ANIYA BRADFORD

King Lear, from Hudson's School Shakespeare Peterson's
 Twelve contributors highlight the various aspects of the school's development and the unique opportunities it offers. The first new medical school in Canada in over thirty years, the Northern Ontario School of Medicine provides a blueprint for those interested in an innovative approach to medical education. This collection provides a fascinating and detailed account of the challenges and rewards faced by those who insisted on creating a patient-centered, community-based, and culturally sensitive learning environment for the physicians of tomorrow.

Two-Year Colleges 2014 Simon and Schuster
 The Premed Playbook: Guide to the Medical School Application is a 30,000-foot view about the medical school application. The Premed Playbook: Guide to the Medical School Application is the ultimate resource for the 60,000+ students applying to medical school every year in the US. With a detailed breakdown of each part of the medical school application, discussion about knowing when the student is good enough, and a self-reflection checklist if a student doesn't get into medical school, The Premed Playbook: Guide to the Medical School Application is the must-have companion for students as they are filling out their applications every spring.

272 Secrets for Getting Your Kid into the Top Schools Judith Arnold
 Profiles more than 1,400 accredited programs and offers information on admissions requirements, tuition, housing, and financial aid options.

Sections 8-10 of 20 Elsevier Health Sciences
 Peterson's Graduate Programs in Engineering & Applied Sciences contains a wealth of information on colleges and universities that offer graduate degrees in the fields of Aerospace/Aeronautical Engineering; Agricultural Engineering & Bioengineering; Architectural Engineering, Biomedical Engineering & Biotechnology; Chemical Engineering; Civil & Environmental Engineering; Computer Science & Information Technology; Electrical & Computer Engineering; Energy & Power engineering; Engineering Design; Engineering Physics; Geological, Mineral/Mining, and Petroleum Engineering; Industrial Engineering; Management of Engineering & Technology; Materials Sciences & Engineering; Mechanical Engineering & Mechanics; Ocean Engineering; Paper & Textile Engineering; and Telecommunications. Up-to-date data, collected through Peterson's Annual Survey of Graduate and Professional Institutions, provides valuable information on degree offerings, professional accreditation, jointly offered degrees, part-time and evening/weekend programs, postbaccalaureate distance degrees, faculty, students, degree requirements, entrance requirements, expenses, financial support, faculty research, and unit head and application contact information. As an added bonus, readers will find a helpful "See Close-Up" link to in-depth program descriptions written by some of these institutions. These Close-Ups offer detailed information about the specific program or department, faculty members and their research, and links to the program Web site. In addition, there are valuable articles on financial assistance and support at the graduate level and the graduate admissions process, with special advice for international and minority students. Another article discusses important facts about accreditation and provides a current list of accrediting agencies.

The Fixer Upper McGill-Queen's Press - MQUP
 Originally published in 1939, this book presents a register of admissions to Peterhouse College, Cambridge during the period October 1911 to December 1930. The text consists of abstracts from the College Historical Registers, supplemented by information from other sources. A detailed introduction is also provided, together with information on Masters and Fellows elected to the College during the period October 1911 to December 1938. This book will be of value to anyone with

an interest in the history of Peterhouse and Cambridge University.
Making of the Northern Ontario School of Medicine Harvard University Press
 Peterson's Graduate Programs in Computer Science & Information Technology, Electrical & Computer Engineering, and Energy & Power Engineering contains a wealth of information on colleges and universities that offer graduate work these exciting fields. The profiled institutions include those in the United States, Canada and abroad that are accredited by U.S. accrediting bodies. Up-to-date data, collected through Peterson's Annual Survey of Graduate and Professional Institutions, provides valuable information on degree offerings, professional accreditation, jointly offered degrees, part-time and evening/weekend programs, postbaccalaureate distance degrees, faculty, students, degree requirements, entrance requirements, expenses, financial support, faculty research, and unit head and application contact information. Readers will find helpful links to in-depth descriptions that offer additional detailed information about a specific program or department, faculty members and their research, and much more. In addition, there are valuable articles on financial assistance, the graduate admissions process, advice for international and minority students, and facts about accreditation, with a current list of accrediting agencies.

Heritage Site Guidebook, Second Edition Simon and Schuster
 The most crucial choice a high school graduate makes is whether to attend college or to go to work. Here is the most sophisticated study of the complexities behind that decision. Based on a unique data set of nearly 23,000 seniors from more than 1,300 high schools who were tracked over several years, the book treats the following questions in detail: Who goes to college? Does low family income prevent some young people from enrolling, or does scholarship aid offset financial need? How important are scholastic aptitude scores, high school class rank, race, and socioeconomic background in determining college applications and admissions? Do test scores predict success in higher education? Using the data from the National Longitudinal Study of the Class of 1972, the authors present a set of interrelated analyses of student and institutional behavior, each focused on a particular aspect of the process of choosing and being chosen by a college. Among their interesting findings: most high school graduates would be admitted to some four-year college of average quality, were they to apply; applicants do not necessarily prefer the highest-quality school; high school class rank and SAT scores are equally important in college admissions; federal scholarship aid has had only a small effect on enrollments at four-year colleges but a much stronger effect on attendance at two-year colleges; the attention paid to SAT scores in admissions is commensurate with the power of the scores in predicting persistence to a degree. This clearly written book is an important source of information on a perpetually interesting topic.

Two-Year Colleges - 2010 Peterson's
 Profiles more than 3,200 degree programs for traditional students, RNs, advanced-practice nurses, and nurse Ph.D.s, and includes research-facility descriptions, tuition, financial aid programs, and entrance requirements.
