Throughout Europe - from town halls and regional governments, through national Parliaments and ministries, to the high institutions of the European Union - there runs a vigorous debate on organised crime, municipal safety and private conduct. Drug problems and what to do about them often occupy center-stage at these debates.

Throughout the 1990s the focus of legal attention has been primarily on the criminal law. New criminal offenses have been created, partly in response to influences 'from above' (from international and European agreements) and partly in response to pressure 'from below' (concerns of citizens at national and sub-national levels). But although criminal law certainly is important as far as the development of drug controls is concerned, it is by no means the whole story. There is a parallel history, a regulatory one, consisting of the

increasing use of administrative measures, some of which are directly concerned with drugs while others are more general but equally applicable. These responses, together with civil law, variously function as adjuncts to criminal law or as alternatives to it, in relation to drug trafficking at European and national levels, drug-related public nuisance as it concerns citizens at municipal level, and drug users. After charting existing measures in the legal orders of Member states and of the Community, *Regulating European Drug Problems* looks at prospects for administrative drug controls after Amsterdam - in the context of the development of the Single Market, cooperation against crime and insecurity, subsidiarity, and human rights. At a practical level, the study offers provocative ideas to policy-makers and administrators working at the intersection of city-level, national, and European responses to drugs. For scholars and students, the book offers comparative legal research and European synthesis, and forges new links between fields of law, suppression of organised crime, and economic and social regulation.

This tool kit is to help staff and consultants of the Asian Development Bank (ADB) conceptualize and design gender-responsive public policy and projects in the micro, small, and medium-sized enterprise sector. It

guides users in the design of project and program outputs, activities, inputs, indicators, and targets to respond to gender issues in micro, small, and medium-sized enterprise development and finance operations. ADB staff can use the tool kit to identify social and gender issues to be documented in the initial poverty and social analysis during the concept phase. Consultants can use it to carry out more detailed social and gender analysis during the project preparatory technical assistance or detailed design or due diligence phase. It should be noted that the tool kit is not meant to be prescriptive. Rather, it offers a menu of entry points that the project team can choose from.

In many parts of Africa three different systems of laws are concurrently applied - the imported "Colonial" law, the indigenous customary law and Islamic law. In some countries the customary and the Islamic law are kept separate and distinct, while in others they are

fused into a single system. This volume represents a unique survey of the extent to which Islamic law is in fact applied in those parts of East and West Africa which were at one time under British administration. It examines the relevant legislation and case law, much of which has never appeared in any Law Reports; the judges and courts which apply it and the problems to which its application give rise.

The most important and recent judgments of the CJEU Considering the ever increasing importance of indirect taxation as a source of revenue for governments, the intensifying complexity of the legal framework, and the proliferating number of countries adopting indirect taxation, it is essential to scrutinize how the law is actually applied in practice. The primary driving force in this area is, undoubtedly, the Court of Justice of the European Union. This book analyses selected topics (e.g. fundamental principles and VAT, administrative cooperation in VAT, taxable base and rates, exemptions, and deductions) by examining the most prominent and recent judgments of the Court of Justice of the European Union. Experts from all over the world, not just from academia but also government representatives and tax practitioners, have provided their input and helped us

compile what is an informative and worthy read for anyone dealing with indirect taxation on a professional basis. Guide to Foreign and International Legal Citations BoD – Books on Demand

This Report on the Observance of Standards and Codes (ROSC) examines Fiscal Transparency for Cyprus. The report reveals that Cyprus has been making major progress in improving fiscal transparency, helped by the government's efforts to strengthen budget management systems and comply with the European Union acquis communautaire. As a result, the country now fully meets or even exceeds the code's standards in many areas. The momentum of fiscal management reform efforts should be maintained to meet the requirements of the code in additional areas.

The rapid growth and development of emerging economies offer both opportunities and threats for international businesses. Understanding the economic development of emerging markets, combined with a knowledge of the increasingly complex international business market, enables better exploitation of opportunities in increasingly competitive world markets. The BRIC countries, the most prominent emerging markets, have long been discovered by foreign firms due to their enormous potential for investment opportunities. This book offers a

comprehensive look at emerging markets, especially as they integrate with the global economy. It offers a conceptual framework to analyze emerging markets from multiple perspectives, including those of indigenous entrepreneurs struggling to overcome constraints to build world-class businesses, multinationals from developed countries tapping into emerging markets for their next growth spurt, and domestic and foreign investors seeking to profit from investment opportunities in emerging markets.

*Drugs Law and Legal Practice in Southeast Asia* investigates criminal law and practice relevant to drugs regulation in three Southeast Asian jurisdictions: Indonesia, Singapore and Vietnam.

These jurisdictions represent a spectrum of approaches to drug regulation in Southeast Asia, highlighting differences in practice between civil and common law countries, and between liberal and authoritarian states. This book offers the first major English language empirical investigation and comparative analysis of regulation, jurisprudence, court procedure, and practices relating to

drugs law enforcement in these three states.

This edition of *Importing Into the United States* contains material pursuant to the Trade Act of 2002 and the Customs Modernization Act, commonly referred to as the Mod Act. *Importing Into the United States* provides wide-ranging information about the importing process and import requirements. We have made every effort to include essential requirements, but it is not possible for a book this size to cover all import laws and regulations. Also, this publication does not supersede or modify any provision of those laws and regulations. Legislative and administrative changes are always under consideration and can occur at any time. Quota limitations on commodities are also subject to change. Therefore, reliance solely on the information in this book may not meet the "reasonable care" standard required of importers.
