The Adventurous Decade Palgrave Macmillan

"Great art has dreadful manners," Simon Schama observes wryly at the start of his epic and explosive exploration of the power, and whole point, of art. "The hushed reverence of the gallery can fool you into believing masterpieces are polite things; visions that soothe, charm and beguile, but actually they are thugs. Merciless and wily, the greatest paintings grab you in a headlock, rough up your composure, and then proceed in short order to re-arrange your sense of reality. . . ." With the same disarming force, *The Power of Art* propels us on an eye-opening, breathtaking odyssey, zooming in on eight extraordinary masterpieces, from Caravaggio's *David and Goliath* to Picasso's *Guernica*. Jolting us far from the comfort zone of the hushed art gallery, Schama closes in on intense make-or-break turning points in the lives of eight great artists who, under extreme stress, created something unprecedented, altering the course of art forever. The embattled

heroes—Caravaggio, Bernini, Rembrandt, David, Turner, Van Gogh, Picasso and Rothko—each in his own resolute way, faced crisis with steadfast defiance, pitting passion and conviction against scorn and short-sightedness. The masterpieces they created challenged convention, shattered complacency, shifted awareness and changed the way we look at the world. With vivid storytelling and powerfully evocative descriptive passages, Schama explores the dynamic personalities of the artists and the spirit of the times they lived through, capturing the flamboyant theatre of bourgeois life in Amsterdam, the passion and paranoia of Revolutionary Paris, and the carnage and pathos of Civil War Spain. Most compelling of all, *The Power of Art* traces the extraordinary evolution of eight "eye-popping" world-class works of art. Created in a bolt of illumination, such works "tell us something about how the world is, how it is to be inside our skins, that no more prosaic source of wisdom can deliver. And when they do that, they answer, irrefutably and majestically, the nagging question of every reluctant art-conscript. . . 'OK, OK, but what's art really for?'"

Protogaea, an ambitious account of terrestrial history, was central to the development of the earth

sciences in the eighteenth century and provides key philosophical insights into the unity of Gottfried Wilhelm Leibniz's thought and writings. In the book, Leibniz offers observations about the formation of the earth, the actions of fire and water, the genesis of rocks and minerals, the origins of salts and springs, the formation of fossils, and their identification as the remains of living organisms. Protogaea also includes a series of engraved plates depicting the remains of animals—in particular the famous reconstruction of a "fossil unicorn"—together with a cross section of the cave in which some fossil objects were discovered. Though the works of Leibniz have been widely translated, Protogaea has languished in its original Latin for centuries. Now Claudine Cohen and Andre Wakefield offer the first English translation of this central text in natural philosophy and natural history. Written between 1691 and 1693, and first published after Leibniz's death in 1749, Protogaea reemerges in this bilingual edition with an introduction that carefully situates the work within its historical context.

Donald Worster's A Passion for Nature is the most complete account of the great conservationist and founder of the Sierra Club ever written. It is the first to be based on Muir's full private correspondence and to meet modern scholarly standards, yet it is also full of rich detail and personal anecdote, uncovering the complex inner life behind the legend of the solitary mountain man. It traces Muir from his boyhood in Scotland and frontier Wisconsin to his adult life in California right after the Civil War up to his death on the eve of World War I. It explores his marriage and family life, his relationship with his abusive father, his many friendships with the humble and famous (including Theodore Roosevelt and Ralph Waldo Emerson), and his role in founding the modern American conservation movement. Inspired by Muir's passion for the wilderness, Americans created a long and stunning list of national parks and wilderness areas, Yosemite most prominent among them. Yet the book also describes a Muir who was a successful fruit-grower, a talented scientist and world-traveler, a doting father and husband, and a self-made man of wealth and political influence. The winner of numerous book awards, A Passion for Nature was also named a Best Book of 2008 by Washington Post Book World. It is the first comprehensive biography of Muir to appear in six decades.

Originally printed in 1540, this classic work on the field of metallurgy marked the beginning of a true technological literature. Biringuccio's Pirotechnia is the earliest printed work to cover the whole field of metallurgy. Originally printed in Venice in 1540, this was the first book to deal with the applied metal arts and processes of ore reduction and to describe the techniques which had been in development since the bronze age. Written by a master craftsman in a time when knowledge was kept alive by the spoken rather than the written word, this classic marked the beginning of a true technological literature, with both craftsmanship and science united by a writer's pen to form a record of an important facet of man's achievement as a stimulus to further advance. After the publication of the Pirotechnia, many followed Biringuccio's example, and as a result of this growing literature of technological practice and experimental fact, science eventually became the concern of the educated man.

"I have nothing but praise for this book. It is well conceived, it shows that it was not put together hastily, it incorporates the latest scholarship, and it engages in the latest contemporary debates in the field. . . . Its 'Pan-American' approach is one that reflects the cutting edge of the field of Latin American and Latina/Latino Studies." --Rolando J. Romero, Associate Professor of Latina/Latino Studies, University of Illinois at Urbana-Champaign Over the last five centuries, the story of the Americas has been a story of the mixing of races and cultures. Not surprisingly, the issue of miscegenation, with its attendant fears and hopes, has been a pervasive theme in New World literature, as writers from Canada to Argentina confront the legacy of cultural hybridization and fusion. This book takes up the challenge of transforming American literary and cultural studies into a comparative discipline by examining the dynamics of racial and cultural mixture and its opposite tendency, racial and cultural disjunction, in the literatures of the Americas. Editors Kaup and Rosenthal have brought together a distinguished set of scholars who compare the treatment of

racial and cultural mixtures in literature from North America, the Caribbean, and Latin America.

From various angles, they remap the Americas as a multicultural and multiracial hemisphere, with a common history of colonialism, slavery, racism, and racial and cultural hybridity.

Unimaginable loss yields to the power of human connection in this simple, moving story from the filmmakers of the eponymous Oscar-winning film. An elegy on grief. "Heavy pain exquisitely rendered." Kirkus Starred Review Based on the Academy Award-winning animated short by the same name, If Anything Happens I Love You is a young adult graphic novel that follows two parents as they reckon with the loss of their young daughter, Rose, in a school shooting. Readers follow Rose from "above" as she watches her parents slowly break down under the weight and pain of their loss. Throughout the novel, Rose's soul seeks to help her parents reconnect. We learn who Rose was and how much life she lived in her short time. By incorporating a wide range of characters, her boyfriend, teacher, and her cat, Rose is able to introduce healing into the lives of the people she left behind. If Anything Happens I Love You may be a story about loss, but in it we see ourselves—in the grief, the pain, and, most importantly, in the fight toward human connection, love, and acceptance.

The reprint is printed on deluxe heavy paper stock with all new illustrations, many taken from rarely seen original artwork.

Behind the mask, Appel notes, the student is free to create a personality; paradoxically, because the mask hides the self, it enables the student to probe more deeply into himself. "This book describes, defines, and discusses the mask characterization process, providing the theory behind the exercises and the step-by-step procedure in the organic development of the character from the masks," Appel notes. The manual is divided into two parts: "The Instructor's Guide" and "The Actor's Guide." There is also an introductory chapter, "The Class Structure," which explains mask characterization procedures in the classroom, and a sample class schedule may be found in the back of the manual. This book adds a new dimension to actor training and learning. It is essential to aspiring actors seeking new ways to create honest dramatic characterizations.

This volume contains new publications of two important works that have never been published together and are two firsts: (i) A. S. Eddington's Report on the Relativity Theory of Gravitation (2ed, Fleetway Press, London 1920), which was the first systematic exposition of Einstein's general relativity, and (ii) the first experimental test of general relativity carried out by F. W. Dyson, A. S. Eddington and C. Davidson and reported in the paper "A Determination of the Deflection of Light by the Sun's Gravitational Field, from Observations Made at the Total Eclipse of May 29, 1919" (Phil. Trans. R. Soc. Lond. A 1920 220, pp. 291-333). The answer to the question "Why should Eddington's Report be reprinted again, given that there exist hundreds of excellent books on general relativity?" was given in 1983 by the renowned astrophysicist and recipient of the 1983 Nobel Prize for Physics S. Chandrasekhar: "Eddington's Report is written so clearly and yet so concisely that it can be read, even today, as a good introductory text by a beginning student."
