TEACHING OF SOCIAL STUDIES SAGE

India is evolving in every sphere, and its education system is no

exception. The change, however, is largely towards the betterment of the society as a whole; but still constraints are many in achieving a stringent yet 'beneficial for all' education system in the country. This book gives a thorough account on the Indian Education system—from its inception to the present day, and underlines the hurdles faced and the improvements needed to achieve a flawless system of imparting value education the students. The book begins by explaining fundamental theories of education—its meaning, nature and so on, and then proceeds to discuss the emerging Indian society and the constraints faced by its education system, like corruption, poverty, social discrimination, ill practices (drugs, violence, etc.). It further discusses the philosophies preached by the Indian and Western philosophers and educationists, like Swami Vivekananda, Sri Aurobindo, Rabindra Nath Tagore, Mahatma Gandhi, Rousseau, Froebel, and Maria Montessori, and their contribution in shaping the Indian Education system in some way or the other. The book further explains the concepts integral to Education in Emerging India, which are Education for All (Sarva Shiksha Abhiyan), Education for Women (girl child), Education for the Children with Special Needs, Education for National Integration, and Adult Education. It also discusses the revised education policies, with special emphasis on education commissions, and organizations involved in it. The book is designed for the undergraduate and postgraduate students of Education.

Managing Emotions to Win in Life Waveland Press

This text is a classic in Indian political literature as the original author belongs to the Idealist school of great political thinkers such as T H Green and Bosanquet. It is a comprehensive treatise on basic structure of established political theories, be it Bosanquet's idealistic theory of the State to liberal and anti-idealist view, as expressed by L T Hobhouse, to the Marxian theory of the State. The textbook follows an ideological approach where it rejects the attitude of those behaviouralists who place undue emphasis on methods, techniques and skills rather than on first principles and value judgements. It is developed for the undergraduate students of Political Science (Pass and honours courses). Aspirants of various competitive examinations such as Civil Services Examination and state public service commission examinations will also find the book extremely useful.

This book provides an accessible introduction to using case studies. It makes sense of literature in this area, and shows how to generate collaborations and communicate findings. The authors bring together the practical and the theoretical, enabling readers to build expertise on the principles and practice of case study research, as well as engaging with possible theoretical frameworks. They also highlight the place of case study as a key component of educational research. With the help of this book, M-Level students, teacher educators and practitioner researchers will gain the confidence and skills needed to design and conduct a high quality case study. Dr Lorna Hamilton is a Senior Lecturer in Education Research at the University of Edinburgh. Dr Connie Corbett-Whittier is an Associate Professor of English and Humanities at Friends University, Topeka, Kansas. 'Drawing on a wide range of their own and others' experiences, the authors offer a comprehensive and convincing account of the value of case study in educational research. What comes across - quite passionately - is the way in which a case study approach can bring to life some of the complexities, challenges and contradictions inherent in educational settings. The book is written in a clear and lively manner and should be an invaluable resource for those teachers and students who are incorporating a case study dimension into their research work.' -Ian Menter, Professor of Teacher Education, University of Oxford 'This book is comprehensive in its coverage, yet detailed in its exposition of case study research. It is a highly interactive text with a critical edge and is a useful tool for teaching. It is of particular relevance to practitioner researchers, providing accessible guidance for

reflective practice. It covers key matters such as: purposes, ethics, data analysis, technology, dissemination and communities for research. And it is a good read!' - Professor Anne Campbell, formerly of Leeds Metropolitan University 'This excellent book is a principled and theoretically informed guide to case study research design and methods for the collection, analysis and presentation of evidence' - Professor Andrew Pollard, Institute of Education, University of London Research Methods in Education series: Each book in this series maps the territory of a key research approach or topic in order to help readers progress from beginner to advanced researcher.
