ADRIENNE HORTON

Abortion Politics Edward Elgar Publishing
 Debates around the 'sport for development and peace' (SDP) movement have entered a new phase, moving on from simple questions surrounding the utility of sport as a tool of international development. *Beyond Sport for Development and Peace* argues that critical research and new perspectives and methodologies are necessary to balance the local aspects and global influences of sport and to better understand the power relations embedded in SDP on a transnational scale. As the era of the Millennium Development Goals gives way to a new agenda for sustainable development, this book considers the position of SDP. The book brings together contributors from 15 different countries across the developed and developing worlds, including academic researchers and 'on the ground' experts, practitioners and policy-makers, to provide one of the most diverse set of perspectives assembled in SDP scholarship. Looking to the renewed development agenda, its authors explore theoretical, policy and

practical dimensions that address the broadening geographical and cultural spread of SDP, the emergence of issues such as child protection within it, its increased capacity for critical reflection on practice, and its potential for new collaborative approaches to knowledge production. Through its combination of academically-led chapters paired with practice-oriented 'responses' it offers an important reconceptualization of SDP as a contributor to development policy, and opens up important new avenues for studying and 'practising' SDP. *Beyond Sport for Development and Peace* is therefore essential reading for all researchers, advanced students, policy-makers and practitioners working in sport development or international development.

Reauthorization of the Federal Railroad Administration Sydney University Press

A succinct, to-the-point tutorial on project management--part of the expert-authored B.E.S.T. (Basic Engineering Series and Tools) series. Enhances the reader's comprehension of critical technical competencies in project management; team development dynamics and interpersonal problem-solving; and project scope, time, and cost management. Sparks critical thinking through cases, vignettes, and problems that provide a context for text

material. Copyright © Libri GmbH. All rights reserved.

Russia's Military Revival Routledge

This book offers a comprehensive look at the current literatures and research based on empirical data from across different countries in Africa. It focuses on the work of leading scholars of management in and around Africa and the African Context, exploring whether we can at this point refer to 'African Management' as an emerging and distinct stream in the scholarly discourse in management. The main themes are macro and micro issues of Management in Africa, each chapter illustrating the historical or traditional view of Management in Africa versus the newer western business management perspective. This book presents current, in-depth, rigorous research and identifies future research and propositions, enabling scholars and students to gain an in-depth understanding of management as it is evolving and practiced in Africa.

A Research Agenda for Tourism and Wellbeing John Wiley & Sons

This volume explores the meaning of the Paris Climate Agreement 2015 for business; it analyses its challenges and implications, and establishes required actions by the private sector in order to address climate change. We include contributions from diverse locations and disciplines on the challenges this poses for businesses across the globe.

Management of Teleworkers National Academies Press

The Congressional Record is the official record of the proceedings and debates of the United States Congress. It is published daily when Congress is in session. The Congressional Record began publication in 1873. Debates for sessions prior to 1873 are recorded in The Debates and Proceedings in the Congress of the United States (1789-1824), the Register of Debates in Congress (1824-1837), and the Congressional Globe (1833-1873)

Research Handbook of Sustainability Agency Springer

What does it mean for the future of the planet when one of the world's most durable authoritarian governance systems pursues "ecological civilization"? Despite its staggering pollution and colossal appetite for resources, China exemplifies a model of state-led environmentalism which concentrates decisive political, economic, and epistemic power under centralized leadership. On the face of it, China seems to embody hope for a radical new approach to environmental governance. In this thought-provoking book, Yifei Li and Judith Shapiro probe the concrete mechanisms of China's coercive environmentalism to show how 'going green' helps the state to further other agendas such as citizen surveillance and geopolitical influence. Through top-down initiatives, regulations, and campaigns to mitigate pollution and environmental degradation, the Chinese authorities also promote control over the behavior of individuals and enterprises, pacification of borderlands, and expansion of Chinese power and influence along the Belt and Road and even into the global commons. Given the limited time that remains to mitigate climate change and protect millions of species from extinction, we need to consider whether a green authoritarianism can show us the way. This book explores both its promises and risks.

The Routledge Companion to Leadership and Change Springer Science & Business Media

Russian annexation of Crimea and the subsequent air campaign over Syria took the world by surprise. The capabilities and efficiency of Moscow's armed forces during both operations signalled to the world that Russia was back in business as a significant military actor on the international stage. In this cutting-edge study, Bettina Renz provides an in-depth and comprehensive analysis of Russia's military revival under Putin's leadership. Whilst the West must adjust to the reality of a modernised and increasingly powerful Russian military, she argues that the renaissance of Russian military might and its

implications for the balance of global power can only be fully understood within a wider historical context. Assessing developments in Russian Great Power thinking, military capabilities, Russian strategic thought and views on the use of force throughout the post-Soviet era, the book shows that, rather than signifying a sudden Russian military resurgence, recent developments are consistent with longstanding trends in Russian military strategy and foreign policy.

Reauthorization of the Federal Rail Safety Program John Wiley & Sons

This unique collection shows what happens when one university takes on the challenge of developing the scholarship of teaching and learning with a view to enhancing students' learning experiences. Authors from the sciences, engineering, humanities and social sciences, and from the health sciences, demonstrate the research they have done to investigate their students' learning. The editors, Angela Brew and Judyth Sachs, have captured the intricacies of teaching and learning in different academic domains in this rich and varied collection. The book explores students' responses to contemporary art, to multicultural music and to architecture for the poor and dispossessed. It explores students' ability to transfer mathematical knowledge from one subject to another; how students learn to talk like a pharmacist, or understand basic concepts in physics; how students are prepared for university study in first year classes or in the operating theatre; how they learn to write like a scientist; how they learn in online discussions and how they understand group work and group assessment. Each chapter is grounded in rigorous research and scholarship and indicates actions that have been taken to improve teaching and students' learning. This book is a remarkable demonstration of scholarly teaching practice from a single institution. It should be read by all teachers and managers in higher and tertiary education institutions interested in developing teaching and learning.

African Markets and the Utu-Ubuntu Business Model. A perspective on economic informality in Nairobi Routledge
Digital theology is an emerging and evolving field of research in academia. It is gaining traction with scholars across a variety of subjects including; Computer Science, Theology, Sociology of Religion and the wider Humanities.

A Research Agenda for Sustainability and Business Edward Elgar Publishing

Lists addresses and telephone and fax numbers for federal agencies, Congress, and nongovernmental organizations in Washington, D.C.

Knowledge Management in Organizations Oxford University Press, USA

Abortion has remained one of the most volatile and polarizing issues in the United States for over four decades. Americans are more divided today than ever over abortion, and this debate colors the political, economic, and social dynamics of the country. This book provides a balanced, clear-eyed overview of the abortion debate, including the perspectives of both the pro-life and pro-choice movements. It covers the history of the debate from colonial times to the present, the mobilization of mass movements around the issue, the ways it is understood by ordinary Americans, the impact it has had on US political development, and the differences between the abortion conflict in the US and the rest of the world. Throughout these discussions, Ziad Munson demonstrates how the meaning of abortion has

shifted to reflect the changing anxieties and cultural divides which it has come to represent. *Abortion Politics* is an invaluable companion for exploring the abortion issue and what it has to say about American society, as well as the dramatic changes in public understanding of women's rights, medicine, religion, and partisanship.

Engineering in K-12 Education Taylor & Francis

The Handbook bridges hitherto separate disciplines engaged in research in mergers and acquisitions (M&A) to integrate strategic, financial, socio-cultural, and sectoral approaches to the field. It examines the management processes involved, as well as valuations and post-acquisition performance, and considers international and sectoral dimensions.

Extension Service Review John Wiley & Sons

By making available the almost unlimited energy stored in prehistoric plant matter, coal enabled the industrial age – and it still does. Coal today generates more electricity worldwide than any other energy source, helping to drive economic growth in major emerging markets. And yet, continued reliance on this ancient rock carries a high price in smog and greenhouse gases. We use coal because it is cheap: cheap to scrape from the ground, cheap to move, cheap to burn in power plants with inadequate environmental controls. In this book, Mark Thurber explains how coal producers, users, financiers, and technology exporters drive this supply chain, while fragmented environmental movements battle for full incorporation of environmental costs into the global calculus of coal. Delving into the politics of energy versus the environment at local, national, and international levels, Thurber paints a vivid picture of the multi-faceted challenges associated with continued coal production and use in the twenty-first century.

Should We Fear Russia? Emerald Group Publishing

This book analyzes new theories and practical approaches for promoting excellence in human resource management and leadership. It shows how the principles of creating shared value can be applied to ensure faster learning, training, business development and social renewal. In particular, it presents novel methods and tools for tackling the complexity of management and learning in both business organizations and society.

Discussing ontologies, intelligent management systems, and methods for creating knowledge and value added, it offers novel insights into time management and operations optimization, as well as advanced methods for evaluating customers' satisfaction and conscious experience. Based on two AHFE 2020 Virtual Conferences: the AHFE 2020 Conference on Human Factors, Business Management and Society and the AHFE 2020 Conference on Human Factors in Management and Leadership, held on July 16–20, 2020, the book provides researchers and professionals with extensive information, practical tools and inspiring ideas for achieving excellence in a broad spectrum of business and societal activities.

Advances in Human Factors, Business Management and Leadership John Wiley & Sons

How businesses can and are acting to redress social and

environmental issues is a question of growing academic interest. Bringing together a range of interdisciplinary perspectives, this insightful Research Agenda evaluates the current state of the art of sustainability and business and assesses key challenges for the field.

China's Future Springer Nature

Alliance politics is a regular headline grabber. When a possible military crisis involving Russia, North Korea, or China rears its head, leaders and citizens alike raise concerns over the willingness of US allies to stand together. As rival powers have tightened their security cooperation, the United States has stepped up demands that its allies increase their defense spending and contribute more to military operations in the Middle East and elsewhere. The prospect of former President Donald Trump unilaterally ending alliances alarmed longstanding partners, even as NATO was welcoming new members into its ranks. *Military Alliances in the Twenty-First Century* is the first book to explore fully the politics that shape these security arrangements – from their initial formation through the various challenges that test them and, sometimes, lead to their demise. Across six thematic chapters, Alexander Lanoszka challenges conventional wisdom that has dominated our understanding of how military alliances have operated historically and into the present. Although military alliances today may seem uniquely hobbled by their internal difficulties, Lanoszka argues that they are in fact, by their very nature, prone to dysfunction.

Washington Information Directory 2008-2009 Edward Elgar Publishing

This innovative Research Handbook answers crucial questions about how individuals and organisations can make a difference towards sustainability. Offering an integrative perspective on sustainability agency, it reviews individual, active, organisational and relational forms of sustainability agency, demonstrating the capacity of individuals and organisations to act toward sustainable futures.

Labor Notes John Wiley & Sons

Proceedings of the 12th European Conference on Management, Leadership and Governance

UTU Mass Transportation Series John Wiley & Sons

Since the outbreak of the Ukraine crisis, there has been much talk of a new Cold War between the West and Russia. Under Putin's authoritarian leadership, Moscow is widely seen as volatile, belligerent and bent on using military force to get its way. In this incisive analysis, top Russian foreign and security policy analyst Dmitri Trenin explains why the Cold War analogy is misleading. Relations between the West and Russia are certainly bad and dangerous but – he argues – they are bad and dangerous in new ways; crucial differences which make the current rivalry between Russia, the EU and the US all the more fluid and unpredictable. Unpacking the dynamics of this increasingly strained relationship, Trenin makes a compelling case for handling Russia with pragmatism and care rather than simply giving into fear.
