 DataSnap Server - TechyLib Last week Jim McKeeth introduced
 DataSnap clients for Android with a very nice video, linked at the
 bottom of this page. He showed how to build a client using the
 same technologies available for all other platforms Delphi
 supports. DataSnap Android Clients - MarcoCantu The Multi-Tier
 FireDAC DataSnap driver supports: DataSnap servers built with
 RAD Studio 2007 and later. DataSnap clients built with RAD
 Studio XE2 Enterprise and later. Client Software. FireDAC
 statically links the Embarcadero DataSnap dbExpress driver, so
 no additional files and DLLs are required. Supported are RAD
 Studio XE2 Enterprise and later. Connect to DataSnap Server
 (FireDAC) - RAD Studio This tutorial describes how to connect to
 an Enterprise database from a mobile client application. To
 connect to an Enterprise Database, you need to have a client
 library. In most cases, the client library is provided by the
 database vendor in DLL format. This strategy does not work well
 for mobile devices because no client library is available. Mobile
