Educational Psychology: Developing Learners Value Package (Includes Teacher Preparation Classroom (Supersite), 6 Month Access) Pearson

ALERT: Before you purchase, check with your instructor or review your course syllabus to ensure that you select the correct ISBN. Several versions of Pearson's MyLab & Mastering products exist for each title, including customized versions for individual schools, and registrations are not transferable. In addition, you may need a CourseID, provided by your instructor, to register for and use Pearson's MyLab & Mastering products. Packages Access codes for Pearson's MyLab & Mastering products may not be included when purchasing or renting from companies other than Pearson; check with the seller before completing your purchase. Used or rental books If you rent or purchase a used book with an access code, the access code may have been redeemed previously and you may have to purchase a new access code. Access codes Access codes that are purchased from sellers other than Pearson carry a higher risk of being either the wrong ISBN or a previously redeemed code. Check with the seller prior to purchase. -- Unlike most educational psychology books, which take one theory at a time, explain its assumptions and principles and then identify implications for educational practice, *Essentials of Educational Psychology* focuses more on the commonalities than the differences among theories, because although researchers from different traditions have approached human cognition and behavior from many different angles, they sometimes arrive at more or less the same conclusions. This book integrates ideas from many theoretical perspectives into a set of principles and concrete strategies that psychology as a whole can offer you. See for Yourself exercises will help you discover more about yourself as a thinker and learner and also help you come to a deeper and more personal understanding of educational psychology's core ideas. This is the standalone book, if you want the Book/Access Card order the ISBN listed below: 0132682494 / 9780132682497

Educational Psychology, Developing Learning and Student Study Guide Taylor & Francis

Developmental and Educational Psychology for Teachers brings together a range of evidence drawn from psychology to answer a number of critical educational questions, from basic questions of readiness – for example, when is a child ready for school, through to more complex matters, such as how does a teacher understand

and promote good peer relationships in their classroom? The answers to these and other questions discussed draw here on the interplay between a teachers' craft expertise and their knowledge of evidence and theory from developmental and educational psychology. Presenting a range of classic theories and contemporary research to help readers understand what the key issues are for teachers and other professionals, this book aides informed educational decisions in situations such as: inclusion, ability grouping, sex differences, developing creativity, home and peer influences on learning, and developing effective learners. Teachers in early years, primary and secondary settings are routinely faced with questions regarding the development of children. This not only relates to the planning and delivery of lessons, but also to the mental and physical wellbeing of the children and adolescents that they teach. The pedagogical features of this book are accessible and clearly presented, including focus questions that direct the reader's attention to key issues, activity posts that point the reader to meaningful and relevant research and show the practical applications of material covered, and extension material that gives depth to many of the topics covered. This book aims to inform the practice of both in-service and trainee teachers, addressing issues that are relevant to their practice. With no other detailed and accessible text presenting this evidence and theory specifically for an audience of practicing and trainee teachers currently on the market, this book will be of essential reading to practicing and trainee teachers for early years, primary and secondary education and other related educational contexts such as educational psychologists, counsellors, paediatric and child doctors and nurses.

Handbook of Educational Psychology and Students with Special Needs provides educational and psychological researchers, practitioners, policy-makers, and graduate students with critical expertise on the factors and processes relevant to learning for students with special needs. This includes students with attention-deficit/hyperactivity disorder, other executive function difficulties, behavior and emotional disorders, autism spectrum disorder, intellectual disabilities, learning disabilities, dyslexia, language and communication difficulties, physical and sensory disabilities, and more. With the bulk of educational psychology focused on "mainstream" or "typically developing" learners, relatively little educational psychology theory, research, measurement, or practice has attended to students with "special needs." As clearly demonstrated in this book, the factors and processes studied within educational psychology—motivation and engagement, cognition and neuroscience, social-emotional development, instruction, home and school environments, and more—are vital to all learners, especially those at risk or disabled. Integrating guidance from the DSM-5 by the American Psychiatric Association and the International Classification of Diseases (ICD-10) by the World Health Organization, this book synthesizes and builds on existing interdisciplinary research to establish a comprehensive case for effective psycho-educational theory, research, and practice that address learners with special needs. Twenty-seven chapters by experts in the field are structured into three parts on diverse special needs categories, perspectives from major educational psychology theories, and constructs relevant to special needs learning, development, and knowledge building.

Educational Psychology: Developing Learners with Myeducationlab with Enhanced Pearson Etext, Loose-Leaf Version -- Access Card Package Prentice Hall

Adult education occurs whenever individuals engage in sustained, systematic learning in order to affect changes in their attitudes, knowledge, skills, or belief systems. Learning, instruction, and developmental processes are the primary foci of educational psychology research and theorizing, but educational psychologists' work in these domains has centered primarily on the childhood and adolescent school years. More recently, however, a number of educational psychologists have studied learning and development in adulthood. The results of these efforts have resulted in what is now called adult educational psychology. The purpose of this volume is to introduce this new subfield within educational psychology. Section 1 focuses on the interplay between learning and development in adulthood, how various forms of instruction lead to different learning outcomes for adults, description of the diverse social contexts in which adult

learning takes place, and the development of metacognitive knowledge across the life span. Section 2 describes both research and theory pertaining to adult intellectual functioning, thinking, and problem-solving skills within various contexts. Section 3 describes research in a variety of adult learning domains; discusses the cognitive and behavioral dimensions of reading in adulthood and the applications of reading in real-life circumstances; examines an educational intervention developed to promote forgiveness; and relates the outcomes of an intervention designed to educate parents about their children's mathematics learning. Section 4 summarizes the themes and issues running throughout this, the first book that has sought to span the gulf between adult education, adult development, and educational psychology.
