MfM ménage romance from USA Today bestselling author Julia Sykes Two darkly domineering alpha males. They say I don't have to choose. They both want me. Together. The three of us. I was meant to be theirs: Joseph, my sweet first love, and Marco, his sternly intimidating best friend. I know they're dangerous men, but being with them doesn't feel wrong. When they hold me

in their arms, I feel safe, cherished. I'm still their captive, but I'm no longer certain if I want to be free of them. They swear they only kidnapped me for my own protection, and after a terrifying attack by one of their enemies, I'm starting to believe them. If I give myself to them, can my alluring criminal captors protect me? Or is their world too dangerous for even their strong arms to shield me from harm? Keywords: MfM ménage, Daddy romance, mafia romance, kidnapping, romantic suspense, new adult

How should teacher librarians or instructional leaders engage in action research to improve their school library and benefit students' learning? This book

provides the answers. Teacher librarians need to get directly involved with the research process in the learning commons in order to create actions and strategies that will enhance student learning—and benefit their own professional development as well as demonstrate accountability through their action research efforts. This book provides practical tips and work spaces for educators at the local, state, and national levels, clearly modeling and explaining the process and the tools for conducting action research in a school library setting that will identify the program's strengths and weaknesses. The author coalesces current expert opinions on the topic of action research in the school library environment and highlighting what other teacher

librarians in the field have identified as the pros and cons of using the process. Readers are directed to focus on mitigating the "cons" through the use of specific working pages and templates and by initially exploring "five favorite" links, thereby encouraging those who are new to action research to try what might otherwise seem a daunting process. School principals K-12 who read this book will be better equipped to support their teacher librarians and teachers in this important professional process. Supplies invaluable insights from experts and practitioners on the subject of action research Provides a clear model of the process in action Directs readers to additional resources that facilitate effective action research and timely topics for school library

research, such as time management and technology in learning

Our societies obviously rest on common beliefs. These "myths" are tools that help us to develop and build common identities; they form the structure around which societies function. This does not imply that these beliefs are

“true,” in the sense that they would be supported by empirical facts. In social matters, myths have undoubtedly important functions to play even if no empirical facts support them. On the other hand, and precisely because they are not discussed, myths may be problematic: they may create illusions, conserve structures that are inefficient and unable to improve the situation of citizens. This is particularly true with constitutions. Constitutions are very important for societies: a constitution is a document — even in societies based on “unwritten” constitutions — which binds citizens together, creating unity among them, and which forms the framework within which our activities take place. As Nobel Prize laureate James Buchanan used to say:

constitutions contain the rules of the social game we play in our everyday life. However, constitutions are not frequently debated by citizens. This is why we end up with common beliefs about these constitutions: they are above our heads, around us. We take them, their role, function, and nature as given. The purpose of this volume to investigate and challenge common constitutional myths. Featuring contributions from prominent economists, political scientists, and legal scholars, the chapters in this volume address such myths as “constitutions are binding social contracts,” “constitutions are economic documents” and “constitutions are legal documents.” Illustrating their analyses with historical and contemporary examples from the

United States, Canada, and Europe, the authors build a multi-layered approach to understanding constitutions and their implications for social and political influence.

There have been substantial developments in the methodologies available for the non-destructive and non-invasive measurement of body composition in animals. By bringing together in a single volume a mix of

traditional and well-established analytical methods with more modern techniques, Body Composition Analysis: A Handbook of Non-destructive Methods provides a theoretical overview of different methodologies combined with practical advice on the use of these techniques. Methods covered include the use of destructive methods of analysis, body condition indices, isotope and gas dilution methods, total body electrical conductivity, bio-impedance analysis, ultrasound scanning and dual energy X-ray absorptiometry. Aimed at active research workers from advanced undergraduate level upwards, this book will be of particular interest to those working in the fields of animal ecology, conservation biology, animal nutrition and physiology.

This history of one of the most contentious educational issues in America examines bilingual instruction in the United States from the common school era to the recent federal involvement in the 1960s and 1970s. Drawing from school reports, student narratives, legal resources, policy documents, and other primary sources, the work teases out the underlying agendas and patterns in bilingual schooling during much of America's history. The study demonstrates clearly how the broader context - the cultural, intellectual, religious, demographic, economic, and political forces - shaped the contours of dual-language instruction in America between the 1840s and 1960s. Ramsey's work fills a crucial void in the educational literature and

addresses not only historians, linguists, and bilingual scholars, but also policymakers and practitioners in the field.

To Mr. Tate Howard, You are quite possibly the most infuriating, annoying and grumpy man I've ever met in my life. I know you think that you're God's gift to women, but I have a secret to let you in on: you're not. You're God's gift to yourself. Get over your wanna-be cool surfer self and grow up. I thought it was time that someone addressed your big head and told you straight to your face that you're not all that. Just because you have an Ivy league education doesn't mean you're the smartest man in the world. In fact, I'm not even sure if you would have gotten in if you didn't have rich parents. Yes, I went there. Every woman doesn't want to sleep with you

and I'm sure you're not even good in bed. And I'm someone that would know.
