The ongoing progress of science has shown that it is important for analytical scientists to determine not only the presence of particular elements, but also their species. There are many fields where this is applicable, and where there are a number of topics to be addressed. Developing separation and measurement systems for the many element species has tested the resourcefulness of analytical chemists over recent decades. A product of the EU sponsored Speciation 21 Network, this book presents a detailed review of the state-of-the-art of speciation issues in the occupational health, food and environment sectors, along with the main conclusions arising from discussions held during expert meetings. Topics covered include mercury and organotin compounds in the environment; factors affecting the health of workers; the importance of speciation of trace elements for health, and subsequent metabolism in the body; analytical methodologies; risk assessment; and legislation. Trace Element Speciation for Environment, Food and Health provides an insight into applied research in the speciation field and how it has become so important in all the fields represented. With its comprehensive coverage, it will be of particular interest to researchers in industry and academia, as well as government agencies and legislative bodies.

What can you do if your cat has worms? Use coconut oil. What can you do about smelly doggy breath? Try coconut oil. What if your cat has an ear infection? Again, coconut oil. Believe it or not, coconut oil is a highly effective treatment for a wide variety of common health problems. For this reason, coconut oil has gained a reputation as a superfood—a food that provides health benefits far beyond its nutritional content. Coconuts and coconut oil have a long history of safe and effective use as food and as medicine for both humans and animals. Most animals love the taste of coconut. Whether you own cats, dogs, ferrets, parrots, canaries, chickens, horses, goats, hamsters, gerbils, guinea pigs, rabbits, or other animals, they can all benefit from the nutritional and medicinal properties of coconut oil. Some of the many benefits include: ● Improves the appearance of the skin, hair, and feathers ● Reduces or eliminates body odor and bad breath ● Improves energy and balances metabolism ● Helps reduce excess body fat and maintain proper weight ● Prevents and fights bacterial, viral, and yeast infections ● Strengthens immune function ● Helps relieve kennel cough ● Improves oral health and whitens teeth ● Helps ease allergy symptoms ● Soothes itchy or irritated skin ● Improves digestion and nutrient absorption ● Protects against digestive disorders such as ulcers and colitis ● Expels or kills intestinal parasites ● Helps keep blood sugar in balance ● Helps build strong bones ● Helps prevent and ease joint pain and ligament problems ● Speeds healing from cuts, burns, insect bites, and other injuries ● Protects against fleas, ticks, mites, and other parasites
