What did C. S. Lewis think about truth, goodness and beauty? Fifteen essays explore three major philosophical themes from the writings of Lewis--Truth, Goodness and Beauty. This volume provides a comprehensive overview of Lewis's philosophical thinking on arguments for Christianity, the character of God, theodicy, moral goodness, heaven and hell, a theory of literature and the place of the imagination.

Ethical concerns are among the most common problems public administrators face, yet the issues are often complex, and the correct choices are not always clear. Living up to the public trust is much more than just an act of compliance. It also involves perceiving, preventing, avoiding, and resolving accusations of illegal or unethical behavior, including appearances of inappropriate

behavior. Ethics Moments in Government: Cases and Controversies examines how to identify, assess, and resolve the ethical issues and dilemmas that often confront those who govern the cities, counties, states, and federal agencies throughout America. Real Situations, Real Advice Providing a one-stop resource for all those who must contend with thorny ethical issues, this volume presents case studies that vary in complexity and context and are based on real situations. Each case scenario is followed by discussion questions and case assessments by expert practitioners who describe how they would handle the situation. Using a "total immersion" technique, the book encourages readers to be reflexive and analytical in addressing the problems presented and arriving at appropriate solutions. A supplemental CD is included which contains PowerPoint® slide presentations, articles, workshop programs, tests, and links to organizations. For many of the scenarios presented in this volume, there are no easy answers. Practical guidance on reasoning through difficult decision-making situations enables public administrators to acquire the ethical knowledge, skills, abilities, and instincts that will ultimately help them gain the trust of their citizens and advance in their careers.

"102 Combinatorial Problems" consists of carefully selected problems that have been used in the training and testing of the USA International Mathematical Olympiad (IMO) team. Key features: \* Provides in-depth enrichment in the important areas of combinatorics by reorganizing and enhancing problem-solving tactics and strategies \* Topics include: combinatorial arguments and identities, generating functions, graph theory, recursive relations, sums and products, probability, number theory, polynomials, theory of equations, complex numbers in geometry, algorithmic proofs, combinatorial and advanced geometry, functional equations and classical inequalities The book is systematically organized, gradually building combinatorial skills and techniques and broadening the student's view of mathematics. Aside from its practical use in training teachers and students engaged in mathematical competitions, it is a source of enrichment that is bound to stimulate interest in a variety of mathematical areas that are tangential to combinatorics.

**Carrots and Sticks Don't Work: Build a Culture of Employee Engagement with the Principles of RESPECT** John Wiley & Sons

Advance praise for Carrots and Sticks Don't Work: "Paul Marciano provides a wealth of prescriptive advice that absolutely makes sense. You can actually open the book to any chapter and gain ideas for immediate implementation." -- Beverly Kaye, coauthor of Love 'Em or Lose 'Em "This book should be in the hands of anyone who has to get work done through other people! It's an invaluable tool for any manager at any level." -- John L. Rice, Vice President Human Resources, Tyco International "Carrots and Sticks Don't Work provides a commonsense approach to employee engagement. Dr. Marciano provides great real-world insights, data, and practical examples to truly bring the RESPECT model to life." -- Renee Selman, President, Catalina Health Resources "The RESPECT model is one of the most dynamic, engaging, and thought-provoking employee engagement tools that I have seen. Dr. Marciano's work will help you provide meaningful long-term benefits for your employees, for your organization, and for yourself." -- Andy Brantley, President and CEO, College and University Professional Association for Human Resources "This book provides clear advice and instruction on how to engage your team members and inspire them to a higher level of productivity, work satisfaction, and enjoyment. I am already utilizing its techniques and finding immediate positive changes." -- Robert Roth, Director, Accounting and Reporting, Colgate Palmolive Company The title says it all: Carrots and Sticks Don't Work. Reward and recognition programs can be costly and inefficient, and they primarily reward employees who are already

highly engaged and productive performers. Worse still, these programs actually decrease employee motivation because they can make individual recognition, rather than the overall success of the team, the goal. Yet many businesses turn to these measures first—unaware of a better alternative. So, when it comes to changing your organizational culture, carrots and sticks don't work! What does work is Dr. Paul Marciano's acclaimed RESPECT model, which gives you specific, low-cost, turnkey solutions and action plans-- based on seven key drivers of employee engagement that are proven and supported by decades of research and practice—that will empower you to assess, troubleshoot, and resolve engagement issues in the workplace: Recognition and acknowledgment of employees' contributions Empowerment via tools, resources, and information that set employees up to succeed Supportive feedback through ongoing performance coaching and mentoring Partnering to encourage and foster collaborative working relationships Expectations that set clear, challenging, and attainable performance goals Consideration that lets employees know that they are cared about Trust in your employees' abilities, skills, and judgment Carrots and Sticks Don't Work delivers the same proven resources and techniques that have enabled trainers, executives, managers, and owners at operations ranging from branches of the United States government to Fortune 500 corporations to twenty-person outfits to realize demonstrable gains in employee productivity and job satisfaction. When you give a little RESPECT you get a more effective organization, with reduced turnover and absenteeism and employees at all levels who are engaged, focused, and committed to succeed as a team. In short, you get maximum ROI from your organization's most powerful resource: its people!

Examining a century of university history, Larry Cuban tackles the age-old question: What is more important, teaching or research? Using two departments (history and medicine) at Stanford University as a case study, Cuban shows how universities have organizationally and politically subordinated teaching to research for over one hundred years. He explains how university reforms, decade after decade, not only failed to dislodge the primacy of research but actually served to strengthen it. He examines the academic work of research and teaching to determine how each has influenced university structures and processes, including curricular reform. Can the dilemma of scholars vs. teachers ever be fully reconciled? This fascinating historical journey is a must read for all university administrators, faculty, researchers, and anyone concerned with educational reform.

An inside look at a cable titan and his industry John Malone, hailed as one of the great unsung heroes of our age by some and reviled by others as a ruthless robber baron, is revealed as a bit of both in Cable Cowboy. For more than twenty-five years, Malone has dominated the cable television industry, shaping the world of entertainment and communications, first with his cable company TCI and later with Liberty Media. Written with Malone's unprecedented cooperation, the engaging narrative brings this controversial capitalist and businessman to life. Cable Cowboy is at once a penetrating portrait of Malone's complex persona, and a captivating history of the cable TV industry. Told in a lively style with exclusive details, the book shows how an unassuming copper strand started as a backwoods antenna service and became the digital nervous system of the U.S., an evolution that gave U.S. consumers the fastest route to the Internet. Cable Cowboy reveals the forces that propelled this pioneer to such great heights, and captures the immovable conviction and quicksilver mind that have defined John Malone throughout his career.

For courses in computer programming C How to Program is a comprehensive introduction to programming in C. Like other texts of the Deitels' How to Program series, the book serves as a detailed beginner source of information for college students looking to embark on a career in coding, or instructors and software-development professionals seeking to learn how to program with C. The Eighth Edition continues the tradition of the signature Deitel "Live Code" approach--presenting concepts in the context of full-working programs rather than incomplete snips of code. This gives students a chance to run each program as they study it and see how their learning applies to real world programming scenarios. MyProgrammingLab® not included. Students, if MyProgrammingLab is a recommended/mandatory component of the course, please ask your instructor for the correct ISBN and course ID. MyProgrammingLab should only be purchased when required by an instructor. Instructors, contact your Pearson representative for more information. MyProgrammingLab is an online homework, tutorial, and assessment program designed to work with this text to engage students and improve results. Within its structured environment, students practice what they learn, test their understanding, and pursue a personalized study plan that helps them better absorb course material and understand difficult concepts.
