Holoscopy is a new tomographic imaging modality that combines techniques of digital holography with Fourier-domain optical coherence tomography (FD-OCT). Dierck Hillmann gives a theoretical introduction to the mathematics and physics of holoscopy and develops an efficient numerical reconstruction procedure. Compared to FD-OCT, holoscopy provides unique advantages by enabling tomographic imaging without a limited depth of focus, but results in an increased numerical cost for reconstruction. In further chapters, the author introduces techniques for FD-OCT that are relevant to holoscopy as well. He demonstrates and compares numerical reconstruction methods for FD-OCT and shows how motion and dispersion artifacts in FD-OCT can be numerically compensated.

An innovative, two-in-one picture book follows a parallel day in the life of two families: one in a Western city and one in a North African village. Somewhere in Sydney, Australia, a boy and his family wake up, eat breakfast, and head out for a busy day of shopping. Meanwhile, in a small village in Morocco, a boy and his family go through their own morning routines and set out to a bustling market. In this ingenious, wordless picture book, readers are invited to compare, page by page, the activities and surroundings of children in two different cultures. Their lives may at first seem quite unlike, but a closer look reveals that there are many things, some unexpected, that connect them as well. Designed to be read side by side — one from the left and the other from the right — these intriguing stories are told entirely through richly detailed collage illustrations.

The "Monster Mash" was a graveyard smash--and now it's a picture book by David Catrow The "Monster Mash" gets Wolf Man, zombies, and other monsters to dance and party in this catchy, classic song. Dracula rises out of his coffin, vampires feast in the master bedroom, and the ghouls get a jolt from Boris's electrodes. This "graveyard smash" caught on in a flash, and it became the hit of the land. The song, written in 1962 by Bobby "Boris" Pickett and Lenny Capizzi, has gone on to

Quickly emulating the outstanding success of the descant tutors, these books are very popular even with those who normally use tutors other than the Enjoy the Recorder series.

The concept of "psychological tools" is a cornerstone of L. S. Vygotsky's sociocultural theory of cognitive development. Psychological tools are the symbolic cultural artifacts--signs, symbols, texts, formulae, and most fundamentally, language--that enable us to master psychological functions like memory, perception, and attention in ways appropriate to our cultures. In this lucid book, Alex Kozulin argues that the concept offers a useful way to analyze cross-cultural differences in thought and to develop practical strategies for educating immigrant children from widely different cultures. Kozulin begins by offering an overview of Vygotsky's theory, which argues that consciousness arises from communication as civilization transforms "natural" psychological functions into "cultural" ones. He also compares sociocultural theory to other innovative approaches to learning, cognitive education in particular. And in a vivid case study, the author describes his work with recent Ethiopian immigrants to Israel, whose traditional modes of learning were oral and imitative, and who consequently proved to be quick at learning conversational Hebrew, but who struggled with the reading, writing, and formal problem solving required by a Western classroom. Last, Kozulin develops Vygotsky's concept of psychological tools to promote literature as a useful tool in cognitive development. With its explication of Vygotsky's theory, its case study of sociocultural pedagogy, and its suggested use of literary text for cognitive development, *Psychological Tools* will be of considerable interest to research psychologists and educators alike.

"A mixtape of variations and a fugue on time from a postmodern master.... Familiar tales and conventional genres are made new, tinged with shuddering wonder and titillating humor." —Yu-Yun Hsieh, *The New York Times Book Review* Robert Coover has been playing by his own rules for more than half a century, earning the 1987 Rea Award for the Short Story as "a writer who has managed, willfully and even perversely, to remain his own man while offering his generous vision and versions of America." Here, in this selection of his best stories, you will find an invisible man tragically

obsessed by an invisible woman; a cartoon man in a cartoon car who runs over a real man who is arrested by a real policeman with cartoon eyes; a stick man who reinvents the universe. While invading the dreams and nightmares of others, Coover cuts to the core of how realism works.

Marcy and the Riddle of the Sphinx G.P. Putnam's Sons

After a lavish night of guilty pleasures in Monte Carlo, four best friends face an awful morning of arrests -- and a fight for survival. Only minutes after Abbie Elliot and her three best friends step off of a private helicopter, they enter the most luxurious, sumptuous, sensually pampering hotel they have ever been to. Their lavish presidential suite overlooks Monte Carlo, and they surrender: to the sun and pool, to the sashimi and sake, to the Bruno Paillard champagne. As the weekend moves into pulsating discos, high-stakes casinos, and beyond, Abbie is transported to the greatest pleasure and release she has ever known. In the morning's harsh light, Abbie awakens on a yacht, surrounded by police. Something awful has happened: something impossible, unthinkable. Abbie, Winnie, Serena, and Bryah are arrested and accused of the foulest crime imaginable. And now the vacation of a lifetime becomes the fight of a lifetime—a fight for survival. *Guilty Wives* is the ultimate indulgence, the kind of nonstop joy-ride of excess, friendship, betrayal, and danger that only James Patterson can create.
