Science awareness is a must in the modern world. Science (and technology of course) has brought a revolutionary change in our life styles, thought processes and in the way we look at the world. But it has also created pollution and health problems. To be modern is therefore not just a change of the physical but, more importantly, a change of the mental. More 1000 Science Quiz, a sequel to 1000 Science Quiz by the same author, is an attempt to assess - and add to - one's scientific awareness on all disciplines, dimensions and viewpoints related to science and technology. Questions in the book like - Where are red blood cells produced? Which is India's access provider to the internet? What can solve the problem of plastic pollution? - make you aware of the role of science in daily life, keeping you a step ahead of the others.
