Discover how the scientist  
Bruce Banner becomes  
the green giant known as  
the incredible Hulk!

Ready-to-Read books offer  
children a world of  
possibilities at three  
different reading levels.  
Level 1: Starting to Read  
Simple stories, building  
vocabulary, basic  
sentences. Level 2:  
Reading Independently  
More-challenging stories,  
varied sentence structure,  
paragraphs and short

chapters. Level 3:  
Reading Proficiently  
Complex stories, rich  
vocabulary, longer  
chapters.  
Using Time-tested Health  
Tips and Uncommon  
Sense Everyman Chess  
Reflecting the author's  
years of industry and  
teaching experience, Fluid  
Mechanics and

Turbomachinery features many innovative problems and their systematically worked solutions. To understand fundamental concepts and various conservation laws of fluid mechanics is one thing, but applying them to solve practical problems is another challenge. The book covers various topics in fluid mechanics, turbomachinery flowpath design, and internal cooling and sealing flows around rotors and stators of gas turbines. As an ideal source of numerous practice problems with

detailed solutions, the book will be helpful to senior-undergraduate and graduate students, teaching faculty, and researchers engaged in many branches of fluid mechanics. It will also help practicing thermal and fluid design engineers maintain and reinforce their problem-solving skills, including primary validation of their physics-based design tools.

**Efficient and Accurate Parallel Genetic Algorithms** American Philosophical Society Drawing on ethnographic

fieldwork within the World Bank and a Ugandan ministry, this book critically examines how the new aid architecture recasts aid relations as a partnership. While intended to alter an asymmetrical relationship by fostering greater recipient participation and ownership, this book demonstrates how donors still seek to retain control through other indirect and informal means. The concept of developmentality shows how the World Bank's ability to steer a client's

behavior is disguised by the underlying ideas of partnership, ownership, and participation, which come with other instruments through which the Bank manipulates the aid recipient into aligning with its own policies and practices.

Warehouse sanitation workshop handbook

IWGIA

Established as one of the main sources for the study of the Rome Statute of the International Criminal Court, this volume provides an

article-by-article analysis of the Statute; the detailed analysis draws upon relevant case law from the Court itself, as well as from other international and national criminal tribunals, academic commentary, and related instruments such as the Elements of Crimes, the Rules of Procedure and Evidence, and the Relationship Agreement with the United Nations. Each of the 128 articles is accompanied by an overview of the drafting history as well as a

bibliography of academic literature relevant to the provision. Written by a single author, the Commentary avoids duplication and inconsistency, providing a comprehensive presentation to assist those who must understand, interpret, and apply the complex provisions of the Rome Statute. This volume has been well-received in the academic community and has become a trusted reference for those who work at the Court, even judges. The fully updated

second edition of The International Criminal Court incorporates new developments in the law, including discussions of recent judicial activity and the amendments to the Rome Statute adopted at the Kampala conference.

Examine a previously

unexplored aspect of Civil War military medicine!

Here is the first comprehensive examination of pharmaceutical practice and drug provision during the Civil War. While numerous books have recounted the history of medicine in the Civil War, little has been said about the drugs that were used, the people who provided and prepared them, and how they were supplied.

This is the first book to provide detailed discussion of the role of pharmacy. Among the

topics covered in this essential volume are the duties of medical purveyors, the role of the hospital steward, and the nature and state of medical substances commonly used in the 1860s. This last subject would become a matter of considerable controversy and ultimately cost William Hammond, the brilliant and innovative Surgeon General, his career in the Union Army. This richly detailed book shows why the South found drug provision especially difficult and

describes the valiant efforts of Confederate sympathizers to run the Union blockade in order to smuggle in their precious cargoes. You'll also learn about the scurrilous privateers who were out to make a personal fortune at the expense of both the Union and the Confederacy. In addition, *Civil War Pharmacy* illuminates the systematic effort of pharmacists, physicians, and botanists to derive from Southern plants adequate substitutes for foreign substances that were

difficult, if not impossible, to obtain in the Confederacy. In this painstakingly researched yet highly readable book, Michael A. Flannery, co-author of the critically acclaimed *America's Botanico-Medical Movements: Vox Populi*, examines all these topics and more. In addition, he assesses the relative successes and failures of the pharmaceutical aspect of health care at the time—successes and failures that affected every man in army camps and in the field. *Civil War*

*Pharmacy: A History of Drugs, Drug Supply and Provision, and Therapeutics for the Union and Confederacy* includes photographs, helpful tables and figures, and six appendices that make hard-to-find information easy to access and understand. You'll find: the Standard Supply Table of Indigenous Remedies (1863) Circular No. 6 from the Surgeon General's Office (May 4, 1863), calling for the removal of calomel and tartar emetic from the Supply Table

instructions on reading and filling a 19th century prescription—with a glossary of Latin phrases and approximate measures, an excerpt from The Hospital Steward’s Manual, and more! a circular from the Confederate Medical Purveyor’s Office a Materia Medica for the South: A list of medicinal substances from Porcher’s Resources of the Southern Fields and Forests common prescriptions of the Civil War period as well as basic syrups of the era with monographs on

their principal substances: alcohol, cinchona, hydrargyrum (mercury), opium, and quinine Packed with more information than can be listed here and, just as importantly, presented in a reader-friendly manner, this is a book that no one interested in Civil War history—or pharmacy history—should be without!

### **Civil War Pharmacy**

Springer Science & Business Media  
Do recent moves in the construction industry towards collaborative

working and other new procurement procedures really make good business sense? Procurement in the Construction Industry is the result of research into this question and it includes the first rigorous categorizing of the differences between procurement methods currently in use. In the process of carrying out this research, the team has produced a comprehensive study of procurement methods which looks in detail at the relative benefits and

costs of different ways of working, with sometimes surprising results. As such, it is not only a valuable guide for practitioners on the complexities of the procurement process, but also an outline of the relevance of economic theory to the construction sector.

*Seeking the Ancient Economy* Oxford University Press on Demand

This book gathers papers presented at the International Conference on Advanced Intelligent

Systems for Sustainable Development (AI2SD-2018), which was held in Tangiers, Morocco on 12–14 July 2018. In addition to the latest research in the field of energy, it offers new solutions, tools and effective techniques, and provides essential information on smart grids, renewable and economical energy. Further, it addresses modeling, storage management and decision support in the field of energy, offering a valuable guide for

researchers, professionals and all those who are interested in the development of advanced intelligent systems in the energy sector.

Vol 2: Advanced Intelligent Systems Applied to Energy

Rowman & Littlefield

Ernest Hemingway (1899-1961) is celebrated as a novelist and man of action. He is perhaps most famous for *WHOM THE BELL TOLLS* and *A FAREWELL TO ARMS*. But he was equally prolific as a writer of short stories which touch on the same

themes as the novels: war, love, the nature of heroism, reunciation, and the writer's life. The present collection includes all Hemingway's shorter fiction arranged chronologically from 'Up in Michigan' (1923) to 'Old Man at the Bridge' (1938) and contains stories not currently available in any other UK edition of Hemingway's work's Women's Apparel Industry Lancour Press  
A collection on the possibilities and limitations of the UN in the field of human rights.

It gives a detailed description of international mechanisms for prevention and compensation of serious violations of fundamental rights of indigenous peoples.

### **Power Plant Reliability**

Universal-Publishers  
PREFACE. THE Author of this very practical treatise on Scotch Loch - Fishing desires clearly that it may be of use to all who had it. He does not pretend to have written anything new, but to have attempted to put what he has to say in as readable

a form as possible. Everything in the way of the history and habits of fish has been studiously avoided, and technicalities have been used as sparingly as possible. The writing of this book has afforded him pleasure in his leisure moments, and that pleasure would be much increased if he knew that the perusal of it would create any bond of sympathy between himself and the angling community in general. This section is interleaved with blank sheets for the

readers notes. The Author need hardly say that any suggestions addressed to the case of the publishers, will meet with consideration in a future edition. We do not pretend to write or enlarge upon a new subject. Much has been said and written-and well said and written too on the art of fishing but loch-fishing has been rather looked upon as a second-rate performance, and to dispel this idea is one of the objects for which this present treatise has been written. Far be it from us

to say anything against fishing, lawfully practised in any form but many pent up in our large towns will bear us out when we say that, on the whole, a days loch-fishing is the most convenient. One great matter is, that the loch-fisher is dependent on nothing but enough wind to curl the water, - and on a large loch it is very seldom that a dead calm prevails all day, -and can make his arrangements for a day, weeks beforehand whereas the stream-fisher is dependent for a

good take on the state of the water and however pleasant and easy it may be for one living near the banks of a good trout stream or river, it is quite another matter to arrange for a days river-fishing, if one is looking forward to a holiday at a date some weeks ahead. Providence may favour the expectant angler with a good day, and the water in order but experience has taught most of us that the good days are in the minority, and that, as is the case with our rapid running streams, -such as many of

our northern streams are, -the water is either too large or too small, unless, as previously remarked, you live near at hand, and can catch it at its best. A common belief in regard to loch-fishing is, that the tyro and the experienced angler have nearly the same chance in fishing, - the one from the stern and the other from the bow of the same boat. Of all the absurd beliefs as to loch-fishing, this is one of the most absurd. Try it. Give the tyro either end of the boat he likes give him a cast of ally flies he may

fancy, or even a cast similar to those which a crack may be using and if he catches one for every three the other has, he may consider himself very lucky. Of course there are lochs where the fish are not abundant, and a beginner may come across as many as an older fisher but we speak of lochs where there are fish to be caught, and where each has a fair chance. Again, it is said that the boatman has as much to do with catching trout in a loch as the angler. Well, we dont

deny that. In an untried loch it is necessary to have the guidance of a good boatman but the same argument holds good as to stream-fishing...

This book constitutes the refereed proceedings of the 9th International Conference on Discovery Science, DS 2006, held in Barcelona, Spain in October 2006, co-located with the 17th International Conference on Algorithmic Learning

Theory, ALT 2006. The 23 revised long papers and the 18 revised regular papers presented together with five invited papers were carefully reviewed and selected from 87 submissions. 9th International Conference, DS 2006, Barcelona, Spain, October 7-10, 2006, Proceedings Farm Journal Human Rights and Indigenous Peoples A Handbook on the UN System Creating and maintaining health becomes more complicated and expensive by the

heartbeat. "Take Back Your Body"] offers manageable, 500-word tips that are quick to read and simple to implement- plus many ways to save time and money. From a four-minute recipe for the Ultimate Smoothie to a five-minute workout, readers of "Take Back Your Body" shift from Health Care to Self Care with simple changes. Plus- they get healthier while saving hundreds of dollars a month at both the market and the pharmacy. Using humor and real-life stories of

anonymous clients, "Take Back Your Body" offers practical ways for readers to save money and improve their health simultaneously. In a concise, entertaining, can-do format, chapters include: Food as Medicine- With A Sensual and Savory Experience on Top Exercise for the Rest of Us How Sex and Meditation Get You to the Same Place- and other Lifestyle Tips My Favorite Herbs for Healing and Prevention Special Issues for Women Special Issues for Men Time Savers (since no one

has time to eat whole foods and exercise)

On My Honour BRILL

An examination of olive cultivation as a way of understanding ancient Greek agriculture in its different settings. The author assembles evidence from written sources, archaeology, and visual images. Her investigation opens up new ways of thinking about the economies of the archaic and classical Greek world.

Old Silver and Old Sheffield Plate Berghahn Books

Covering the entire spectrum of Arabic manuscripts, and especially the handwritten book, this book consists of a glossary of technical terms and a bibliography. The technical terms, collected from a variety of sources, embrace a vast range of topics dealing with the making and reading (studying) of Arabic manuscripts. They include: the Arabic scripts, penmanship, writing materials and implements, the make-up of the codex, copying and correction, decoration and

bookbinding. A similar coverage is reflected in the bibliography. In view of the fact that, as yet, there is no concise monograph on Arabic manuscripts in the English language, this book is an important contribution to this field. And, since Arabic manuscripts represent an enormous resource for research, this work is an indispensable reference for all students of Islamic civilization.

As genetic algorithms (GAs) become

increasingly popular, they are applied to difficult problems that may require considerable computations. In such cases, parallel implementations of GAs become necessary to reach high-quality solutions in reasonable times. But, even though their mechanics are simple, parallel GAs are complex non-linear algorithms that are controlled by many parameters, which are not well understood. Efficient and Accurate Parallel Genetic Algorithms is

about the design of parallel GAs. It presents theoretical developments that improve our understanding of the effect of the algorithm's parameters on its search for quality and efficiency. These developments are used to formulate guidelines on how to choose the parameter values that minimize the execution time while consistently reaching solutions of high quality. Efficient and Accurate Parallel Genetic Algorithms can be read in several ways, depending

on the readers' interests and their previous knowledge about these algorithms. Newcomers to the field will find the background material in each chapter useful to become acquainted with previous work, and to understand the problems that must be faced to design efficient and reliable algorithms. Potential users of parallel GAs that may have doubts about their practicality or reliability may be more confident after reading this book and understanding the

algorithms better. Those who are ready to try a parallel GA on their applications may choose to skim through the background material, and use the results directly without following the derivations in detail. These readers will find that using the results can help them to choose the type of parallel GA that best suits their needs, without having to invest the time to implement and test various options. Once that is settled, even the most experienced users dread the long and

frustrating experience of configuring their algorithms by trial and error. The guidelines contained herein will shorten dramatically the time spent tweaking the algorithm, although some experimentation may still be needed for fine-tuning. Efficient and Accurate Parallel Genetic Algorithms is suitable as a secondary text for a graduate level course, and as a reference for researchers and practitioners in industry. The purpose of this dissertation is to examine the organisational problems, and in particular the leadership problems, of self-help groups in Japan for parents whose children have intractable diseases. Since 1993, I have been involved with these parent groups, and have conducted three sorts of

qualitative interview: thirteen informal conversational interviews, four focus group interviews, and fourteen guided interviews, involving the members of twenty-one parent groups. Part of the research was carried out as participatory action research in which a research team was formed and authorised by the parent groups. My findings have shown that the groups' most serious problems lay not outside their groups but within, with the shortage of

suitable leaders who volunteered in the activities. Three different sorts of account were given concerning the leadership shortage. They included justification, accusation and exposure: the participants claimed that taking care of ill children caused the leadership shortage; selfish members created it; or the determination of older leaders to remain at the helm prevented new members from becoming leaders. Cognitive maps have been drawn of these situations. I have

explained the theories behind the free-rider and social loafing problems, and the leadership traps confronting the parent groups, and have applied attribution theory to the results. I have discussed the practicality of consultation for group leaders, and argued that organisational socialisation should be activated in the parent groups while propounding the island-within-a-lake model of parent groups. Methodologically, I have discussed social research within Japanese culture

and the ethical issues pertain to participatory action research.

Provides definitions and study tips for over sixteen hundred frequently used SAT words and includes strategies for memorizing the words and answering questions on the test.

Farm Journal Oxford University Press

The move to end impunity for human rights atrocities has seen the creation of international and hybrid tribunals and increased prosecutions in domestic

courts. The Oxford Companion to International Criminal Justice is the first major reference work to provide a complete overview of this emerging field. Its nearly 1100 pages are divided into three sections. In the first part, 21 essays by leading thinkers offer a comprehensive survey of issues and debates surrounding international humanitarian law, international criminal law, and their enforcement. The second part is arranged alphabetically,

containing 320 entries on doctrines, procedures, institutions and personalities. The final part contains over 400 case summaries on different trials from international and domestic courts dealing with war crimes, crimes against humanity, genocide, torture, and terrorism. With analysis and commentary on every aspect of international criminal justice, this Companion is designed to be the first port of call for scholars and practitioners interested in current

developments in international justice.
