This volume addresses the interface of two major national problems: the epidemic of HIV-AIDS and the widespread use of illegal injection drugs.

Should communities have the option of giving drug users sterile needles or bleach for cleaning needs in order to reduce the spread of HIV? Does needle distribution worsen the drug problem, as opponents of such programs argue? Do they reduce the spread of other serious diseases, such as hepatitis? Do they result in more used needles being carelessly discarded in the community? The panel takes a critical look at the available data on needle exchange and bleach distribution programs, reaches conclusions about their efficacy, and offers concrete recommendations for public policy to reduce the spread of HIV/AIDS. The book includes current knowledge about the epidemiologies of HIV/AIDS and injection drug use; characteristics of needle exchange and bleach distribution programs and views on those programs from diverse community groups; and a discussion

of laws designed to control possession of needles, their impact on needle sharing among injection drug users, and their implications for needle exchange programs.

Needles/Powers/Crosson PRINCIPLES OF ACCOUNTING is continuously evolving to meet the needs of today's learner. This edition's new structure is based on research with students about the best way to deliver content in this course! The chapters in *Needles/Powers/Crosson* have been organized into the Three Section Approach, which helps you more easily digest the content. The first section is Concepts and focuses on the overarching accounting concepts that require consistent reiteration throughout the course. With a clear understanding of the concepts, you are then

ready to experience the second section-- Accounting Applications. Here you practice the application of accounting procedures with features like Apply It and a new transaction analysis model, which clearly illustrates how transactions are the result of business decisions and recorded in a way to show their effects on the financial statements. Finally, you utilize section three, Business Applications. This section illustrates how the concepts and procedures are used to make business decisions. Real company examples are used throughout the chapter to show students the relevance of the material. This logical progression through the material is further supported in the online environment in CengageNOW with the Tri-Level Problem. This problem mirrors the Three Section Approach and connects the sections to facilitate a more complete understanding. These substantial changes will make you a more efficient learner and are designed to prepare you for a business world increasingly complicated by ethical issues, globalization. Important

Drug overdose, driven largely by overdose related to the use of opioids, is now the leading cause of unintentional injury death in the United States. The ongoing opioid crisis lies at the intersection of two public health challenges: reducing the burden of suffering from pain and containing the rising toll of the harms that can arise from the use of opioid medications. Chronic pain and opioid use disorder both represent complex human conditions affecting millions of Americans and causing untold disability and loss of function. In the context of the growing opioid problem, the U.S. Food and Drug Administration (FDA) launched an Opioids Action Plan in early 2016. As part of this plan, the FDA asked the National Academies of Sciences, Engineering, and Medicine to convene a committee to update the state of the science on pain research, care, and education and

to identify actions the FDA and others can take to respond to the opioid epidemic, with a particular focus on informing FDA's development of a formal method for incorporating individual and societal considerations into its risk-benefit framework for opioid approval and monitoring.
