has taken a terrible toll on the lives of thousands of innocent victims. The primary purpose of this book is to address this issue head-on by examining the role that the earth's diverse faith communities can play in stopping the needless hatreds and hostilities that all too often arise from the search for spiritual fulfillment. At this stage of human evolution, nothing is more urgent.

Four Overarching Patterns of Culture Oxford University Press, USA

If religion is continually in a state of flux how can the study of religion critically examine contemporary religious beliefs and values? 'Representing Religion' critically examines this "crisis of representation". The volume traces the history of religious studies, critiquing the concept that "experience" is central to understanding religion. The views of influential semioticians and philosophers - notably Nietzsche, Saussure, Foucault, Barthes, and Bakhtin - are used to construct a new methodology for the critical study of religion. Representing Religion will be of interest to students and scholars of semiotics as well as theory and method in religious studies.

An American woman, Elaine, whose Islamic name is Nusrat, is also on her own. She waits out the war in Peshawar, Pakistan, teaching refugee children under the persimmon tree in her garden while her Afghan doctor husband runs a clinic in Mazar-i-Sharif, Afghanistan. Najmah's father had always assured her that the stars would take care of her, just as Nusrat's husband had promised that they would tell Nusrat where he was and that he was safe. As the two look to the skies for answers, their fates entwine. Najmah, seeking refuge and hoping to find her father and brother, begins the perilous journey through the mountains to cross the border into Pakistan. And Nusrat's persimmon-tree school awaits Najmah's arrival. Together, they both seek their way home. Capitalist Realism Paulist Press

Justice has been the dominant cultural framework of people in the West for two centuries, ever since

the rise of constitutional democracies. Consciously or not, most people in the West have a strong awareness of right and wrong. Their sense of morality is generally rooted in an obligation to the rule of law. In democratic societies, the rule of law ultimately relies on constitutional documents ratified by a widely-accepted process of development and implementation. For millennia, honor has been the dominant cultural framework of most people in the East and Middle East. Here, people know that speech and behavior display respect or disrespect. While pervasive in all relationships, honor and shame are most important in the family, extended family, and local community. In the East, honor is not necessarily an internal feeling, as it is in a justice culture. Honor is more often an external attribution bestowed by others rather than claimed by oneself. Harmony is prevalent globally in indigenous cultures. Many indigenous peoples do not distinguish between the supernatural and natural worlds. All aspects of life are connected. Interactions with spirit beings are the key to maintaining harmony in order to be secure. Reciprocity is a common cultural framework in the Global South. Here, one learns to develop connections with the right people in given circumstances for needed resources. These connections may or may not be characterized as "friendships" and provide not so much close friendships as reciprocal exchange. In some places, reciprocity is the means whereby one survives.

How to work in harmony with people of other faiths Routledge

How do you tailor education to the learning needs of adults? Do they learn differently from children? How does their life experience inform their learning processes? These were the questions at the heart of Malcolm Knowles' pioneering theory of andragogy which transformed education theory in the 1970s. The resulting principles of a self-directed, experiential, problem-centred approach to learning have been hugely influential and are still the basis of the learning practices we use today. Understanding these principles is the cornerstone of increasing motivation and enabling adult learners to achieve. The 9th edition of *The Adult Learner* has been revised to include: Updates to the book to reflect the very latest advancements in the field. The addition of two new chapters on diversity and inclusion in adult learning, and andragogy and the online adult learner. An updated supporting website. This website for the 9th edition of *The Adult Learner* will provide basic instructor aids. For each chapter, there will be a PowerPoint presentation, learning exercises, and added study questions. Revisions throughout to make it more readable and relevant to your practices. In this sweepingly ambitious volume, the nation's foremost experts on the American presidency and the U.S. Constitution join together to tell the intertwined stories of how each American president has confronted and shaped the Constitution. Each occupant of the office—the first president to the forty-fourth—has contributed to the story of the Constitution through the decisions he made and the actions he took as the nation's chief executive. By examining presidential history through the lens of constitutional conflicts and challenges, *The Presidents and the Constitution* offers a fresh perspective on how the Constitution has evolved in the hands of individual presidents. It delves into key moments in American history, from Washington's early battles with Congress to the advent of the national security presidency under George W. Bush and Barack Obama, to reveal the dramatic historical forces that drove these presidents to action. Historians and legal experts, including Richard Ellis, Gary Hart, Stanley Kutler and Kenneth Starr, bring the Constitution to life, and show how the awesome powers of the American presidency have been shaped by the men who were granted them. The book brings to the fore the overarching constitutional themes that span this

Representing Religion Farrar, Straus and Giroux (BYR)

The Sacred is the Profane collects nine essays by William Arnal and Russell McCutcheon that advance current scholarly debates on secularism-debates. The essays return, again and again, to the question of what "religion"—word and concept—accomplishes, now, for those who employ it, whether at the popular, political, or scholarly level. The focus here is on the efficacy, costs, and the tactical work carried out by dividing the world between religious and political, church and state, sacred and profane.

A Study in Comparative Ethics AuthorHouse

This book provides students with a balanced perspective on business in a global environment, exploring implications for multinational companies in developed and emerging markets. This is the first text of its kind to emphasize strategic decision making as the cornerstone of its approach while focusing on emerging markets. Readers learn to develop and implement these strategies across cultures, and across economic, legal, and religious institutions, in order to cope with competitive players in the global landscape. Application-based chapters open with reading goals and conclude with case studies and discussion questions to encourage a practical understanding of strategy. With in-depth analyses and recommended strategies, this edition provides students of international business with the skills they need for success on the global stage. A companion website features an instructor's manual, test bank, PowerPoint slides, and useful links for instructors as well as practice quizzes, flashcards, and web resources for students.
